INTRODUCTION

Kannur University - Four-Year Undergraduate Programme: Backdrop and Context

The implementation of the Four-Year Undergraduate Programme (FYUGP) has been driven by the pressing need to address contemporary challenges ensuring responsive changes to the evolving needs of students, industry, and society at large. Recognizing the curriculum as the cornerstone of any education system, it requires regular refinement to align with evolving socio-economic factors. Higher education must provide students with practical and technical skills relevant to their fields of interest, necessitating the development of a job-oriented curriculum. Despite significant increases in access and expansion of higher education over the years, concerns persist regarding the quality and relevance of educational outcomes, particularly in terms of employability skills. As the world becomes increasingly interconnected, our education system must evolve to instill 21st-century skills, enabling students not only to survive but to thrive in this dynamic environment. Moreover, there is a growing need for higher education institutions to embrace social responsibility and contribute to the development of a knowledge society capable of driving sustainable development through innovation. With the central objective of fostering a robust knowledge society to support a knowledge economy, the Government of Kerala has initiated steps to reform higher education. Accordingly, three commissions were established to suggest reforms in higher education policy, legal and regulatory mechanisms, and evaluation and examination systems. It is within this context that a comprehensive reform of the undergraduate curriculum has been proposed, leading to the restructuring of the Four-Year Undergraduate Programme.

KANNUR UNIVERSITY

VISION AND MISSION STATEMENTS

Vision

To establish a teaching, residential and affiliating University and to provide equitable and just access to quality higher education involving the generation, dissemination and a critical application of knowledge with special focus on the development of higher education in Kasargode and Kannur Revenue Districts and the Manandavady Taluk of Wayanad Revenue District.

Mission

- To produce and disseminate new knowledge and to find novel avenues for application of such knowledge.
- To adopt critical pedagogic practices which uphold scientific temper, the uncompromised spirit of enquiry and the right to dissent.
- To uphold democratic, multicultural, secular, environmental and gender sensitive values as the foundational principles of higher education and to cater to the modern notions of equity, social justice and merit in all educational endeavors.
- To affiliate colleges and other institutions of higher learning and to monitor academic, ethical, administrative and infrastructural standards in such institutions.
- To build stronger community networks based on the values and principles of higher education and to ensure the region's intellectual integration with national vision and international standards.
- To associate with the local self-governing bodies and other statutory as well as non-governmental organizations for continuing education and also for building public awareness on important social, cultural and other policy issues.

KANNUR UNIVERSITY- FOUR YEAR UNDER GRADUATE PROGRAMME (KU-FYUGP)

Program Outcomes (POs):

Program Outcomes (POs) serve as a foundational framework defining the skills, knowledge, and attributes that students at Kannur University are expected to acquire upon completion of a specific academic program. Tailored to the unique goals of each program, POs articulate the overarching learning objectives that guide curriculum design and assessment. These outcomes encompass a diverse range of competencies, including critical thinking, problem-solving, effective communication, and discipline-specific expertise. POs play a crucial role in shaping educational experiences, ensuring alignment with academic standards and industry expectations. By articulating clear and measurable expectations, POs contribute to the continuous improvement of academic programs and provide a roadmap for students to develop into well-rounded, competent professionals within their chosen fields.

At the end of the graduate programme at Kannur University, a student would:

PO1	Critical Thinking and Problem-Solving: Apply critical thinking skills to analyse information and develop effective problem-solving strategies for tackling complex challenges
PO2	Effective Communication and Social Interaction: Proficiently express ideas and engage in collaborative practices, fostering effective interpersonal connections.
PO3	Holistic Understanding: Demonstrate a multidisciplinary approach by integrating knowledge across various domains for a comprehensive understanding of complex issues.
PO4	Citizenship and Leadership: Exhibit a sense of responsibility, actively contribute to the community, and showcase leadership qualities to shape a just and inclusive society..
PO5	Global Perspective: Develop a broad awareness of global issues and an understanding of diverse perspectives, preparing for active participation in a globalized world
PO6	Ethics, Integrity and Environmental Sustainability: Uphold high ethical standards in academic and professional endeavors, demonstrating integrity and ethical decision-making. Also acquire an understanding of environmental issues and sustainable practices, promoting responsibility towards ecological well-being.
PO7	Lifelong Learning and Adaptability: Cultivate a commitment to continuous self-directed learning, adapting to evolving challenges, and acquiring knowledge throughout life.

PROGRAMME SPECIFIC OUTCOMES (PSO)

Programme Specific Outcomes for KU-FYUGP - Economics Programme at Kannur University:

PSO1	Economic Theory Analysis and Policy Development: Apply economic theories and methodologies to analyze real-world economic phenomena, and develop policy recommendations to address socio-economic challenges at local, national, and global levels
PSO2	Theory informed Data Interpretation and Quantitative Skills: Demonstrate proficiency in interpreting economic data, employing statistical and econometric techniques to analyze economic trends, and make informed decisions in economic policy formulation and business strategies.
PSO3	Sectoral Understanding and Market Dynamics: Develop a deep understanding of various economic sectors, including agriculture, industry, services, and finance, and analyze market dynamics to assess their impact on economic development and welfare
PSO4	Economic Research and Writing: Acquire skills in conducting economic research, synthesizing literature, and effectively communicating research findings through well-structured and persuasive writing, contributing to the advancement of economic knowledge and discourse
PSO5	Policy Advocacy and Civic Engagement: Engage in advocacy for theory informed and evidence -based economic policies, collaborate with stakeholders, and participate in community initiatives to address socio-economic inequalities, promoting inclusive growth and sustainable development
PSO6	Global Economic Perspectives: Explore global economic issues, trends, and policies, develop an understanding of international trade, finance, and economic integration, and analyze their implications for domestic economies and policy formulation
PSO7	Environmental sensitization for Sustainability: Evaluate the economic dimensions of environmental challenges, analyze the trade-offs between economic growth and environmental conservation, and propose strategies for promoting sustainable development and ecological resilience

Course Description:

This course sets foundation for studying the intermediate microeconomics and advanced microeconomics in the forthcoming semesters. The course enables the students to get grip in the microeconomic theory via making the conceptual foundations clear. The course starts with an introduction to microeconomic analysis exploring the basic concepts for better understanding of more advanced theories and moves on to concepts of demand and supply and provides foundations for consumer behaviour analysis at the intermediate level. Foundations of production, cost and revenue analysis are followed in the subsequent module and ends with concepts in factor market and welfare analysis. In brief the course widens the conceptual tool box of an undergraduate student of economics so as to better experience more advanced learning of microeconomics in the forthcoming semesters.

Course Prerequisite: NIL**Course Outcomes:**

CO No.	Expected Outcome	Learning Domains
1	Learn the foundational concepts in microeconomics like trade-offs and opportunity cost, nominal and real prices and the so forth for better theoretical understanding	R, U
2	Understand the basic concepts of demand and supply for analysing market dynamics	R, U

3	Understand the basic concepts of production, cost and revenue for learning the subject in the subsequent semesters	R, U
4	Learn the concepts for analysing factor markets and welfare related concepts for better learning microeconomics at the intermediate and advanced levels	R, U
5	Extend the foundational theoretical tool box of microeconomics for subsequent learning at the intermediate and advanced levels	R, U

**Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)*

Contents for Classroom Transaction:

M O D U L E	U N I T	DESCRIPTION	HOUR S
1	INTRODUCTION TO MICROECONOMICS		10
	1	Why study Microeconomics?	1
	2	Trinity problems of economic organization	2
		a) What, how and for whom to produce?	
	3	The themes of Microeconomics	3
		a) Trade-offs and opportunity cost with Production Possibility Curve	
		b) Prices and markets	

		c) Theories and models	
	4	Positive and normative analysis	2
	5	Competitive and non-competitive markets	2
	BASICS OF DEMAND AND SUPPLY		15
2	1	Demand law	4
		a) Demand schedule and demand curve	
		b) Forces behind the downward sloping demand curve	
		c) From individual to market demand curve	
		d) Inverse demand function	
	2	Movement along the demand curve and shift in demand curve	1
	3	Supply law	3
		a) Supply schedule and supply curve	
		b) Forces behind the upward sloping supply curve	
	4	Market equilibrium mechanism	2
		a) Changes in market equilibrium	
	5	Elasticity of demand and supply	4
		a) Price, income and cross elasticity	
		b) Degrees of price elasticity	
		c) Point vs arc elasticity	
		d) Elasticity of supply – degrees of supply elasticities	
	6	Effects of government intervention on market – price controls and price support	1
	FOUNDATIONS OF PRODUCTION, COST AND REVENUE		15
3	1	Production function	3
		a) Total, Marginal and Average Product	
	2	Concepts of cost	6
		a) Fixed, variable and total cost	
		b) Average and marginal cost: relationship between average and marginal cost	
		c) Average Fixed Cost and Average Variable Cost	
		d) Fixed cost vs sunk cost	

		e) Economic cost vs accounting cost	
	3	Link between production and cost – increasing marginal product and decreasing marginal cost	2
	4	Revenue concepts	4
		a) Total, Average and Marginal Revenue	
		b) AR, MR and Price elasticity	
		C) AR as demand curve	
4	FACTOR MARKET AND WELFARE FOUNDATIONS		10
	1	Factor Market	1
		a) factor income vs personal income	
	2	Concepts for analysing factor Market	2
		a) Marginal Physical Product, Value of Marginal Product, Marginal Revenue Product	
		b) Average Factor Cost and Marginal Factor Cost	
		c) MRP curve as factor demand curve	
	3	Factor Price concepts	2
		a) Economic rent and quasi rent, nominal interest and real interest, nominal wages and real wages, concept of profit	
	4	Consumer surplus: concept and illustration with demand curve	3
5	Producer Surplus: concept and illustration with supply curve	2	
5	Teacher Specific Module		10
	Directions: Works based on hypothetical tables from Schaum’s Outlines		
	This module would be set as a work-based module preferably keeping Schaum’s outlines as basic reference. The content may be based on the theoretical modules from 1 to 4 already in the syllabus or any other topic so as to give better conceptual foundations in Microeconomic theory

Course Description:

This course delves into foundational economic concepts and theories, focusing on Microeconomics, Macroeconomics, and Indian Economy. Students will be able to explore foundational theories of Microeconomics and Macroeconomics, and also get an outlook on the working of India's economy. The course integrates theoretical knowledge with practical applications, case studies, and real-world examples to enhance student's understanding of complex real world economic phenomena.

Course Prerequisite: NIL**Course Outcomes:**

At the end of the course, the student will be able to;

CO No.	Expected Outcome	Learning Domains
CO 1	Understand the fundamental principles and concepts of economics, including microeconomics and macroeconomics.	R, U
CO 2	Understand economic systems, economic agents' roles and economic models and theories.	R, U
CO 3	Comprehend microeconomic principles such as scarcity, opportunity cost, supply and demand and market structures.	R, U
CO 4	Understand consumer behaviour, producer behaviour, and the concepts of utility, budget constraints and profit maximization.	U
CO 5	Gain knowledge of macroeconomic principles like national income accounting, fiscal and monetary policies and economic indicators.	R, U

***Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)**

KU1DSCECO103: ECONOMICS OF TOURISM AND DEVELOPMENT

Semester	Course Type	Course Level	Course Code	Credits	Total Hours
1	DSC-Minor	100-199	KU1DSCECO103	4	60

Learning Approach (Hours/ Week)			Marks Distribution			Duration of ESE (Hours)
Lecture	Practical/ Internship	Tutorial	CE	ESE	Total	
4	0	0	30	70	100	2

Course Description:

This course examines the intersection of tourism and economic development, focussing on how tourism can drive economic growth. This also analyses the economic impacts of tourism at local, regional, and national levels. And it also assesses the challenges and opportunities associated with tourism. Additionally, the field visits incorporated with the syllabus will help the students to get practical knowledge about various concepts and impacts associated with tourism.

Course Prerequisite: NIL**Course Outcomes:**

At the end of the course, the student will be able to;

CO No.	Expected Outcome	Learning Domains
1	Understand fundamental concepts and principles of tourism economics.	R, U
2	Understand the factors that influence the demand and supply of the tourism industry.	R, U
3	Learn the negative and positive impacts of tourism.	R, U
4	Acquire the ability to apply economic principles to tourism	U, A
5	Students will gain exposure to tourism products in various tourist spots.	R, U

***Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)**

Contents for Classroom Transaction:

M O D U L E	U N I T	DESCRIPTION	HOURS
1	INTRODUCTION TO TOURISM		10
		a) Definition and Scope of Tourism	2
		b) Types of Tourism – Cultural tourism, Eco tourism, Medical Tourism, Heritage Tourism, Health Tourism, Beach Tourism, Backwater Tourism, Adventure tourism	3
		c) Resources in Tourism, Components of Tourism	2
		d) Tourism Industry, Characteristics of Tourism Products.	3
2	Module 2: Economics of Tourism		15
		a) Tourism Demand - Types of Tourism Demand, Determinants of Tourism Demand, Measurement of Tourism Demand	4
		b) Cost and Supply in Tourism- Cost Structure, Pricing Strategies, Factors influencing Tourism Supply – Equilibrium in Tourism Market	4
		c) Propensity and Measurement of Tourist Statistics	3
		d) Volume, Expenditure, and Profile of tourism – Recent trends in Kerala and India	2
		e) Tourism Barometer - Spenders and Earners in International Tourism	2

3	Module 3: Impacts of Tourism		10
		a) Positive and Negative Impacts of Tourism - Economic, Socio-Cultural, and Environmental Impact, Global Environmental Issues and Tourism.	4
		b) Foreign exchange, Taxes in Tourism, Employment Generation, Investment and Development	4
		c) Multiplier effect, Types of Multipliers, Regional Development, Tourism as a Foreign Exchange Earner	2
4	Module 4: Tourism Planning and Development		15
		a) Tourism planning - Process and Techniques - Tourism Management	3
		b) Environmental Dimensions of Tourism, Carrying Capacity, Sustainability, Conservation Policy	3
		c) Features of Tourist Destinations, Essential Facilities, and Services for Tourism Development	3
		d) Tourism Development in Kerala, India - Tourism organizations – WTO, PATA, IATA, WTTC - Functions of ITDC, KTDC, DTPC	3
		e) Kerala Tourism at a Glance – Financial Performance, Tourist Arrivals in Kerala, Major Tourist Destinations in Kerala.	3
5	Teacher Specific Module		10
	1	<p>This module would be preferably designed as activity oriented. A few suggestions are as follows (pick up any one and need to be evaluated);</p> <ol style="list-style-type: none"> 1) The students may be instructed to prepare and present travel experiences which they have made in innovative forms like video presentations, narratives in document forms, documentaries and the so forth (preferably group presentations). 2) The students may be instructed to conduct interview of the tourists in the nearest tourism destination and present feedback in any innovative forms (report, video presentation, documentaries and so forth). (survey must be in holidays). 3) Pick up a foreign nation and identify major tourism destinations and their features and present in any innovative form which the student likes to. Different You-tube channels on travel would also be used as references. 4) Conduct study tour (inside Kerala and maximum of 2 days) and submit reflections in any innovative forms which the students prefer to. <p>(10 hour may be preferably devoted for the presentations and evaluation of the activity)</p>	10

Course Description:

This course is designed to provide multidisciplinary foundations of economics with understanding of economic principles and their relevance in daily life. This course offers a comprehensive exploration of fundamental economic concepts, aiming to equip learners with the necessary tools to navigate economic issues in their personal and professional spheres. From understanding price determination and inflation to exploring personal finance, global trade dynamics and social issues such as income inequality and poverty alleviation, students are expected to gain practical insights into economics. By the end of the course, participants will be able to develop basic understanding of economic phenomena, enabling them to make informed decisions and engage meaningfully with economic issues in their everyday life.

Course Prerequisite: NIL**Course Outcomes:**

COs	Expected Outcome	Learning Domains
CO 1	Gain a foundational understanding of economic principles to interpret and engage with economic issues in everyday life.	R, U
CO 2	Understand economic concepts to make informed decisions regarding personal finance and investments.	R, U
CO 3	Develop awareness of global economic dynamics and their implications for individual economies and societies.	R, U
CO 4	Enhance critical thinking skills to address social and economic challenges such as inequality, discrimination, poverty and corruption.	R, U, A

Course Description:

This course offers an interdisciplinary approach to understanding economics. Students will gain insights into fundamental economic principles while exploring the latest trends in the Indian economy, public finance, and international economic developments. Furthermore, it addresses recent developments in India's economy, including government initiatives and contemporary issues. Through a blend of theoretical frameworks and practical case studies, this course prepares students with diverse academic backgrounds to excel in competitive examinations by enhancing their analytical and problem-solving skills.

Course Prerequisite: Basic understanding about the economy

Course Outcomes:

At the end of the course, the student will be able to;

COs	Expected Outcome	Learning Domains
CO1	Gain a comprehensive understanding of the fundamentals of economics	R
CO2	Develop analytical skills to analyze and interpret trends in the Indian economy	U
CO3	Acquire up-to-date knowledge of recent developments in Indian economy	R, U
CO4	Prepared with essential analytical and problem-solving skills to excel in competitive examinations.	U, A
CO5	Gain the capability to effectively apply theoretical economic frameworks to practical case studies.	A

4	0	0	30	70	100	2

Course Description:

This course introduces the essence of macroeconomics and national income accounting, and delves into macroeconomic phenomena such as unemployment, inflation, and economic growth. It is also designed to introduce the students classical and Keynesian macroeconomic theories. The course enables the students to comprehend the intricacies of national income measurement and also familiarises basic analytical tools to understand various macroeconomic variables and their interactions.

Course Prerequisite: NIL**Course Outcomes:**

At the end of the course, the student will be able to;

CO No.	Expected Outcome	Learning Domains
1	Recall the definitions of key macroeconomic concepts such as GDP, GNP, inflation, and unemployment and learn the formulas and methods used in national income accounting.	R, U
2	Understand the relationships between different macroeconomic variables and concepts and the differences between microeconomics and macroeconomics	R, U

FYUGP ECONOMICS

3	Apply various measurement methods (value-added, income, expenditure) to calculate national income and GDP and use macroeconomic theories to analyse and interpret economic data	U, A
4	Understand the causes and consequences of macroeconomic issues such as unemployment and inflation	U
5	Understand the changes in macroeconomic variables from Keynesian and classical perspective and make interpretation	U

***Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)**

COURSE CONTENTS

Contents for Classroom Transaction:

MODULE	UNIT	DESCRIPTION	HOURS
1	INTRODUCTION TO MACRO ECONOMICS		10
	1	Conceptualising macroeconomics	1
	2	Micro Vs macro economics	1
	3	Concepts in Macroeconomics	6
		a) Macroeconomic variables - stock and flow variables, endogenous and exogenous variables, ex-ante and ex-post variables b) Equilibrium and disequilibrium - partial and general equilibrium, static, comparative and dynamic equilibrium.	

	4	Major macroeconomic issues - unemployment, inflation, business cycle and economic growth.	2
2	BASIC CONCEPTS OF NATIONAL INCOME ACCOUNTING		13
	1	Introduction to National Income Accounting - SNA approach	2
	2	Concepts in national income accounting	5
		a) Concepts of GNP, GDP, NNP, GVA and NDP at market price and at factor cost.	
		b) Personal income and disposable income	
		c) Real versus Nominal GDP	
		d) GDP Deflator and its significance.	
	3	Measuring the value of Economic Activity - Value Added Method, income method and Expenditure Method.	4
3	4	Circular flow of income in a four-sector model	2
		Note: <i>Algebraic solutions may be applied to various concepts and methods in the module</i>	-
	CLASSICAL APPROACH TO MACROECONOMICS		15
	1	The Classical Pillars: Say's law, wage-price flexibility, interest rate flexibility	5
	2	Classical Dichotomy and neutrality of money	3
	3	Equilibrium output and employment: labour demand, labour supply and labour market equilibrium	4
	4	The classical quantity theory of money	3
	KEYNESIAN APPROACH TO MACRO ECONOMICS		12
4	1	The simple Keynesian model: The components of aggregate demand - consumption, investment, government spending and taxes	3
	2	Role of effective demand in Keynesian model of determining equilibrium employment and output	2
	3	Components of Aggregate supply and aggregate demand and equilibrium in two sector model	4

	4	Investment multiplier, government expenditure multiplier and balanced budget multiplier	2
	5	Determination of equilibrium income in three and four sector model	1
5	TEACHER SPECIFIC MODULE		10
	Directions: <i>Exercises from Schaum's Outline</i>		-
	<i>This module would be set as exercise-based module preferably keeping Schaum's outlines of Macroeconomics as basic reference. The content may be based on the theoretical modules in the syllabus or any other topic so as to give better conceptual foundations in Macroeconomic theory.</i>		10

Course Description:

Foundations of Economic Analysis is designed to build upon the foundational knowledge for analysing economic issues. This course delves into foundational economic concepts and theories, focusing on development economics, public finance, Economics of Banking and the specific economic dynamics of the Kerala region. Students will be able to explore theories of economic development, public finance principles, business strategies, the economic challenges and opportunities unique to Kerala. The course integrates theoretical knowledge with practical applications, case studies, and real-world examples to enhance understanding of complex economic phenomena.

Course Prerequisite: NIL**Course Outcomes:**

CO No.	Expected Outcome	Learning Domains
1	Gain a comprehensive understanding of development economics theories, economic growth, poverty, inequality, and human development indices.	R, U
2	Understand government budgeting, fiscal policies, taxation principles, public expenditure and the role of government in market failures.	R, U
3	Gain a comprehensive understanding of the banking sector, including its functions, regulatory framework, and economic impact to analyse the role of central banks in formulating monetary policies and managing financial stability.	R, U

FYUGP ECONOMICS

4	Explore economic history, key sectors, social development indicators, government policies specific to the Kerala.	R, U
5	Understand the need for developing critical thinking, analytical skills, and the ability to apply economic theories to real-world economic scenarios and decision-making processes.	R, U

***Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)**

KU2DSCECO108: DEMOGRAPHY

Semester	Course Type	Course Level	Course Code	Credits	Total Hours
II	DSC-Minor	100-199	KU2DSCECO108	4	60

Learning Approach (Hours/ Week)			Marks Distribution			Duration of ESE (Hours)
Lecture	Practical/ Internship	Tutorial	CE	ESE	Total	
4	0	0	30	70	100	2

Course Description: *This course provides students with a comprehensive understanding of demography's scope and significance; emphasizing its nexus with economic dynamics. It covers key demographic theories and their connection to key population measures like fertility, mortality, migration, and urbanization. Through quantitative analysis, students learn to articulate economic perspectives on demographic phenomena, with a focus on navigating diverse demographic data sources, particularly pertaining to India.*

Course Prerequisite: NIL

Course Outcomes:

CO No.	Expected Outcome	Learning Domains
1	Understand the core concepts and theories of demography.	R, U
2	Understand population data using various sources and techniques	R, U
3	Assess the impact of demographic factors on development and policy.	R, U
4	Apply demographic knowledge to the context of India and its population challenges.	R, U, A
5	Describe the necessity, objectives, and categories of population strategies.	R, U

***Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)**

Contents for Classroom Transaction:

MODULE	UNIT	DESCRIPTION	HOURS
1	FOUNDATIONS OF DEMOGRAPHY		12
	1	Meaning and Scope of Demography	2
		a) Definition, branches, and applications of demography	
	2	Components of Population Growth	3
		a) Birth rates, death rates, migration, and natural increase.	
	3	Sources of Population Data	3
		a) Population censuses, vital registration systems, sample surveys, and other sources.	
	4	Population and Development	2
		a) Interrelationships between population, economic growth, and social development.	
	5	Malthusian Theory of Population	2
		a) Population growth, resource limitations, and potential consequences.	

2	POPULATION DYNAMICS		12
	1	Fertility	2
		a) Concepts, measures (crude birth rate, total fertility rate) b) factors affecting fertility (socioeconomic, cultural, policy).	
	2	Mortality	3
		a) Concepts, measures (crude death rate, life expectancy), b) Factors affecting mortality (socioeconomic, health, environmental)	
	3	Life Tables	3
		a) Construction and interpretation of life tables	
	4	Migration	2
		a) Meaning, types (internal, international), causes and effects of migration (economic, political, social).	
	5	Everett Lee Theory	2
		a) Population aging and its implications for social and economic systems.	
3	POPULATION ISSUES AND POLICY IN INDIA		13
	1	Urbanization	3
		a) Trends, causes, and consequences of urbanization in India.	
	2	New Population Policy in India	3
		a) Objectives, strategies, and challenges of the policy.	
	3	Family Planning Strategies in India	3
		a) Government programs, methods, and their effectiveness.	
	4	Aging of Population in India	4
		a) Demographic trends, social and economic implications, and policy responses.	
	POPULATION PROJECTIONS AND FUTURE TRENDS		13
4			

	1	Methods of Population Projection	3
		a) Cohort component method, other methods, and their limitations.	
	2	Trends in the Rate of Growth of Indian Population	3
		a) Analysing past and projected trends, understanding future challenges.	
	3	Emerging Issues in Demography	3
		a) Environmental concerns, climate change, and their demographic impacts.	
	4	Demographic Research and Policy Applications	2
		a) Importance of demographic research, informing policy decisions.	
	5	Critical Thinking and Debate	2
		a) Discuss the ethical considerations and potential biases in demographic research and policy.	
5	TEACHER SPECIFIC MODULE		10
	Direction: Works based on Census Data Base		-
	<i>The module is to be designed as activity or work based preferably taking census as data base. Population dynamics may be better understood from the census data. The teacher may design works on any topics in the syllabus or outside based on the level of the course so as to make the learning experience of the course better.</i>		10

II	MDC	100 -199	KU2MDCECO103	3	45

Learning Approach (Hours/ Week)			Marks Distribution			Duration of ESE (Hours)
Lecture	Practical/ Internship	Tutorial	CE	ESE	Total	
3	0	0	25	50	75	1.5

This course is open to students from various disciplines. The course offers a comprehensive exploration of crucial issues in Indian economic development. Through engaging lectures and discussions, students will delve into fundamental concepts of economic growth and development, population dynamics, poverty, inequality, and unemployment. Emphasizing a multi-disciplinary approach, the course integrates insights from sociology, public policy, and other relevant disciplines to provide a holistic understanding of India's development challenges. By analysing real-world case studies and policy debates, students will develop critical thinking skills and gain practical insights to address complex socio-economic issues, equipping them to make informed contributions to the discourse on India's development journey.

Course Prerequisite: NIL

Course Outcomes:

At the end of the course, the student will be able to;

COs	Expected Outcomes	Learning Domains
CO 1	Grasp the concepts of economic growth and development, including the distinctions between the two, and the common characteristics of development and underdevelopment.	R, U
CO 2	Understand the interplay between population growth and economic development, examining demographic changes, theory of demographic transition, and the potential impact of population trends on India's economic trajectory.	U

CO 3	Understand the dimensions and causes of poverty, inequality, and unemployment in India, exploring economic, structural, and social factors.	R, U
CO 4	Acquire skills in proposing effective policy solutions to address challenges related to poverty in India.	A
CO 5	Compare development issues of third world countries with Indian economy.	U, An

Contents for Classroom Transaction:

MODULE	UNIT	DESCRIPTION	HOURS 45
1	BASIC CONCEPTS OF ECONOMIC DEVELOPMENT		10
	1	Economic Development	4
		a) Defining Economic Development	
		a) Growth versus Development	
		c) Development and Underdevelopment- common Characteristics	
	2	Factors in Economic Development	2
		a) Economic factors	
		b) Non-Economic factors	
	3	Human Development	4

		a) Essential components of Human Development	
		b) Measurements of human Development- HDI, GDI, GII, MPI	
	THE POPULATION GROWTH AND ECONOMIC DEVELOPMENT		12
2	1	Demographic Transitions	6
		a) Components of demographic change: fertility, mortality, and migration	
		b) Theory of demographic transition	
		c) India's Population: size and growth trends	
	2	Population and Economic Development a) Remedies for population explosion	3
	3	India's Population: The Future a) Causes of the rapid growth of population	3
	POVERTY, INEQUALITY AND UNEMPLOYMENT		15
3	1	Dimensions of Poverty	4
		a) Absolute vs. Relative poverty	
		b) Income poverty, multidimensional poverty, and poverty thresholds	
		c) Poverty Line	
	2	Causes of Poverty	2
		a) Economic factors	
		b) Structural and Social factors	
	3	Poverty Alleviation Programmes after Economic Reforms	2
	4	Inequality	3
		a) Types of inequality	
		b) Methods and indicators used to measure inequality- Lorenz curve & Gini Coefficient	
		c) Reasons for inequality	
	5	Unemployment	4

		a) Types of unemployment	
		b) Causes and Remedial Measures	
	TEACHER SPECIFIC MODULE		8
4	<i>This module may focus on engaging students in in-depth debates and discussions on key issues in Indian economic development viz "Universal Basic Income (UBI) vs. Targeted Welfare Programs: Which is More Effective in Poverty Alleviation?", "Challenges and Opportunities of India's Demographic Dividend", "Gender Disparities in Indian Economic Development: Addressing the Gender Gap" etc. This can foster critical thinking, encourage students to consider diverse perspectives, and deepen their understanding of key issues in Indian economic development.</i>		8

Course Description

This course provides an introduction to entrepreneurship and the start-up ecosystem, focusing on the fundamental concepts and practical skills necessary for launching and sustaining a new venture. Students will explore the definitions, characteristics, and classifications of entrepreneurship, distinguishing between entrepreneurs and intrapreneurs. The course examines the role of entrepreneurship in economic development, particularly in India, and the government's efforts in promoting entrepreneurial activities. It covers motivation theories and creativity techniques essential for fostering innovation within businesses. Additionally, students will learn how to develop comprehensive business plans, understanding their purpose, functions, and key elements. Through case studies, practical activities, and a business plan competition, students will gain hands-on experience and insights into real-world entrepreneurial challenges and successes.

Course Prerequisite: NIL**COURSE OUTCOMES:**

CO No.	Expected Outcome	Learning Domains
1	Analyse the impact of entrepreneurship on economic development in India.	An
2	Comprehend and apply various motivation theories, including Maslow's hierarchy of needs and Herzberg's Two-Factor theory, to entrepreneurial contexts.	U, A
3	Develop and Present Comprehensive Business Plans	C
4	Assess the role of government and specialized organizations in promoting entrepreneurial activities at both national and state levels.	E

5	Engage in practical activities such as interviews with entrepreneurs and participate in business plan competitions, demonstrating the ability to present and defend startup ideas effectively.	A, C
---	--	------

**Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)*

KU3DSCECO201: INTERMEDIATE MICROECONOMICS

Semester	Course Type	Course Level	Course Code	Credits	Total Hours
III	DSC-Major	200-299	KU3DSCECO201	4	60

Learning Approach (Hours/ Week)			Marks Distribution			Duration of ESE (Hours)
Lecture	Practical/ Internship	Tutorial	CE	ESE	Total	
4	0	0	30	70	100	2

Course Description:

This course sets a foundation for studying advanced microeconomics at the fourth year. The course enables the students to grab more grip in the microeconomic theory via getting hold of some of the theoretical developments. The course starts with the consumer behaviour analysis which would provide foundation for demand analysis under uncertainty conditions in the advanced level. Theories of production and cost are followed in the subsequent module. This is followed by analysis of competitive markets and subsequently analysis of market power with special emphasis on monopoly and monopolistic competition. In brief the course widens the theoretical understanding of an undergraduate student of economics so as to better experience learning of microeconomics at the advanced level.

Course Prerequisite: NIL**Course Outcomes:**

At the end of the course the student will be able to;

CO No.	Expected Outcome	Learning Domains
1	Apply theories for understanding the behaviour of a consumer in given market conditions	R, U, A

2	Apply theories for observing the behaviour of production and cost	U, A
3	Learn the dynamics and working of competitive markets by applying models and theories	U, A
4	Learn the dynamics of imperfect markets like monopoly and monopolistic competition by applying models and theories	U, A
5	Widen the analytical tool box of Microeconomics with applications for subsequent learning at the advance levels	A, An

***Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)**

COURSE CONTENTS

Contents for Classroom Transaction:

M O D U L E	U N I T	DESCRIPTION	HOURS
1	CONSUMER BEHAVIOUR ANALYSIS		15
	1	Consumer preferences	2
		a) Market baskets	
		b) Basic assumptions about consumer preferences: Completeness, consistency, transitivity and more is better than the less	
	2	Budget constraints - Budget line	1
		a) Effects of changes in income and prices on Budget lines	

	3	Cardinal vs. Ordinal utility - Marginal utility and consumer choice	2
	4	Indifference curve and indifference map	1
		a) Shape of indifference curves: convexity and diminishing marginal rate of substitution	
	5	Consumer choices: Utility Maximisation with indifference curves	2
	6	Price effect bifurcation for normal, inferior and Giffen good (as a special case)	5
		a) Income effect and substitution effect (Hicks and Slutsky)	
		b) Demand curve from price consumption curve	
	7	Revealed preference: with two budget lines	2
2	ANALYSIS OF PRODUCTION AND COST		15
	1	Production with one variable input (labour): the law of variable proportions	2
	2	Production with two variable inputs (labour and capital) with Isoquants	2
		a) Substitution among inputs and diminishing marginal rate of technical substitution	
	3	Return to a scale - Isoquant approach	2
	4	Empirical production function – Cobb-Douglas Production function	2
	5	Cost in the long run: user cost of capital	4
		a) Concept of Iso-cost line	
		b) Cost minimising input choice and producer's equilibrium: a given output at minimum cost, output maximization with given cost	
		c) Cost minimisation with varying output levels: the expansion path	
	6	Long run average cost and long run marginal cost	3
		a) Economies and diseconomies of scale	
3	ANALYSIS OF COMPETITIVE MARKETS		10
	1	Characterising perfectly competitive markets	1
	2	Profit maximisation by a competitive firm: TC and TR approach, MC and MR approach	2
	3	Short run profit maximisation by a competitive firm - shut down rule	1
	4	Short run supply curve of a competitive firm – the short run market supply curve	1

	5	Long run equilibrium and profit maximisation with zero economic profit	2
	6	Competitive factor market	3
		a) Demand for input, Derived demand, Marginal Productivity of Factor,	
		b) Supply of inputs	
		c) Equilibrium in a competitive factor market	
4	ANALYSIS OF MARKET POWER		10
	1	Conceptualizing Monopoly	6
		AR and MR under monopoly	
		Monopolist's output decision – Rule of thumb for pricing	
		Equilibrium of a multi-plant firm	
		Price discrimination – first degree, second degree and third-degree price discrimination	
		Monopoly power – Sources of monopoly power	
		Social cost of monopoly – Concept of Dead Weight Loss	
	2	Monopsony and Bilateral monopoly (Concepts only)	1
	3	Monopolistic competition: the makings of monopolistic competition	3
		a) Equilibrium in the short run and long run	
		b) Economic inefficiency: excess capacity	
5	Teacher Specific Module		10
	Directions: <i>Exercises from Schaum's Outlines</i>		-
	<i>This module would preferably be set as a work-based module keeping Schaum's Outlines as basic reference without overlapping contents in the Introductory Microeconomics. The content would be preferably based on the modules in the current syllabus or any other topic so as to give better foundations for advanced learning of the course in the subsequent semesters.</i>		10

4	0	0	30	70	100	2

Course Description:

This course aims to equip students with the essential mathematical and statistical tools and techniques for understanding and analysing economic phenomena. The course familiarizes with uses of mathematics and statistics in economics. The course explores the concepts of data, variables and different types of surveys. The course covers topics such as measures of central tendencies and dispersion. Moreover, the course explores the topics of sets, relations and functions.

Course Prerequisite: NIL**Course Outcomes:**

CO No.	Expected Outcome	Learning Domains
1	Describe the uses and limitations of mathematics and statistics in economics	R
2	Understand the fundamental mathematical and statistical concepts	U
3	Describe the measures of central tendency and variability	R, U
4	Apply the relevant formula for finding central tendency and variability and evaluate data.	U, A
5	Describe the functional association in mathematical form and present it in graphical form.	R, A

***Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)**

Course Description:

The course aims at providing adequate exposure to the basic concepts and the working of the financial markets nationally and globally. It highlights the organisation, structure, and role of financial markets and institutions. The course will cover basic economic theories related to banking and finance markets. Financial and banking sector reforms and monetary policy with special reference to India are also covered. The course aims to develop the learning skills of the students in a way that they can apply their knowledge not only at the academic level but also at the managerial and leadership level in the field of financial sector.

Course Prerequisite: NIL

Course Outcomes:

COs	Expected Outcome	Learning Domains
CO 1	The students will be equipped with theoretical as well as practical aspects of the structure and working of financial system.	R, U
CO 2	To understand how central banks conduct monetary policy.	U, An
CO 3	The course is expected to expand the skill set of the students for higher studies and employment in finance	R, U
CO 4	The students will be aware of the innovations and the related trends in the field of banking and finance with special reference to instruments like derivatives	R, U
CO 5	To get a real-world experience with the financial market.	R, U

***Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)**

		a) Definition and functions	
		b) Balance sheet of a commercial bank	
		c) Principles of port-folio management	
		d) Mechanism of credit creation	
	2	Development Banks	4
		a) Meaning and functions	
		b) Major development banks in India (IDBI, SIDBI, NABARD)	
	3	Non-banking Financial Institutions	3
		a) Meaning and types	
		b) Difference between banking and non-banking institutions	
	4	Recent innovations in Indian banking sector	5
		a) ATM, CDM, E-Banking, UPI, Credit card, Debit card, Smart card, Core banking, ECS, NEFT, RTGS, IMPS	

		b) An overview of banking sector reforms in India (Narasimham and Verma Committee)	
3	FINANCIAL MARKETS AND INSTRUMENTS		17
	1	Money market	5
		a) Meaning and functions	
		b) Instruments; call money, commercial bill, treasury bill, certificate of deposit, commercial paper, Inter Bank Participation Certificate (IBPC), Repo instruments	
		c) limitations of Indian money market	
	2	Capital market	5
		a) Meaning and functions	
		b) Indian capital market - Structure, instruments and problems	
	3	Stock exchanges (BSE, NSE), stock market index; SENSEX, NIFTY. Internet trading; meaning and advantages	5
		a) BSE and NSE	
		b) Stock market index SENSEX, NIFTY	
		c) Internet trading – Meaning and advantages	
	4	d) Derivative instrument - meaning and types (forwards, futures, options, swaps)	2
4	REGULATORY MECHANISM		8
	1	a) Reserve Bank of India (RBI)	4
		a) Structure, Objectives and Functions	
		b) RBI and monetary control	
	2	Securities and Exchange Board of India (SEBI)	2
		a) Meaning, Objectives and Functions	
	3	A brief account of the objectives of IRDAI and PFRDA	2
5	TEACHER SPECIFIC MODULE		10
	Direction: Case Study on Banking Institution of any category		-
	<i>Students can be assigned group exercises insisting them to visit any near-by banking institution of any category and submit a report of its functioning and performance. The allotted hours can be used for the presentation and discussion.</i>		10

Course Description:

This course equips students with essential skills to analyse theoretical frameworks, evaluate historical and cultural influences, and identify appropriate research modalities. The curriculum covers the philosophical foundations and evolution of social science research, including the challenges of positive science. Students will learn to formulate research questions and hypotheses, conduct critical literature reviews, and create well-structured research proposals. Emphasizing methodological diversity, the course ensures that students become aware of various methodologies in different social contexts.

Course Prerequisite: NIL**Course Outcomes:**

At the end of the course, the student will be able to;

Cos	Expected Outcome	Learning Domains
1	Critically analyse various theoretical frameworks in the social sciences and understand their implications for research	R, U
2	Assess how historical and cultural contexts have shaped social science research	R, U
3	The students will be able to develop clear, specific, and original research designs by formulating relevant questions and hypotheses.	A, C
4	The students should be able to conduct thorough and critical literature reviews.	R, U, A
5	The students should be able to develop well-structured research proposals, integrating the various components coherently.	A, C

***Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)**

KU3DSCECO205: ECONOMICS OF CARE AND AGEING

Semester	Course Type	Course Level	Course Code	Credits	Total Hours
III	DSC-Minor	200-299	KU3DSCECO205	4	60

Learning Approach (Hours/ Week)			Marks Distribution			Duration of ESE (Hours)
Lecture	Practical/ Internship	Tutorial	CE	ESE	Total	
4	0	0	30	70	100	2

Course Description:

The 'Economics of Care and Ageing' course offers an in-depth exploration of the economic aspects of care work and the implications of an ageing population, with a special focus on India and Kerala. It covers theoretical frameworks, demographic trends, gender dimensions, and the economic significance of both formal and informal care. The course examines Kerala's social policies, healthcare infrastructure, and long-term care services for the elderly. Additionally, it addresses the economic impact of ageing on labour markets, health expenditure, and intergenerational support systems. Through research, case studies, and fieldwork, students will gain a comprehensive understanding of the challenges and opportunities in fostering sustainable development amidst ageing demographics.

Course Prerequisite: NIL**Course Outcomes:**

CO No.	Expected Outcome	Learning Domains
1	Understand and apply economic theories related to care work and ageing to develop a comprehensive perspective.	R
2	Assess ageing trends in India and Kerala to understand their socio-economic impacts.	U
3	Evaluate the effectiveness of elderly care policies in Kerala to identify best practices and areas for improvement.	R, U
4	Analyze how ageing affects labour markets, healthcare costs, and family support to understand broader economic consequences.	U, A

5	Develop informed policy recommendations to support healthy and active ageing, ensuring sustainable development.	R, A

Course Description:

This course provides for all the undergraduate students to acquire basic knowledge about natural resources, eco system and the major environmental challenges which presently threaten our global environment. The course is designed to sensitize the learners on the need for healthy environment for sustainable development. The course also intended to create awareness that the life of human beings is an integral part of environment and to inculcate the skills required to protect environment from all sides. It covers vital aspects related to environmental degradation. Apart from classroom teaching, this course includes field work and basic life skill practices related to protect from natural disasters.

Course Prerequisite: NIL**Course Outcomes:**

At the end of the course, the student will be able to;

COs	Expected Outcome	Learning Domains
1	Understand the major environmental issues and recognize the importance of conservation of natural resources	R, U
2	Analyse the prominent cases and laws related to environmental issues	An
3	Adopt sustainable life style approach for resolution of environmental problems faced by society	A
4	Acquire and apply the necessary theoretical and practical knowledge and prepare to respond effectively during an emergency	A

***Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)**

COURSE CONTENTS**Contents for Classroom Transaction:**

M O D U L E	U N I T	DESCRIPTION	HOURS 45
1	INTRODUCTION TO ENVIRONMENTAL EDUCATION		12
	1	Importance of environmental studies- concept of Eco system- Components of eco system- functions of eco-system- Natural Resources available in the environment: renewable and non-renewable	2
	2	Relationship between human society and environment- Environmental effects of human Behaviour- Environment-Economy Interlinkages	3
	3	Bio-diversity and conservation- threats to bio-diversity- need to conserve natural resources	3
	4	Sustainable development: concept- definitions, indicators, measurements - circular economy model for a sustainable environment	4
2	SENSITIVITY ENVIRONMENTAL ISSUE, COMMUNITY PARTICIPATION AND LEGAL FRAMEWORK		14
	1	Concept of Environmental Sensitivity	1
	2	Sensitive environmental issues at the local, national and global level: Climate change, types of pollutions, depletion of natural resources, Problem of solid Waste management- causes and effects	3
	3	Control measures for various types of pollution: water conservation methods, solid waste management, 3 R's (Reduce, Reuse & Recycle) effluent charges, emission permits, Pigouvian tax, subsidies and economic incentives - Major environmental movements in India: Chipko, Appiko, Silent Valley and Narmada Bachao Andolan	5

	4	Relevance of environmental legislation- Environmental Laws: Environmental Protection Act, Air (Prevention and Control of Pollution) Act, Water (Prevention and Control of Pollution) Act, Wildlife Protection Act, Forest Conservation Act, Land Acquisition Rehabilitation and Resettlement Act - International Agreements: Montreal and Kyoto Protocols and Conservation on Biological Diversity	5
3	INTRODUCTION TO DISASTER MANAGEMENT		11
	1	Concepts of disaster management- natural and manmade disasters- Flood, Earthquake, Cyclones and Landslides - causes and effects	3
	2	Disaster vulnerability profile of India: Case studies on environment and society: Bhopal gas tragedy-Coca-Cola Factory at Plachimada- Endosulfan Tragedy- Tsunami, 2004- - Bhuj earthquake, 2001, Brahmapuram Fire 2023, Flood and Landslides in Kerala 2018 & 2019	4
	3	Phases of disaster management: pre and post disaster stage -brief description	2
	4	Disaster mitigation organizations in national and international levels- Role and services of Voluntary organisations	2
4	TEACHER SPECIFIC MODULE		
	Directions: Field Visit and Presentation of Experience		8
	<i>Visit to a local polluted site- urban/rural/agricultural/industrial or visit to an area to document environmental assets: river, forest, flora, fauna etc. and report and presentation of field visit/outreach activities to be maintained.</i>

3	0	0	25	50	75	1.5

Course Description:

This course equips social science students with essential academic writing skills, focusing on the formal writing process, literature review techniques, and research proposal development. Students explore various writing styles, including expository, descriptive, persuasive, analytical, critical/evaluative, and narrative/reflective. Practical activities and interactive sessions provide hands-on experience in drafting research papers, book reviews, textual analysis, case studies, project reports, and dissertations. The course also addresses academic publishing ethics, the peer review process, and journal submission strategies. By the end, students will have a solid foundation in academic writing and research methodology, enhancing their ability to communicate ideas effectively and contribute to social sciences.

Prerequisites: NIL**Course Outcomes:**

CO No.	Expected Outcome	Learning Domains
1	Learn the formal academic writing process, including structure, style, and citation formats.	U
2	Conduct comprehensive literature reviews and synthesize relevant research findings	A
3	Develop well-structured research proposals with clear objectives and methodologies.	A
4	Draft and revise research papers, incorporating feedback from peers and instructors.	A

5	Understand and apply ethical principles in academic publishing and peer review.	U, A

Employability for the Course: This course enhances employability by equipping students with vital academic writing and research skills. Graduates can pursue careers in academia, research institutions, policy analysis, and publishing. Mastery in writing, literature reviews, and research proposals is highly valued in roles such as research analysts, content writers, and academic editors, especially within the Indian social sciences sector.

KU4DSCECO206: INTERMEDIATE MACROECONOMICS

Semester	Course Type	Course Level	Course Code	Credits	Total Hours
IV	DSC-Major	200-299	KU4DSCECO206	4	60

Learning Approach (Hours/ Week)			Marks Distribution			Duration of ESE (Hours)
Lecture	Practical/ Internship	Tutorial	CE	ESE	Total	
4	0	0	30	70	100	2

Course Description:

This course provides an examination of macroeconomic theory and its application to policy analysis. The course begins with an exploration of the concept of money, its supply, kinds, and functions. Students will delve into the mechanisms of credit creation by commercial banks and understand the importance of money supply measures such as high-powered money and the money multiplier. Similarly, it covers classical and Keynesian approaches to supply and demand for money. An introduction to inflation and employment and the basic analysis of ISLM model is also introduced. Lastly, various theories of trade cycles and macroeconomic policies, both monetary and fiscal, are studied extensively. The course emphasizes algebraic analysis of ISLM and general equilibrium to provide students with a solid understanding of macroeconomic theory and its practical applications.

Course Prerequisite: NIL**Course Outcomes:**

CO No.	Expected Outcome	Learning Domains
1	Recall the definitions and concepts related to money supply, demand for money, unemployment, inflation, and business cycles	R
2	Understand the relationship between money supply and demand and understand the causes and consequences of unemployment, inflation, and business cycles, as well as the significance of each in macroeconomic analysis.	U
3	Apply the theories of unemployment and inflation to evaluate the impact of various policy interventions on economic outcomes and the IS-LM model to analyse the effects of fiscal and monetary policies.	A
4	Analyse the factors influencing money supply, credit creation, and liquidity preference in the economy and also analyse the determinants of aggregate supply and the Phillips Curve	An

5	Evaluate the effectiveness of policy measures in reducing unemployment or controlling inflation in different economic environments	E
---	--	---

COURSE CONTENTS

Contents for Classroom Transaction:

M O D U L E	UNI T	DESCRIPTION	HOURS 60
1	MONEY SUPPLY AND DEMAND FOR MONEY		10
	1	a) Supply of money; definition, kinds and functions of money. b) measures of money supply; high powered money and money multiplier	4
	2	Demand for money- Classical Theories of Money: Fisher's and Cambridge Versions of Quantity Theory of Money.	3
	3	Keynesian liquidity preference theory – indeterminacy of rate of interest in the liquidity preference theory – the liquidity trap.	3
2	INFLATION AND UNEMPLOYMENT		14
	1	Inflation, types of inflation, measures of inflation	2
	2	Economic Effects of inflation	1
	3	Theories of inflation- classical, Neo-classical and, Keynesian theories of inflation	3
	4	Monetarist view on inflation	1
	5	Modern theories of inflation-Demand pull and cost push inflation	1
	6	Unemployment, measurement of unemployment rate and different types of unemployment	3
	7	Okun's Law	1

	8	Inflation and the rate of unemployment – The Phillips Curve	2
3	BASIC IS-LM MODEL		14
	1	Integration of Real and Monetary sector	2
	2	Product market equilibrium – IS curve and real sector	3
	3	Money market equilibrium -LM curve and monetary sector	3
	4	General equilibrium – integration of ISLM, limitations of the basic IS-LM model.	4
	5	Factors determining the slope and shifts in ISLM curves (Algebraic analysis of ISLM and General equilibrium is required)	2
4	THEORIES OF TRADE CYCLES AND MACRO-ECONOMIC POLICIES		12
	1	Trade cycles – Meaning and definitions of trade cycles – phases of trade cycles	1
	2	Theories of trade cycles- Hawtrey's theory – Hayek's theory – Keynesian theory – Hicks' theory- Samuelson's theory.	5
	3	Macroeconomic policy- meaning and scope, objectives of macroeconomic policies	2
	4	Monetary policy measure, instruments and limitation	2
	5	Fiscal policy measures-meaning – instruments and limitation	2
5	Teacher Specific Module		10
	<i>This module would preferably be set as a work-based module keeping Schaum's Outlines of Macroeconomics as basic reference without overlapping contents in the Introductory Macroeconomics. The content would be preferably based on the modules in the current syllabus or any other topic so as to give better foundations for advanced learning of the course in the subsequent semesters.</i>		10

KU4DSCECO207: ENVIRONMENTAL ECONOMICS

Semester	Course Type	Course Level	Course Code	Credits	Total Hours
IV	DSC-Major	200-299	KU4DSCECO207	4	60

Learning Approach (Hours/ Week)			Marks Distribution			Duration of ESE (Hours)
Lecture	Practical/ Internship	Tutorial	CE	ESE	Total	
4	0	0	30	70	100	2

Course Description:

This course focuses on economic causes of environmental problems. In particular, economic principles are applied to environmental questions and their management through various economic institutions, economic incentives and other instruments and policies. Economic implications of environmental policy are also addressed as well as valuation of environmental quality, quantification of environmental damages. Selected topics on international environmental problems are also discussed.

Course Prerequisite: NIL**Course Outcomes:**

At the end of the course, the student will be able to;

Cos	Expected Outcome	Learning Domains
CO 1	Understand key theoretical and empirical concepts in environmental economics.	R, U
CO 2	Equip with a comprehensive analytical understanding of environmental policy theory, spanning from externalities to global environmental accords.	A, R
CO 3	Understand and sensitise major issues in environmental valuation and the fundamental features of environmental policy tools	U, A
CO 4	Understand the transboundary environmental problems and demonstrate their critical understanding of environmental policies	R, E U
CO 5	Gain insight into India's environmental policies, including regulation implementation and the roles of government agencies and NGOs in conservation.	E, A, U

COURSE CONTENTS

Contents for Classroom Transaction:

M O D U L E	U N I T	DESCRIPTION	HOURS 60
1	ECONOMY AND THE NATURAL ENVIRONMENT		12
	1	Why study Environmental economics?	3
		a) Inter linkages between the economy and environment	
		b) First and Second law of thermodynamics and material balance model	
	2	Micro foundations of Environmental Economics (welfare economics)	2
		a) Classification and characterization of natural resources	
	3	The relationship between economic development and environmental quality.	4
		a) Environmental Kuznets curve	
		b) Environmental adjust of national income	
	4	Components and Indicators of Sustainable Development	3
		a) Strong and weak sustainability	
		b) Sustainable development goals	
2	MODELLING ENVIRONMENTAL PROBLEMS AND SOLUTIONS		10
	1	Review of market theory and price determination in an environmental context	2
	2	Market failure of pollution using both a public goods model and externality theory	2
	3	Allocation of property right and Coase theorem	2

	4	Economic solutions to environmental problems	4
		a) Modelling a deposit refund system and pollution permit system	
		b) Modelling a deposit refund system and pollution permit system	
3	VALUATION OF ENVIRONMENTAL GOODS AND SERVICES		14
	1	Theory of environmental valuation and conceptual basis of its methods	4
		a) Compensating Variations and Surplus	
		b) Equivalent Variations and Surplus	
		c) Willingness to pay or accept for improvement or loss of environmental goods and services	
	2	Empirical approaches in environmental valuation	10
		a) Indirect Methods of environmental valuation	
		i) Revealed Preference Methods: Hedonic Pricing	
		ii) Revealed Preference Methods: Household Production Function approach	
		iii) Revealed Preference Methods: Defensive cost, health cost, and travel cost methods	
		b) Direct method of environmental valuation: Stated preference: Contingent valuation method	
4	ENVIRONMENTAL PROBLEMS AND POLICIES		14
	1	Global Environmental issues	3
		a) Economics of climate change	
		b) Climate change and food security	
	2	International summits on combating climate change	3
		a) UN climate change conference-latest	
	3	International trade and environment	4
		a) Various International Environmental Agreements b) Basic idea about Montreal and Kyoto Protocol and Talks on Climate Change	
	4	India's environmental policies	4
		a) Implementation of environmental regulations and laws in India	
		b) Role of government agencies and non-governmental organizations in environmental conservation	
5	TEACHER SPECIFIC MODULE		10
	<i>Direction: Study Tour (Maximum of 4 Days) - Integrate Environmental Economics into Classroom Practice</i>		-
	<i>Students may be directed to visit different ecologically important places in Kerala to identify the effects of govt policies on Environmental sustainability.</i>		10

	<i>The hours allocated may be used for individual / group presentations on their experience.</i>

Course Description:

This course is tailored for learners with a curiosity to grasp the workings of government finances. The course aims to familiarize students with the significance of government intervention and understanding of how fiscal policy contributes to achieving macroeconomic objectives. This course explores into the efficiency and fairness considerations of taxation across central, state, and local government domains, particularly focusing on the Indian context. Additionally, it covers the dynamics of financial relations between the central and state governments in a federal system. The course will benefit students aspiring for careers in government, policy analysis, business, and journalism.

Course Prerequisite: NIL**Course Outcomes:**

CO No.	Expected Outcome	Learning Domains
1	Gain comprehension of basic Public Finance concepts and utilize welfare economics principles to assess the effectiveness and fairness of government economic policies.	U, A
2	Analyse the significant taxes implemented in India and employ analytical abilities to evaluate the major tax reforms enacted in the country.	An, E
3	Familiarise with the theories of public expenditure and analyse trends and composition of public expenditure in India	U, An
4	Evaluate the sources of public debt, explore methods for debt redemption, and assess trends in Central Government Debt and Liabilities]	E, A
5	Analyse the budget and challenges in the financial relations between the central and state governments.	An, U

***Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)**

Course Description:

This course provides essential Excel skills tailored for economic data analysis. Students learn data import, manipulation, advanced formulas, and visualization techniques. Through practical projects on real economic issues, students gain hands-on experience and develop critical thinking skills. The course also emphasizes data ethics, ensuring students are equipped for responsible data-driven decision-making in economic contexts.

Course Prerequisite: NIL**Course Outcomes:**

At the end of the course, the student will be able to,

COs	Expected Outcome	Learning Domains
1	Confidently import, clean, and organize economic data in Excel spreadsheets.	R, U, A
2	Apply relevant formulas and functions to analyse and summarize data, drawing relevant economic conclusions.	R, U, A
3	Create various data visualizations (charts, graphs, etc.) to effectively communicate their findings to different audiences.	U, A, C
4	Gain familiarity with advanced Excel techniques for more complex data analysis tasks encountered in economic research.	R, U, A
5	Demonstrate an understanding of data ethics and responsible data-driven decision making in the economic context.	A, C

***Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)**

COURSE CONTENTS

Contents for Classroom Transaction:

M O D U L E	U N I T	DESCRIPTION	HOURS 45
1	EXCEL FOUNDATIONS AND DATA IMPORT		10
	1	a) Launching Excel, navigating the interface, basic operations.	10
		b) Importing data from different sources (CSV, text files, web), creating and managing tables. Applying data validation to ensure data accuracy and consistency.	
		c) Exploring the Ribbon and menus, customizing your Excel environment.	
		d) Learning basic file management: saving, sharing, and version control.	
		e) Practicing working with multiple worksheets and workbooks in your data analysis.	
2	DATA MANIPULATION AND FORMULAS		9
	1	a) Sorting and filtering data based on various criteria for efficient analysis.	9
		b) Mastering basic formulas and functions: sum, average, count, max, min, etc.	
		c) Using logical functions (if, and, or) for conditional calculations and data segmentation	
		d) Applying lookup functions (VLOOKUP, MATCH) to integrate data from different sources.	
		e) Exploring advanced functions like SUMIF, AVERAGEIF, COUNTIF for targeted calculations.	
3	DATA VISUALIZATION AND ANALYSIS		9
	1	a) Creating different chart types (bar, line, pie, scatter) based on your data.	9

		b) Customizing charts for visual impact: titles, labels, legends, data labels, formatting.	
		c) Data visualization and interpretation of charts.	
		d) Descriptive statistics (mean, median, standard deviation, variance): calculation and interpretation.	
	ESSENTIAL DESCRIPTIVE STATISTICS IN EXCEL		9
4	1	Measures of Central Tendency:	3
		a) In-depth exploration of mean, median, mode, and weighted averages	
		b) Calculation and interpretation of percentiles and quartiles for understanding data distribution	
	2	Measures of Variability:	3
		a) Variance and standard deviation: mastering calculations and Interpretations.	
		b) Range, inter-quartile range, and coefficient of variation for understanding data spread.	
		c) Introduction to skewness and kurtosis for assessing data symmetry	
	3	Advanced Data Analysis Functions	3
		a) Mastery of VAR.P, STDEV.P, SKEW, KURT, and other descriptive statistics functions	
		b) Correlation analysis using Pearson's correlation coefficient and scatter plots	
5	TEACHER SPECIFIC MODULE		8
	<i>Directions: Activity Based on Excel</i>		-
	<ul style="list-style-type: none"> ● Choosing an actual economic issue relevant to India (e.g., inflation, trade, poverty). ● Accessing and exploring relevant economic datasets from Indian or international sources. ● Applying your learned skills to analyze the chosen economic issue using Excel. ● Creating visualizations and descriptive statistics to support your analysis of the economic issue. ● Preparing a final project report summarizing your findings and economic insights. ● Class Presentations: Sharing your projects, receiving feedback, and engaging in discussions on real-world data analysis applications. 		8

KU4SECECO202: HOSPITAL ECONOMICS

Semester	Course Type	Course Level	Course Code	Credits	Total Hours
IV	SEC	200-299	KU4SECECO202	3	45

Learning Approach (Hours/ Week)			Marks Distribution			Duration of ESE (Hours)
Lecture	Practical/ Internship	Tutorial	CE	ESE	Total	
2	1	0	25	50	75	1.5

Course Description:

This course is designed to provide students of economics with the knowledge and skills necessary to analyse hospital performance. The course will cover a wide range of topics, including the healthcare sector, hospital economics, measurement of hospital performance, cost and financial performance. The course will also include practical sessions to help the students apply the concepts they learn.

Course Prerequisite: NIL

Course Outcomes:

At the end of the course the student will be able to;

CO No.	Expected Outcome	Learning Domains
1	Understand the importance of the healthcare sector in the economy	U
2	Analyse the outputs and inputs of hospitals	An, E
3	Analyse and interpret indicators of operational efficiency, cost and financial performance.	An, E

4	Evaluate cost analysis and analyse department wise average cost and procedure costing	An, E
---	---	-------

***Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)**

COURSE CONTENTS

Contents for Classroom Transaction:

M O D U L E	U N I T	DESCRIPTION	HOURS 45
1	SIGNIFICANCE OF THE HEALTHCARE SECTOR		12
	1	Introduction to the Healthcare Sector - Importance of healthcare sector in the economy - Uniqueness of the health care market- Physician dominance and Supplier Induced Demand	5
	2	Systems of medicine- Types of care: preventive, curative, promotive, rehabilitative, palliative – Ownership of hospitals-Layers of public and private facilities – Distribution of hospitals by ownership type in Kerala- Clinical Establishment Act – provider payment mechanisms – Public-funded insurance schemes (PMJAY, MEDISEP) – voluntary insurance	7
2	MEASUREMENT OF HOSPITAL PERFORMANCE (including practical sessions)		13
	1	Major Departments in a Hospital- Identifying Outputs and Inputs of Hospitals – Indicators of Operational Performance- Average Length of	6

		Stay (ALOS), Bed Occupancy Rate (BOR), Bed Turnover Rate (ToR), Turnover Interval (ToI),	
	2	Practical Sessions on Estimation - Pabon Lasso model for hospital performance assessment	7
	COSTING OF HOSPITAL SERVICES (including practical sessions)		12
3	1	Importance of costing in hospital management - Types of costs: fixed, variable, direct, indirect -Costing Methodology - Components of Cost - Operating and Capital Cost - Step down Costing	6
	2	Building Allocation rules - Step-by-step guide to conduct Step down costing- Activity based costing or procedure costing- Hands-on exercises to calculate Department wise Average Cost.	6
4	Teacher Specific Module Direction: PRACTICAL: UNDERTAKE A CASE STUDY IN A NEARBY HOSPITAL		8
	1	Work out the Operational Indicators- Calculate the Department wise Average Cost using either step down method or through Activity based costing.

KU4VACECO203: ECONOMICS OF CRIME AND CORRUPTION

Semester	Course Type	Course Level	Course Code	Credits	Total Hours
IV	VAC	200-299	KU4VACECO203	3	45

Learning Approach (Hours/ Week)			Marks Distribution			Duration of ESE (Hours)
Lecture	Practical/ Internship	Tutorial	CE	ESE	Total	
3	0	0	25	50	75	1.5

Course Description:

This course explores the intricate relationship between economics and crime, delving into the various dimensions of criminal activities, their economic impacts, and the policy responses aimed at mitigating crime. Students will engage with theoretical models, empirical data, and case studies to understand the economic costs associated with crime, the functioning of illegal markets, the complexities of corruption and money laundering, and the global challenges posed by white-collar and cybercrimes.

Course Prerequisite: NIL**Course Outcomes:**

At the end of the course, the student will be able to,

CO No.	Expected Outcome	Learning Domains
1	Gain a comprehensive understanding of the definitions, economic costs, and international comparisons of crime, allowing them to articulate the fundamental concepts of crime economics.	R, U
2	Acquire knowledge about the structure and functioning of illegal markets, including drug trading and the potential economic effects of drug legalization.	U, An
3	Develop the ability to apply economic models to analyze criminal behavior, including the use of opportunity costs, cost-benefit analysis, probabilities, and sensitivity analysis.	A

4	Understand the economic implications of corruption and money laundering, as well as the costs and causes of corruption from an economic perspective.	U
5	Critically evaluate anti-corruption strategies and their impact on development, as well as assess the economic burden of the criminal justice system.	E

**Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)*

KU4VACECO204: ETHICS IN ACADEMIC WRITING

Semester	Course Type	Course Level	Course Code	Credits	Total Hours
IV	VAC	200-299	KU4VACECO204	3	45

Learning Approach (Hours/ Week)			Marks Distribution			Duration of ESE (Hours)
Lecture	Practical/ Internship	Tutorial	CE	ESE	Total	
3	0	0	25	50	75	1.5 (Hours)

Course Description:

This course is open to students from various disciplines. This course explores the ethical principles underlying academic writing. It covers topics such as integrity, responsible authorship, plagiarism prevention, citation styles, copyright laws, and ethical research practices. Students will develop skills in evaluating sources, paraphrasing, quoting, and applying ethical principles to their writing.

Course Prerequisite: NIL**Course Outcomes:**

At the end of the course, the student will be able to;

CO No.	Expected Outcome	Learning Domains
CO 1	Understand the core principles of academic integrity, responsible authorship, and intellectual honesty.	R, U
CO 2	Identify different types of plagiarism and apply strategies to prevent it.	U, E
CO 3	Master proper citation styles (APA, MLA, Chicago) and reference formatting.	R, E
CO 4	Navigate copyright laws and ethically use published materials.	E, A
Co 5	Develop self-evaluation skills and strategies for preventing academic misconduct.	An, C

***Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)**
