PREFACE

Welcome to the Four-year Integrated UG Computer Science Programme of Kannur University. The Board of Studies of the University has designed this programme on the basis of the National Education Policy 2023 which critically envisions a brand-new holistic education system for the country, hinging on the effective adoption of modern teaching and training methods, application of technology, and imparting practical and contemporary skills, to shape the overall personality of students. Our programme is designed to equip students with a strong foundation in computer science principles while also providing specialized training in Artificial Intelligence and Machine Learning. In today's digital age, these technologies are at the forefront of technological advancements, driving innovation across various industries including healthcare, finance, transportation, and entertainment.

The Programme in Computer Science is designed with the objective of equipping the students to cope with the emerging trends and challenges in the field of computers and interrelated disciplines like computer engineering, computer science, information systems, information technology, and software engineering. This programme involves various courses such as Value-added courses, Skill enhancement courses, multi-disciplinary courses and ability enhancement courses with an attribution of discipline specific core, discipline specific electives and various scholastic and co scholastic domains. This programme aims at helping the students define and recharge their creative, analytical, problem-solving, and critical thinking abilities, topped by actively pursuing digital literacy.

The BSc Computer Science Honours program emphasizes a strong theoretical foundation complemented by extensive laboratory experience. Students will engage in hands-on experiments that reinforce classroom learning and develop critical technical skills. Through practical work, they will learn to design application programmes, softwares, and analyse data, thus bridging the gap between theory and practice.

For those opting for the BSc Computer Science Honours with Research track, the program offers an enriched experience with a significant focus on independent research. This track is designed for students who wish to delve deeper into specific areas of interest, culminating in a research thesis. Under the mentorship of faculty members, students will undertake original research projects, honing their ability to conduct scientific inquiries, think critically, and contribute to the body of knowledge in Computer Science. This rigorous training prepares graduates for careers in academia, research institutions, and industry.

The successful revision of this curriculum would not have been possible without the collective efforts and inputs from the BOS members, Ad hoc committee members, Computer Science academic council member, resource persons and the unwavering support of Computer Science faculty members from the affiliated colleges. Their dedication and expertise have played an instrumental role in shaping a curriculum that is relevant, up-to-date, and consistent with international scholarly criteria.

We wish you to have a motivating atmosphere to make use of your extreme potential and caliber to complete this programme and to serve the nation by enriching yourself.

BEST WISHES

(BOS, Computer Science)

INTRODUCTION

Kannur University - Four-Year Undergraduate Programme: Backdrop and Context

The implementation of the Four-Year Undergraduate Programme (FYUGP) has been driven by the pressing need to address contemporary challenges ensuring responsive changes to the evolving needs of students, industry, and society at large. Recognizing the curriculum as the cornerstone of any education system, it requires regular refinement to align with evolving socioeconomic factors. Higher education must provide students with practical and technical skills relevant to their fields of interest, necessitating the development of a job-oriented curriculum. Despite significant increases in access and expansion of higher education over the years, concerns persist regarding the quality and relevance of educational outcomes, particularly in terms of employability skills. As the world becomes increasingly interconnected, our education system must evolve to instill 21st-century skills, enabling students not only to survive but to thrive in this dynamic environment. Moreover, there is a growing need for higher education institutions to embrace social responsibility and contribute to the development of a knowledge society capable of driving sustainable development through innovation. With the central objective of fostering a robust knowledge society to support a knowledge economy, the Government of Kerala has initiated steps to reform higher education. Accordingly, three commissions were established to suggest reforms in higher education policy, legal and regulatory mechanisms, and evaluation and examination systems. It is within this context that a comprehensive reform of the undergraduate curriculum has been proposed, leading to the restructuring of the Four-Year Undergraduate Programme (FYUGP).

VISION AND MISSION OF KANNUR UNIVERSITY

Vision:

To establish a teaching, residential and affiliating University and to provide equitable and just access to quality higher education involving the generation, dissemination and a critical application of knowledge with special focus on the development of higher education in Kasargod and Kannur Revenue Districts and the Manandavady Taluk of Wayanad Revenue District.

Mission:

- To produce and disseminate new knowledge and to find novel avenues for application of such knowledge.
- To adopt critical pedagogic practices which uphold scientific temper, the uncompromised spirit of enquiry and the right to dissent.
- To uphold democratic, multicultural, secular, environmental and gender sensitive values as the foundational principles of higher education and to cater to the modern notions of equity, social justice, and merit in all educational endeavours.
- To affiliate colleges and other institutions of higher learning and to monitor academic, ethical, administrative, and infrastructural standards in such institutions.
- To build stronger community networks based on the values and principles of higher education and to ensure the region's intellectual integration with national vision and international standards.
- To associate with the local self-governing bodies and other statutory as well as nongovernmental organizations for continuing education and also for building public awareness on important social, cultural and other policy issues.

PROGRAMME OUTCOME

| PO1 | Critical Thinking and Problem-Solving-Apply critical thinking skills to analyze information and develop effective problem-solving strategies for tackling complex challenges. |
|-----|--|
| PO2 | Effective Communication and Social Interaction-Proficiently express ideas and engage in collaborative practices, fostering effective interpersonal connections. |
| PO3 | Holistic Understanding-Demonstrate a multidisciplinary approach by integrating knowledge across various domains for a comprehensive understanding of complex issues. |
| PO4 | Citizenship and Leadership-Exhibit a sense of responsibility, actively contribute to the community, and showcase leadership qualities to shape a just and inclusive society. |
| PO5 | Global Perspective-Develop a broad awareness of global issues and an understanding of diverse perspectives, preparing for active participation in a globalized world. |
| PO6 | Ethics, Integrity and Environmental Sustainability-Uphold high ethical standards in academic and professional endeavors, demonstrating integrity and ethical decision-making. Also acquire an understanding of environmental issues and sustainable practices, promoting responsibility towards ecological well-being. |

PROGRAMME SPECIFIC OUTCOMES

| PSO1: | Apply computer science knowledge to solve diverse real- world Challenges |
|-------|--|
| PSO2: | Design and implement robust software solutions using diverse programming languages and design tools |
| PSO3: | Utilize advanced techniques for data storage, retrieval, and manipulation across varied computing environments |
| PSO4: | Critically evaluate and apply information technology tools and methodologies with ethical consideration |
| PSO5: | Engage in interdisciplinary research to address complex computer science challenges |
| PSO6: | Implementation of professional engineering solutions for the betterment of society keeping the environmental context in mind, be aware of professional ethics and be able to communicate effectively. |
| PSO7: | Demonstrate lifelong learning and adapt ability in response to evolving technology trends |

STRUCTURE OF THE PROGRAMME

The Programme of instruction will consist of Lecture courses, Practical courses, comprehensive Viva-voce, Seminar, internship/ industrial visit, and Project work.

1. *Lecture courses*: Courses involving lectures relating to a field or discipline by a faculty member

2. *Tutorial courses*: Courses involving problem-solving and discussions relating to a field or discipline under the guidance of qualified personnel in a field of learning,

3. *Laboratory work*: A course requiring students to participate in a project or practical or lab activity that applies previously learned/studied principles/theory related to the chosen field of learning, work/vocation, or professional practice under the supervision of an instructor.

4. Comprehensive Viva-voce : This is an essential assessment included in the Programme to evaluate the student's grasp of the subject matter and their ability to apply their knowledge as defined in the course outcomes. It also provides an opportunity for the student to engage in academic discussions and receive valuable feedback from experts in the field.

5. *Seminar:* A course requiring students to participate in structured discussion/conversation or debate focused on assigned tasks/readings, current or historical events, or shared experiences guided or led by an expert or qualified personnel in a field of learning

6. *Internship/ Institutional visit* : All students shall undergo a Field Trip/Summer Internship/Apprenticeship in a Firm, Industry or Organization; or Training in labs with faculty and researchers or other Higher Education Institutions (HEIs) or research institutions.

Departments can actively promote internships that can eventually lead to research project work. Institutional visit Incorporating institutional or industrial visits in the Programme brings immense value to the students, making their learning journey more enriching and preparing them for successful careers in Computer science-related fields. 7. **Research Project:** These students who have opted for the honours with research should complete a research project under the guidance of the mentor and should submit a research report for evaluation. They need to successfully defend the research project to obtain 12 credits under a faculty member of the University/College. The research shall be in the Major discipline

COURSE STRUCTURE

Course and Credit Structure for Different Pathways

Course Distribution for Students in Semesters I – VI

(1) *Single Major*: The 6 courses together in B and C can be in different disciplines.

(2) *Major with Multiple Disciplines*: B and C represent two different disciplines.

(3) *Major with Minor*: B and C represent the same Minor discipline.

ASSESSMENT AND EVALUATION

- The assessment shall be a combination of Continuous Comprehensive Assessment (CCA) and an End Semester Evaluation (ESE)
- As per the regulation of Kannur University, one credit corresponds to 25 marks. Hence
 a 3-credit course must be evaluated for 75 marks and 4 credit courses for 100 marks.
 The ratio of continuous comprehensive assessment (CCA) to End semester examination
 (ESE) for theory/lecture courses is 30:70 and for the practical courses, it is 40:60.
- The 4-credit courses (Major and Minor courses) and 3 credit (Foundational Courses) are of two types:
 - (i) courses with only theory
 - (ii) courses with 3-credit theory and 1-credit practical.
- In 4-credit courses with only theory component, out of the total 5 modules of the syllabus, one teacher specific module with 20% content is designed by the faculty member teaching that course, and it is internally evaluated .
- In 4-credit courses with 3-credit theory and 1-credit practical components, out of the total 5 modules of the syllabus, 4 modules are for theory and the fifth module is for practical.
- The 3 credit courses (Foundational Courses) are of two types:
 - (i) courses with only theory
 - (ii) courses with 2-credit theory and 1-credit practical.
- In 3-credit courses with only theory component, out of the total 5 modules of the syllabus, one teacher specific module with 20% content is designed by the faculty member teaching that course, and it is internally evaluated .
- In 3-credit courses with 2-credit theory and 1-credit practical components, out of the total 5 modules of the syllabus, 4 modules are for theory and the fifth module is for practical.

• Continuous Evaluation includes assignments, seminars, periodic written examinations, or other measures as proposed in the syllabus and approved by the university.

Practical exams

- The end-semester practical examination and viva-voce, and the evaluation of practical records shall be conducted by the course in-charge and an internal examiner appointed by the Department Council. Duration of ESE may be 2 to 2.5 Hrs.
- There shall be a Continuous Evaluation of practical courses conducted by the Course- In-Charge.
- The process of continuous evaluation of practical courses shall be completed before 10 days from the commencement of the end-semester examination.
- Those who passed in continuous evaluation alone will be permitted to appear for the end semester examination and viva-voce.

INTERNSHIP

- All students should undergo Internship of 2-credits during the first six semesters in a firm, industry or organization, or training in labs with faculty and researchers of their own institution or other Higher Educational Institutions (HEIs) or research institutions.
- Internship can be for enhancing the employability of the student or for developing the research aptitude.
- Internship can involve hands-on training on a particular skill/ equipment/ software. It can be a short project on a specific problem or area. Attending seminars or workshops related to an area of learning or skill can be a component of Internship.
- A faculty member/ scientist/ instructor of the respective institution, where the student does the Internship, should be the supervisor of the Internship.

Guidelines for Internship

- Internship can be in Computer science or allied disciplines.
- There should be minimum 60 hrs. of engagement from the student in the Internship.
- Summer vacations and other holidays can be used for completing the Internship.
- In BSc. Computer science Honours program, institute/ industry visit or study tour can be part of Internship. Visit to national research institute, research laboratory and place of scientific importance should be part of the study tour. A brief report of the study tour has to be submitted with photos.

- The students should make regular and detailed entries in to a personal log book through the period of Internship. The log book will be a record of the progress of the Internship and the time spent on the work, and it will be useful in writing the final report. It may contain experimental conditions and results, ideas, mathematical expressions, rough work and calculation, computer file names etc. All entries should be dated. The Internship supervisor should periodically examine and countersign the log book.
- The log book and the report must be submitted at the end of the Internship.
- The institution at which the Internship will be carried out should be prior-approved by the Department Council of the College where the student has enrolled for the UG Honours program.

Evaluation of Internship

- The evaluation of Internship shall be done internally through continuous assessment mode by a committee internally constituted by the Department Council of the college where the student has enrolled for the UG Honours program.
- The credits and marks for the Internship will be awarded only at the end of semester 6.

| Components of Evaluation of Internship | Weightage | Marks for Internship 2 Credit/50 Marks |
|--|-----------|---|
| Continuous Comprehensive Assessment (CCA) | 30% | 15 |
| End Semester Evaluation | 70% | 35 |

The scheme of CCA and ESE is given below:

| | Evaluation Type | Marks |
|-----|----------------------|-------|
| ESE | 2 | 35 |
| a) | Acquisition of skill | 20 |
| b) | Report | 15 |
| CCA | A | 15 |
| a) | Punctuality | 5 |
| c) | Logbook | 10 |
| | Total | 75 |

The detailed distribution table with the components

PROJECT IN HONOURS PROGRAMME

- In Honours programme, the student has the option to do a Project of 12-credits in Major instead of three major Courses or Project of 8-credits in Major and one major course in semester 8.
- The Project can be done in the same institution/ any other higher educational institution (HEI) / research centre/ training centre.
- The Project in Honours programme can be a short research work or an extended internship or a skill-based training programme.
- A faculty member of the respective institution, where the student does the Project, should be the supervisor of the Project.

PROJECT IN HONOURS WITH RESEARCH PROGRAMME

- Students who secure 75% marks and above (equivalently, CGPA 7.5 and above) cumulatively in the first six semesters are eligible to get selected to Honours with Research stream in the fourth year.
- In Honours with Research programme, the student has to do a mandatory Research Project of 12-credits instead of three Core Courses in Major in semester 8.
- The number of seats for the Honors with research shall be determined as per the availability of eligible faculty.
- The selection criteria for Honors with research stream shall be in accordance with the guidelines of UGC or as approved by Kannur University.
- Students who have chosen the honours with research stream shall be mentored by a faculty with a PhD.
- The mentor shall prescribe suitable advanced-level courses for a minimum of 20 credits to be taken within the institutions along with the papers on research methodology, research ethics, and research topic-specific courses for a minimum of 12 credits which may be obtained either within the institution or from other recognized institutions, including online and blended modes.
- These students who have opted for the honours with research should complete a research project under the guidance of the mentor and should submit a research report for evaluation. They need to successfully defend the research project to obtain 12 credits under a faculty member of the University/College within the University.
- The research outcomes of their project work may be published in peer-reviewed journals or presented at conferences or seminars or patented.

Guidelines for the Project in Honours Programme and Honours with Research Programme

• Project can be in Computer science or allied disciplines.

- Project should be done individually.
- Project work can be of experimental/ theoretical/ computational in nature.
- There should be minimum 360 hrs. of engagement from the student in the Project work in Honours programme as well as in Honours with Research programme.
- There should be minimum 13 hrs./week of engagement (the hours corresponding to the three core courses in Major in semester 8) from the teacher in the guidance of the Poject(s) in Honours programme and Honours with Research programme.
- The various steps in project works are the following:
- Review
- I Investigation on a problem in systematic way.
- □ Systematic recording.
- **I** Reporting the results with interpretation in a standard documented form.
- IPresentation of the results before the examiners.
- The report must be submitted at the end of the Project. A copy of the report should be kept for reference at the department. A soft copy of the report too should be submitted, to be sent to the external examiner in advance.
- The project report shall have an undertaking from the student and a certificate from the research supervisor for originality of the work, stating that there is no plagiarism, and that the work has not been submitted for the award of any other degree/ diploma in the same institution or any other institution.

Evaluation of Project

- The evaluation of Project will be conducted at the end of the eighth semester by both internal and external modes.
- The internal evaluation of the Project work shall be done through continuous assessment mode by a committee internally constituted by the Department Council of the college where the student has enrolled for the UG Honours programme. 30% of the weightage shall be given through this mode.
- The remaining 70% shall be awarded by the external examiner appointed by the University.

| Project type | Maximum | CCA | ESE |
|------------------------------------|---------|-------|-------|
| | Marks | (30%) | (70%) |
| Research Project of 12 Credits (UG | 300 | 90 | 210 |
| Honours with research, mandatory) | | | |
| Research Project of 12 Credits (UG | 300 | 90 | 210 |
| Honours, optional) | | | |
| Research Project of 8 Credits (UG | 200 | 60 | 140 |
| Honours, optional) | | | |

The scheme of evaluation of the Project is given below:

The detailed distribution table with the components

| CCA | | | | |
|-----------|-------------------------------------|--|---|--|
| Sl. No | Components of Evaluation of Project | Marks for the Project (Honours/Honours with Research) 12 credits | Marks for the Project (Honours/Honours with Research) 8 credits | |
| 1 | Skill in doing project work | 30 | 20 | |
| | | | | |
| 2 | Internal Presentation and | 20 | 15 | |
| | Viva-Voce | | | |
| 3 | Punctuality and attendance* | 20 | 15 | |
| 4 | Organization of Project | 20 | 10 | |
| | Report | | | |
| | Total Marks | 90 | 60 | |

*Attendance certificate should be produced by the students who have done their projects in any higher educational institution (HEI)/ research centre/ training centre.

٦

| | Total Marks | 210 | 140 |

EXTERNAL EVALUATION

- Examinations will be conducted at the end of each semester. The students can write the external examinations in Computer science in both English and Malayalam languages.
- Individual questions are evaluated in marks and the total marks are converted into grades by the University based on 10-point grading system.

| Letter Grade | Grade Point (P) |
|-----------------|-----------------|
| O (Outstanding) | 10 |
| A+ (Excellent) | 9 |

| A (Very Good) | 8 |
|-------------------|---|
| B+ (Good) | 7 |
| B (Above Average) | 6 |
| C (Average) | 5 |
| P (Pass) | 4 |
| F (Fail) | 0 |
| Ab (Absent) | 0 |

- A minimum of grade point 4 (Grade P) is needed for the successful completion of a Course.
- A student who has failed in a Course can reappear for the End Semester Examination of the same Course along with the next batch without taking re-admission or choose another Course in the subsequent Semesters of the same programme to acquire the minimum credits needed for the completion of the Programme.
- There shall not be provision for improvement of CE and ESE.
- A student who has successfully completed the CE requirements in a subsequent semester can also appear for the ESE subject to the maximum duration permitted.

Computation of SGPA and CGPA

The following method is recommended to compute the Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

The SGPA is the ratio of the sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e. SGPA (Si) = Σ(Ci x Gi) / ΣCi Where Ci is the number of credits of the course and Gi is the grade point scored by the student in the course.

Example:

| Semester | Course | Credit | Letter Grade | Grade point | Credit Point (Credit x Grade) |
|----------|----------|--------|--------------|-------------|----------------------------------|
| Ι | Course 1 | 3 | А | 8 | 3 X 8 = 24 |
| Ι | Course 2 | 4 | B+ | 7 | 4 X 7 = 28 |
| Ι | Course 3 | 3 | В | 6 | 3 X 6 = 18 |
| Ι | Course 4 | 3 | 0 | 10 | 3 X 10 = 30 |
| Ι | Course 5 | 3 | С | 5 | 3 X 5 = 15 |
| Ι | Course 6 | 4 | В | 6 | 4 X 6 = 24 |
| | | 20 | | | 139 |
| | | SGPA | l | | 139/20= 6.95 |

- The Cumulative Grade Point Average (CGPA) is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a programme, i.e. CGPA = Σ(Ci x Si) / Σ Ci Where Si is the SGPA of the semester and Ci is the total number of credits in that semester.
- The SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts. Transcript (Format): Based on the above recommendations on Letter grades, grade points and SGPA and CCPA, the HEIs may issue the transcript for each semester and a consolidated transcript indicating the performance in all semesters.

Example:

| Semest | er I | Semester II | Semester III | Semester IV | Semester V | Semester VI |
|--------|------|-------------|--------------|-------------|------------|-------------|
|--------|------|-------------|--------------|-------------|------------|-------------|

| Credit: 21 | Credit: 21 | Credit: 22 | Credit: 24 | Credit: 23 | Credit: 22 | | | |
|------------|---|------------|------------|------------|------------|--|--|--|
| SGPA: 6.9 | SGPA: 7.8 | SGPA: 5.6 | SGPA: 6.0 | SGPA: 6.3 | SGPA: 8.0 | | | |
| | | | | | | | | |
| CGPA=(21 x | CGPA=(21 x 6.9 + 21 x 7.8 + 22 x 5.6 + 24 x 6.0 + 23 x 6.3 + 22 x 8.0) / 133 = 6.74 | | | | | | | |

The SGPA is the ratio of the sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e. SGPA (Si) = Σ(Ci x Gi) / ΣCi Where Ci is the number of credits of the course and Gi is the grade point scored by the student in the course.

| CGPA 9.5 and above | Overall letter Grade O |
|---------------------------------|------------------------------|
| 8.5 and above but less than 9.5 | A+ |
| 7.5 and above but less than 8.5 | А |
| 6.5 and above but less than 7.5 | B+ |
| 5.5 and above but less than 6.5 | В |
| 4.5 and above but less than 5.5 | С |
| 4.0 and above but less than 4.5 | D |
| Less than 4.0 | F |

Appearance for Continuous Evaluation (CE) and End Semester Examination (ESE) are compulsory, and no Grade shall be awarded to a candidate if the candidate is absent for CE or ESE or both.

Course Description:

Computer Fundamentals courses provide a comprehensive introduction to basic computer concepts and skills. Topics covered include hardware, software, operating systems, networking, and troubleshooting. Gain essential knowledge to navigate the digital world effectively.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|---|---------------------|
| 1 | Identify various components of Computer system. | U /R |
| 2 | Understand the importance of binary number system in data representation. | U /R |
| 3 | Illustrate binary arithmetic and number conversions. | U |
| 4 | Differentiate various types of software | |
| 5 | Understand types of programming languages and various language processors | |
| 6 | Understand the features, types and applications of internet | U |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

Course Description:

This course introduces students to the fundamental concepts of databases and their design. It covers various aspects of database management systems (DBMS), including relational database concepts, database design principles, and database management. Students will learn to design and implement databases using SQL and ER modeling techniques. The course also explores advanced topics such as database administration, security, and emerging trends in databases.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Discuss the importance of databases and their applications | U |
| 2 | Design relational databases using SQL. | U, A |

| 3 | Understand the concept of normalization techniques in database design. | U, A |
|---|---|------|
| | Identify various security, backup, and recovery strategies to manage databases effectively. | U, A |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

| 1 | MODULE 1: Introduction to Databases | | | | |
| | 1 | 1 Overview of databases and their importance | | | |
| | 2 Basic concepts: data, information, database management system (DBMS) ,data abstraction | | | | |
| | 3 Data Models: Introduction to hierarchical, network, E-R and relational data models. | | | | |
| | 4 | Examples of database applications in real life | | | |

| 2 | MO | DULE 2: Relational Database concepts | |
|---|----|---|---|
| | 1 | Understanding tables, rows, columns, and keys | 9 |
| | 2 | Introduction to SQL (Structured Query Language), components of SQL. | |

| 3 | Basic SQL queries: DML(select, insert, update, delete), DDL (create, |
|---|--|
| | alter, drop), DCL(grant, revoke) and TCL (commit and rollback) |

| 3 | MODULE 3: Database Design | | | | |
|---|---------------------------|--|---|--|--|
| | 1 | Entity-Relationship (ER) modelling | 9 | | |
| | 2 | Creating ER diagrams to represent relationships between entities | | | |
| | 3 | Converting ER diagrams to relational schemas | | | |

| 4 | MO | DULE 4: Database Management and Application | |
|---|----|--|---|
| | 1 | Database administration and security | 9 |
| | 2 | Backup and recovery strategies | |
| | 3 | Introduction to data warehousing and data mining | |
| | 4 | Recent trends in databases | |

5 Teacher Specific Module

Directions

Lab exercise: Practice 5 SQL queries by implementing 1. DDL commands 2. DML Commands

Essential Readings:

1. Database System Concepts" by Abraham Silberschatz, Henry F. Korth, and S.

Sudarshan, McGraw-Hill

 Database Management Systems" by Raghu Ramakrishnan and Johannes Gehrke 3. A Guide to the SQL Standard, C. J. Date and Hugh Darwen, 1997, Addison- Wesley

4. <u>https://www.w3schools.com/sql/</u>Suggested Readings:

- 1. An Introduction to Database Systems, C. J. Date, 8th edition.
- 2. Understanding the New SQL, Jim Melton and Alan R. Simon, Morgan Kaufmann

Assessment Rubrics:

9

| d) | Seminar | 5 |
| e) | Book/ Article Review | |
| f) | Viva-Voce | |
| g) | Field Report | |
| | Total | 75 |

Sample Questions to test Outcomes.

- 1. What is a database, and why are databases important in modern information systems?
- 2. How does a database management system (DBMS) help in managing data?
- 3. Create a SQL query to create a new table named "Students" with columns for ID, Name, and Age.
- 4. Write a SQL query to insert a new record into the "Students" table.
- 5. Explain the concept of normalization in database design. Why is it important?
- 6. Describe the importance of database security. What are some common security measures for databases?

Employability for the Course / Programme:

Completion of the "Database Concepts and Design" course equips students with fundamental skills in designing and managing relational databases using SQL. Through practical exercises and projects, students learn to analyze data requirements, optimize database design, and ensure data security and integrity. With these skills, graduates are well-prepared for roles in database administration, data analysis, and database development across diverse industries.

Essential Readings:

1. Digital Marketing for Dummies

Author: Ryan Deiss & Russ Henneberry

Published Year: 2020 (2nd Edition)

• **Relevance**: Covers foundational topics, content marketing, SEO, social media, email marketing, and analytics in a practical and beginner-friendly way.

2. Marketing 5.0: Technology for Humanity

Author: Philip Kotler, Hermawan Kartajaya & Iwan Setiawan Published Year: 2021

• **Relevance**: Explores customer behavior in the digital age and how modern technology influences marketing strategies and segmentation.

3. SEO 2023: Learn Search Engine Optimization with Smart Internet Marketing Strategies

Author: Adam Clarke

Published Year: 2023

• **Relevance**: Offers detailed insights into SEO principles, keyword research, content optimization, and Google ranking factors.

4. Email Marketing Rules: A Step-by-Step Guide to the Best Practices that Power Email Marketing Success

Author: Chad S. White

Published Year: 2017 (3rd Edition)

• **Relevance**: Dedicated to email marketing, segmentation, automation, copywriting, and measurement strategies.

5. Social Media Marketing: A Strategic Approach

Author: Melissa Barker, Donald Barker, Nicholas Bormann & Krista Neher Published Year: 2022 (3rd Edition)

• **Relevance**: Comprehensive guide on social media strategy, content creation, community building, and paid campaign management.

E-resources (websites/weblinks):

1. HubSpot Academy & Blog

- Website: <u>https://academy.hubspot.com/</u> and <u>https://blog.hubspot.com/</u>
- **Relevance to Syllabus:** HubSpot is a leading authority in inbound marketing.
 - **Module 1:** Their academy offers free courses and certifications on digital marketing fundamentals, understanding customer behavior, developing buyer personas, and setting goals. Their blog consistently publishes articles on these topics.
 - Module 2: Extensive resources on content strategy, creation, SEO, and keyword research.
 - **Module 3:** Covers social media marketing strategies and creating engaging content. While less focused on the granular details of paid advertising platforms, it provides strategic context.

• **Module 4:** Strong on email marketing strategies, list building, segmentation, and crafting compelling campaigns. They also touch upon marketing analytics.

2. Google Digital Garage & Google's Search Central (formerly Google Webmasters)

• Websites: <u>https://learndigital.withgoogle.com/digitalgarage/</u> <u>https://developers.google.com/search/</u>

and

- Relevance to Syllabus:
 - **Google Digital Garage (Module 1, 3, 4):** Offers a wide range of free courses, including a comprehensive "Fundamentals of Digital Marketing" certification (in partnership with IAB Europe) that covers the basics, search, social media, email, and analytics. It's excellent for understanding the landscape, setting goals, and getting an overview of paid advertising (especially Google Ads).
 - **Google's Search Central (Module 2):** This is the definitive source for understanding Google's SEO best practices, how crawling and indexing work, keyword research considerations from Google's perspective, and technical SEO. It's essential for 2.2 (SEO Principles) and 2.3 (Keyword Research).

3. Moz Blog & Learning Center

- Website: <u>https://moz.com/blog</u> and <u>https://moz.com/learn/seo</u>
- **Relevance to Syllabus:** Moz is a highly respected name in the SEO industry.
 - Module 1 & 4 (partially): While primarily SEO-focused, their blog often discusses broader digital marketing strategy and the importance of measurement.
 - **Module 2:** This is where Moz shines. Their blog and Learning Center are invaluable resources for everything related to SEO, including principles, keyword research, content planning for ranking, and understanding SEO tools (like their own). They cover both foundational and advanced SEO concepts.

Course Description:

This course provides a comprehensive introduction to web technologies. Students will learn the basics of the World Wide Web, HTML, CSS, and JavaScript, focusing on practical skills and real-world applications. By the end of the course, students will be able to create and design basic web pages, apply styling and layout techniques, and add interactivity using client-side scripting.

Course Prerequisite: NIL Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|---|---------------------|
| 1 | Examine the architecture and evolution of the internet and the World Wide Web. | U |
| 2 | Design well-structured HTML documents with appropriate elements and attributes. | U, C |
| 3 | Apply CSS to style text, colors, backgrounds, and layout elements effectively. | U, A |
| 4 | Apply JavaScript to implement dynamic behaviour and interactivity on web pages. | U, A |

Course Description:

This course introduces the fundamental concepts, techniques, and tools used in data science. Students will learn how to collect, clean, analyze, and visualize data using various programming languages and libraries. The course will cover topics such as data manipulation, exploratory data analysis, statistical modeling, machine learning, and data visualization.

Course Prerequisite: NIL Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Understand various data structures in in Python for data storage. | U |
| 2 | Identify various machine learning algorithms and real-world datasets for problem solving | U, A |

| 3 | Identify data characteristics and patterns through exploratory data | U |
|-------|--|------|
| | analysis (EDA). | |
| 4 | Demonstrate proficiency to collect, clean, and preprocess data using | U, A |
| | Python and relevant libraries. | |
| | | |

Course Description:

This syllabus endeavors to give an insightful understanding of fundamental nuances of this information technology ecosystem and its legal concerns. It covers the whole Information Technology Act and its amendments along with applicable rules. Apart from the statutory provisions related to cyberspace, this syllabus also gives due emphasis on the social ,intellectual property issues and legal analysis of new emerging technologies of Cyberspace.

Course Prerequisite: NIL Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Recognize the Social And Intellectual Property Issues Emerging From 'Cyberspace'. | U |
| 2 | Identify The Legal And Policy Developments In Various Countries To Regulate Cyberspace | U/A |
| 3 | Discuss on relationship Between Commerce And Cyberspace; | U/A |

KU3VACCSC102: CYBER ETHICS

Course Description:

This course explores the ethical issues arising from the use of technology and the internet. It covers fundamental ethical concepts, decision-making frameworks, and the impact of technology on privacy, security, and intellectual property. Students will examine case studies and engage in discussions to develop critical thinking skills in ethical reasoning and apply them to real-world scenarios.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Explain basic ethical principles and professional codes in cyber ethics. | U |
| 2 | Analyze privacy and security issues in the digital world. | An |
| 3 | Understand intellectual property rights and digital content usage. | U |
| 4 | Evaluate ethical challenges in social media and online behavior. | A, E |
| 5 | Assess ethical concerns in emerging technologies like AI | Е |

Course Description:

This course is an introduction to data analytics using the free and open-source software R.

The course helps to learn about the basics of exploratory and descriptive data analysis. The topics like obtaining, cleaning, combining, and wrangling the data into a more usable form. We will learn how to break up a large dataset into manageable pieces and then use a variety of quantitative and visual tools to summarize and learn about it.

Course Description:

This course introduces students to the field of ethical hacking, focusing on techniques used to secure information systems. Students will learn about different types of hackers, threats, and vulnerabilities. They will also gain hands-on experience with tools and methodologies used in ethical hacking, including information gathering, foot printing, scanning, enumeration, password cracking, privilege escalation, and system hacking. Legal and ethical aspects of ethical hacking will also be covered to ensure responsible and lawful use of hacking techniques.

Course Prerequisite: NIL Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Discuss the fundamental concepts of ethical hacking, including its principles and methodologies. | U |

| 2 | Demonstrate proficiency in using various ethical hacking tools and techniques for information gathering, scanning, and enumeration. | Α |
|---|--|---|
| 3 | Use ethical hacking principles to identify and exploit vulnerabilities in systems and networks. | A |
| 4 | Judge on legal and ethical considerations in ethical hacking practices. | E |

Course Description:

This course provides a comprehensive introduction to Intellectual Property Rights (IPR), covering the fundamental concepts, types of intellectual property, legal framework, management strategies, and emerging issues. Students will explore the origins of intellectual property, its significance in modern society, and the impact of IPR on innovation, creativity, and economic development. Through case studies and discussions, students will gain practical insights into the application of IPR in various industries and the importance of ethical considerations in intellectual property management.

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|---|---------------------|
| 1 | Discuss the concept of intellectual property, its historical development, and its role in fostering innovation and creativity. | U |
| 2 | Identify and differentiate between various types of intellectual property, including patents, copyrights, trademarks, and trade secrets. | U |
| 3 | Examine the legal framework for intellectual property rights at national and international levels, including key treaties and agreements. | An |
| 4 | Develop strategies for managing intellectual property, including IP policy development, licensing, technology transfer, and valuation. | С |
| 5 | Appraise emerging issues in intellectual property law, such as opensource software, and their implications for IP protection and enforcement. | E |

Course Description:

Information Storage and Management (ISM) is a unique course that provides a

comprehensive understanding of the various storage infrastructure components in data center environments. The course enables participants to make informed decisions on storage-related technologies in increasingly complex IT environments, which are fast changing with the adoption of software-defined infrastructure management and third platform technologies (cloud, Big Data, social, and mobile technologies).

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning |
|--------|--|----------|
| | | Domains |
| 1 | Identify storage architectures and key data center elements in classic, virtualized and cloud environments | U |
| 2 | Explain physical and logical components of a storage infrastructure including storage subsystems, RAID and intelligent storage systems | U |
| 3 | Describe storage networking technologies such as FCSAN, IPSAN, FCoE, NAS and object-based, and unified storage | U |
| 4 | Articulate business continuity solutions – backup and replications, along with archive for managing fixed content | U/A |
| 5 | Explain key characteristics, services, deployment models, and infrastructure components for a cloud computing | U |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

Course Description:

This course introduces the basics of information security, covering key concepts such as the importance of security policies, the CIA Triad, threats and vulnerabilities, and common security measures. Students will learn about cryptography, including symmetric and asymmetric key systems, and explore network security fundamentals and ethical considerations in information security. The course aims to provide a foundational understanding of information security principles and practices.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning |
|--------|------------------|---------------|
| | | Domains 91 |

| 1 | Identify the foundational concepts and principles of information security. | U |
|---|--|---|
| 2 | Understand the principles of confidentiality, integrity, and availability in information security. | U |
| 3 | Recognize different types of security threats and vulnerabilities. | U |
| 4 | Understand cryptographic techniques in securing data | U |
| 5 | Identify network security protocols and technologies to secure network communications. | U |

Course Description:

This course introduces the fundamental concepts, techniques, and tools used in data science. Students will learn how to collect, clean, analyze, and visualize data using various programming languages and libraries. The course will cover topics such as data manipulation, exploratory data analysis, statistical modeling, machine learning, and data visualization.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | O No. Expected Outcome | | | |
|--------|--|-------|--|--|
| 1 | Organize data using statistical methods to draw meaningful conclusions. | U, An | | |
| 2 | Use machine learning algorithms to real-world datasets for problem solving | U, A | | |

Course Description:

Digital forensics is a branch of forensic science encompassing the recovery, investigation, examination, and analysis of material found in digital devices, often in relation to mobile devices and computer crime.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Identify various digital forensic tools | U |
| 2 | Interpret security issues in Information Communication Technology (ICT) world. | A |
| 3 | Examine the use of digital forensic investigation in various applications /devices like Windows/Unix system, mobile, email etc | An |
| 4 | Collect and examine legal evidences and supporting investigation reports. | A |

Course Description:

Software testing helps to gain skills like automation, test case design, defect tracking, test automation etc. required to test software. Application of these skills help learners to find errors in developed software and report the results to the development team.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Recognize the theory of testing. | U |
| 2 | Develop test plans to guide the testing stage of the software development lifecycle. | A |

| 3 | Implement tests for a variety of quality intent, including code coverage, defect finding, and statistical testing. | А |
|---|--|---|
| 4 | Construct defect reports to provide transparency and understanding to supervisors, colleagues, and users. | С |

Course Description:

This course provides an introduction to the principles and practices of computer graphics. It covers fundamental concepts such as 2D and 3D graphics programming, rendering, animation, and graphical user interfaces. Students will learn about graphics systems, primitives, drawing algorithms, transformations, viewing techniques, and illumination models. Practical implementation and application of these concepts will be emphasized through programming assignments and projects.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|---|---------------------|
| 1 | Discuss the basics and history of computer graphics. | U |
| 2 | Use 2D graphics techniques like drawing and filling shapes. | А |

| 3 | Implement the knowledge to Transform 2D objects with translation, rotation, and scaling. | А |
|---|--|---|
| 4 | Develop rendered images using various shading and rendering techniques. | C |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

Course Description:

This is a lecture and laboratory course offered to introduce computer science and programming. Topics include information and data representation, hardware, programming methodology, algorithm design, abstract data types, programming languages, operating systems and basic program control structures.

Course Prerequisite: NIL Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Identify various components of Computer system and understand their functions | U |
| 2 | Demonstrate data representation in Computer system and various number codes. | U |
| 3 | Compare the performance of different types of software. | An |
| 4 | Design effective and error free programs in C using program using control structures | С |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

|---|----|---|----|
| | 1 | Decimal, Binary, Hexa-Decimal and Octal Number Systems, Conversion Between Number Systems. | 15 |
| | 2 | Binary Arithmetic and Complements: Binary addition, subtraction, multiplication and division, Complements of Binary Numbers (1's Complement and 2's Complement) | |
| | 3 | Special Codes and Unicode: Binary Coded Decimal (8421 BCD Code, Applications, BCD Addition), Gray Code, ASCII Code, Unicode | |

| 3 | MO | DULE TITLE: Introduction to Software | |
|---|----|--|----|
| | 1 | Types of Software - Application software, System Software, Operating Systems - Basics Function, examples, | 15 |
| | 2 | Software Licensing and Acquisition: Retail, OEM, Demo, Shareware, Freeware, Open-Source Software | |

| | 3 | Programming Languages: Types, Basic Concepts of Compiler, | |
|---|--------------|---|--|
| | | Assembler, Interpreter, Linker and Loader, Source code and Object | |
| | | code, Program Development Life Cycle. | |
| | | | |
| | 4 | Algorithmic Thinking: Algorithm, Flowcharts, Examples | |
| L | <u>i</u> | | |

| 4 | MO | MODULE TITLE: Introduction to Programming using C | | | | | |
|---------|----|--|----|--|--|--|--|
| | 1 | Definition and core concepts of programming, Characteristics of a good program, Representing Algorithms with Pseudocode - examples | 15 | | | | |
| stateme | | Variables and Data Types: Understanding variables and assignment statements, Overview of common data types: Integers, Floats, Strings, Basics of Input and Output Operations in programming. | | | | | |
| | 3 | Program Control Structures: Sequential execution, Conditional execution using If statements, Fundamentals of iterative execution with loops | | | | | |

| 5 | Teacher Specific Module | 15 |
|---|--|----|
| | Do the lab experience for the following and keep an assignment based on this | |
| | as record | |
| | 1. Identify various parts of computer | |
| | A) Processor | |
| | B) motherboard | |
| | C) input devices | |
| | D) Output devices | |
| | E) RAM and RAM slot | |
| | 2. Identify various secondary storage devices | |
| | A) Hard Disk | |
| | B) CD, DVD | |
| | C) Pendrive | |
| | 3. Identify various types of ports | |
| | A) USB (Universal Serial Bus) Port | |
| | B) Ethernet Port (RJ45) and RJ45 socket | |
| | C) HDMI (High-Definition Multimedia Interface) | |
| | D) serial port (rs-232) | |
| | E) parallel port F) PS/2 Ports | |
| | 4. Steps for installing any software(application packages like.) | |
| | 5. Algorithm and flow chart to implement various program control | |
| | structures. | |
| | A) Write an algorithm and flow chart to find sum and average three numbers | |
| | B) Write an algorithm and flow chart to find largest among three numbers. | |
| | C) Write an algorithm and flow chart to check whether the given number is | |
| | odd or even | |
| | D) write an algorithm and flow chart to find sum of 10 numbers using | |
| | looping statement | |

Course Description:

Office Automation program focuses on providing basic training in computers and its most common software which is to be used in Office work. With the help of this program, students will be able to become an expert in Office Automation.

Course Prerequisite: NIL

Course Outcomes:

| Expected Outcome | Learning Domains |
|---|---------------------|
| Demonstrate proficiency in using word processing software to create, edit, and format professional documents. | U |
| Apply essential spreadsheet functions and formulas to analyze and manage data. | U, A |
| Create visually appealing charts and graphs to effectively communicate data insights. | U, A, C |

| word processing and worksheet software | Understand and apply practical knowledge about | U, A, C | |
|--|--|---------|--|
| | word processing and worksheet software | 0,11,0 | |

Course Description:

This course aims to introduce the fundamental concepts of artificial intelligence (AI) to individuals from all academic backgrounds. Participants will develop a broad understanding of AI technologies, their implications, and their potential applications in various fields. The course will emphasize practical examples and real-world case studies to facilitate comprehension and inspire innovative thinking.

Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Define and explain the fundamental concepts and subfields of AI. | U |
| 2 | Identify real-world applications of AI across various industries | U/A |
| 3 | Analyze the ethical, social, and economic implications of AI. | U/A |
| 4 | Recognize the potential of AI to drive innovation and transformation | A/An |

Course Description:

The course enables to use advanced C programming language constructs and techniques to create more structured and portable code. Topics included various data storing structures like Arrays, Structure, union, Functions and File concepts Use advanced pointer concepts to allow very flexible data access and create arrays of pointers, arrays of structures and unions, and pointers to arrays of structures and unions.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Understand the concept of storing multiple datatypes using structure and union | A |

| 2 | Understand the concept of pointers and their usage in memory management | U/A |
|-------|--|------|
| 3 | Identify the usage of function and apply the functions in programming | U/A |
| 4 | Discuss the usage of file concept in programming | An |
| | Apply various data accessing and storing concepts in C language and write program code to solve real life problems. | A/An |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

| | | a) Command Line Argument | |
| | 2 | b) Variable Number of Arguments | |

| 5 | Teacher Specific Module | 5 |
|---|-------------------------|---|
| | | |

List of Sample programs:

STRUCTURE

1. Create a structure to store the name, UID, marks of five subjects of students in a class.

Display the rank list of the students.

2. Using structure, read and print data of n employees (Name, Employee Id and Salary)

UNION

 Declare a union containing 5 string variables (Name, House Name, City Name, State and Pin code) each with a length of C_SIZE (user defined constant). Then, read and display the address of a person using a variable of the union.

FUNCTIONS

- 4. Read a string (word), store it in an array and obtain its reverse by using a user defined function.
- 5. Find the sum of digits of a number using a user defined function.
- 6. Read an array and perform sorting by passing the array to a user defined function

POINTERS

- 7. Do the following using pointers
 - i) Add two numbers
 - ii) Swap two numbers using a user

defined function

- 8. Input and Print the elements of an array using pointers.
- 9. Compute sum of the elements stored in an array using pointers and user defined function.

FILES

10. Create a file and perform the following

i) Write data to the file ii) Read the data in a given file &

display the file content on console iii) Append new data

and display on console

| 11. Open a text input file and count number of characters, words and lines | |
|--|--|
| in it; and store the results in an output file. | |
| COMMAND LINE ARGUMENTS | |
| 12. Program to illustrate the use of command line arguments | |

Course Description:

This course introduces the core principles and techniques required in the design and implementation of database systems. This course focus on relational database management systems, including database design theory: E-R modeling, data definition and manipulation languages, database security and administration.

Course Prerequisite: NIL Course Outcomes:

|--|

| 1 | Understand the concept of database management system and identify its advantages over manual file keeping | U |
|---|---|---|
| 2 | Understand the need of data modelling and identify the advantages and disadvantages among the models | U |
| 3 | Able to write queries using SQL to manipulate data | A |
| 4 | Apply the knowledge of data types and other functions in data storage and retrieval | А |
| 5 | Apply skills in joining relations for better data management | С |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

Course Description:

This course introduces students to the fundamental concepts and techniques of data analytics. Introduces students to the Python programming language using an embedded programming environment. The modules explore if-statements and loops to illustrate concepts of flow-control and iteration and also some data visualization tools that helps in data analytics.

Course Prerequisite: NIL Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Under stand the term data analytics and various steps included in data analytics | U |
| 2 | Understand the features of python as a tool for data analytics | U, A |
| 3 | Design programs using various python features like operators, control structures and other python objects. | U, An |
| 4 | Design programs using built-in modules in Python | U, C |
| 5 | Apply various visualization tools in python for data analytics. | U, A |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

Course Description:

This course introduces the principles of digital systems, covering fundamental concepts of digital and analog systems and their advantages. It includes basic logic operations, number systems, Boolean algebra, and the simplification of Boolean expressions. The course also explores combinational and sequential logic circuits, such as adders, subtractors, encoders, decoders, multiplexers, flip-flops, counters, and shift registers. Emphasis is placed on practical applications and design considerations.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Differentiate between digital and analog systems and articulate the advantages of digital systems. | U |

| 2 | Demonstrate basic logic operations and convert between various number systems used in digital electronics | А |
|---|---|-------|
| 3 | Use Boolean algebra and logic gates to design and simplify digital circuits. | A |
| 4 | Design and analyze combinational circuits, including adders, | C, An |
| | subtractors, encoders, decoders, multiplexers, and demultiplexers. | |
| 5 | Comprehend the functioning of sequential circuits, including flipflops, counters, and shift registers, and apply this knowledge to real-world digital system designs. | U,A,C |

Course Description:

This course introduces the fundamentals of C++ programming with a focus on Object-Oriented Programming (OOP) concepts.

Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning |
|--------|------------------|----------|
| | | Domains |

| | 1 | Understand the principles of object-oriented programming. | U |
|--|---|--|------|
| | 2 | Learn the syntax and semantics of C++. | R/U |
| | 3 | Apply OOP concepts to solve real-world problems using C++. | U/A |
| | 4 | Develop small to medium-sized C++ programs using classes and objects | A/An |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

Course Description:

This course offers to acquire basic conceptual background necessary to design and develop simple database system, Relational database mode and to write good queries using a standard query language called SQL.

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Describe basic concepts of database system | U |
| 2 | Design a Data model and Schemas in RDBMS | U, A |
| 3 | Competent in use of SQL | U, A, C |
| 4 | Analyze functional dependencies for designing Database | U, A, C |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

Course Description:

This course serves as an introduction to machine learning, a field of artificial intelligence that focuses on developing algorithms and models that enable computers to learn from and make predictions or decisions based on data. Students will learn the fundamental concepts, techniques, and applications of machine learning, including supervised learning, unsupervised learning, and evaluation methods.

Course Prerequisite: NIL

Course Outcoms:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Discuss on principles and concepts of machine learning. | U |
| 2 | Compare different types of machine learning algorithms and models. | A |
| 3 | Examine supervised and unsupervised learning techniques. | A |
| 4 | Implement machine learning algorithms using Python. | A/An |
| 5 | Appraise machine learning model performance. | E |

Course Description:

This course provides a comprehensive introduction to Content Management Systems (CMS) and their role in managing digital content. Students will learn the fundamentals of CMS, its features, and how to implement and manage a CMS platform. The course covers the importance of CMS, types of CMS platforms, features and functionality, installation and configuration, content management best practices, and advanced CMS topics.

Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Identify the concept of Content Management System and its importance | U |
| 2 | Demonstrate proficiency in installing, configuring, and customizing WordPress for different website requirements Discuss on features and functionality of a CMS platform | U |
| 3 | Identify the steps to install, configure, and manage a CMS platform | U/A |
| 4 | Design and manage digital content using a CMS | А |

| 5 | Use CMS skills to real-world scenarios | А |
|---|--|---|
| | | |

List of Experiments

- 1. Installation of WordPress
 - Installation and setup of WordPress
 - Exploring the WordPress dashboard and interface
- 2. Adding a New Page:
 - Experiment with creating a new page in WordPress.
 - Explore different page templates and formats.
- 3. Customizing Themes:
 - Experiment with changing themes in WordPress.
 - Customize colors, fonts, and layout using built-in customization options or CSS.

4. Installing Plugins:

- Experiment with installing and activating different plugins.
- Test plugins for functionality, such as SEO optimization, contact forms, or image galleries.
- 5. Creating Custom Menus:
 - Experiment with creating custom menus in WordPress.
 - Add, remove, and rearrange menu items to see how it affects site navigation.
- 6. Adding Media:
 - Experiment with adding images, videos, and audio files to your WordPress site.

Course Description:

Computer databases typically store aggregations of data records or files that contain information, such as sales transactions, customer data, financials and product information.

Databases are used for storing, maintaining and accessing any sort of data.

They collect information on people, places or things.

Course Prerequisite: NIL Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|---|---------------------|
| 1 | Summarize and exemplify fundamental nature and characteristics of database systems | U |
| 2 | Model real word scenarios given as informal descriptions, using Entity Relationship diagrams | U |
| 3 | Implement relational model using query languages | U, A, C |
| 4 | Use normalisation techniques to design database. | U, A |
| 5 | Identify Big Data Concepts | U |

KU4DSCCSC 209 : DATA STRUCTURES

| Learning | Mar | Duration of ESE (Hours) | | | | |
|----------|--------------------------|----------------------------|----|-----|-------|---------|
| Lecture | Practical/ Internship | Tutorial | CE | ESE | Total | |
| 3 | 2 | | 35 | 65 | 100 | 1.5hrs. |

Course Description: Understanding data structures and algorithms enables to understand the problem statements on a deeper level and create logical solutions to solve them. Data structures are useful to implement the physical forms of abstract data types.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|---|---------------------|
| 1 | Discuss the complexity of algorithm. | U |
| 2 | Differentiate linear and nonlinear data structures. | U |
| 3 | Use suitable data structures for a given problem. | А |
| 4 | Design programmes using data structures. | С |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

| | Т | | |
| | | | |
| | MO | DULE TITLE: Elementary Data Organization | 15 |
| - | 1 | Data Structures | |
| | | a) Data Structure Classification | |
| | | b) Operations of Data Structures | |
| - | 2 | Linear Arrays | |
| | | a) operations | |
| | | b)Application | |
| | | c)Polynomial- Representation with arrays | |
| | | d)Polynomial addition | |
| Ï | 3 | Stack | |
| | | a) Operations | |
| | | b) Application | |
| | | c)Evaluation of post fix expression | |
| ł | 4 | Queue | |
| | | a) Operations | |
| | | b) Printer Queue as application, | |
| | | c) Circular Queue | |
| | | d)Deque | |
| | | e)Priority Queue | |

| Linked Lists: Definition, Representation of Linked List in memory, |
|---|
| Traversing Linked List, Searching a linked list, Memory Allocation and Garbage |
| Collection , Insert into a linked list, Deletion from a linked list; Header Linked Lists; |
| Two-way Lists – Operations. |

| 2 | MO | DULE TITLE: Trees | |
|---|----|--|----|
| | 1 | Binary Trees, Complete Binary trees, Extended Binary trees; Representing | 15 |
| | | Binary trees in memory, Traversing Binary trees, | |
| | 2 | Binary search trees – Searching and inserting in Binary Search Trees, Deleting in a Binary Search Tree. | |
| | 3 | Heap – Heap sort, | |
| | 4 | Huffman's Algorithm | |
| | 5 | General Trees – Computer representation of general trees | |

| | 3 | MO | MODULE TITLE: Graphs | | | | | | |
|---|---|----|---|----|--|--|--|--|--|
| | | 1 | Graph Theory terminology; Sequential Representation of Graphs – Adjacency Matrix, Path Matrix | | | | | | |
| ľ | | 2 | Operations on graph | 15 | | | | | |

| | a) traversing searching | |
|---|--|--|
| | b) inserting | |
| | c) deleting | |
| 3 | Breadth- First Search and Depth First Search | |

| 4 | MO | DULE TITLE: Design and Analysis of Algorithms | |
|---|----|---|----|
| | 1 | From Problems to Programs - Algorithms, Pseudo Language and Stepwise Refinement. | |
| | | a) Abstract Data | 15 |
| | | Type definition, Data Structures and Abstract Data Types | |
| | 2 | Measuring the Running Time of a Program | - |
| | | a) Asymptotic Notations – Big O, Omega, Theta | |
| | 3 | Search: Linear and Binary search; comparison of searching algorithms. | |
| | | Sort: Insertion, bubble, selection, quick and merge sort; Comparison of Sort algorithms | |

| Teacher Specific Module | | | | | | | |
|---|----|--|--|--|--|--|--|
| Directions | | | | | | | |
| 1. Arrays | 15 | | | | | | |
| • Program to insert, delete, search, and display elements in an array. | | | | | | | |
| • Program to find the largest and smallest element in an array. | | | | | | | |
| Program to reverse an array. | | | | | | | |
| 2. Strings | | | | | | | |
| • Program for string operations: length, copy, concatenate, compare. | | | | | | | |
| Program to check for palindrome. | | | | | | | |
| • Program to count vowels and consonants. | | | | | | | |
| 3. Linked List | | | | | | | |
| • Singly linked list: insert (beginning, end, middle), delete, display. | | | | | | | |
| 4. Stacks | | | | | | | |
| • Stack using arrays. | | | | | | | |
| • Stack using linked list. | | | | | | | |
| 5. Queues | | | | | | | |
| • Queue using arrays (linear). | | | | | | | |

| Queue using linked list. |
|--|
| 6. Recursion |
| • Factorial of a number. |
| Fibonacci series using recursion. |
| 7. Searching and Sorting |
| • Linear search. |
| • Binary search. |
| • Bubble sort. |
| • Selection sort. |
| |
| 8. Tree |
| • Binary tree creation and traversal (inorder, preorder, postorder). |
| • Binary search tree (BST) operations: insert, delete, search. |
| |

- Schaum's Outline of Theory and Problems of Data Structures SymourLipschutz Mc-Graw Hill Book Company.
- 2. Data Structures and Algorithms- Alfred V. Aho, John E. Hopcroft, Jeffrey

D.Ullman - Pearson Educatio

Suggested Readings:

- 1. Data Structures and Algorithms: Concepts, Techniques and Applications; GAV Pai, McGraw Hill, 2008.
- 2. Data Structures in C, Achuthsankar and Mahalekshmi, PHI, 2008
- 3. Fundamentals of Data structures in C++, 2nd Edn, Horowitz Sahni, Anderson, Universities Press
- 4. Classic Data structures, Samanta, Second Edition, PHI

| 4 | 0 | - | 30 | 70 | 100 | 2 Hrs |

Course Description:

An operating system is the most important software that runs on a computer. It manages the computer's memory and processes, as well as all of its software and hardware. It also allows you to communicate with the computer without knowing how to speak the computer's language.

Course Prerequisite: NIL Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Outline various concepts and features of Operating systems. | U |
| 2 | Compare various operating systems with respect to characteristics and features | U |
| 3 | Identify algorithm of CPU Scheduling, Memory Scheduling and disk scheduling. | U, A |
| 4 | Explain Linux operating system commands | U, A |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

| Teacher Specific Module | 1 |
|---|-----|
| Directions | |
| 1. Write a program to perform basic arithmetic operations (addition, | 1 |
| subtraction, multiplication, division) on two | 1 |
| numbers. | l |
| 2. Develop a function that determines if a given year is a leap year. | l |
| 3. Write a program that reverses a number and calculates the sum of its | I |
| digits. | I |
| 4. Develop a function to check if a given string is a palindrome. | l |
| 5. Perform operations like removing duplicates, finding the second- | l |
| largest element, and reversing a list without | l |
| using the reverse() method. | l |
| 6. Implement a class to calculate the area and perimeter of a rectangle | l |
| 7. Write programs to perform linear and binary search on a list of numbers. | l |
| 8. Write a program to read from and write to text files. | I |
| 9. Develop a program to perform matrix multiplication. | I |
| 10. Develop a class to simulate a bank account with methods to deposit, | l |
| withdraw, and check balance. | i - |

Course Description:

Web technology refers to the means by which computers communicate with each other using mark-up languages and multimedia packages. It gives us a way to interact with hosted information, like websites. Web technology involves the use of hypertext mark-up language (HTML) and cascading style sheets (CSS).

Course Prerequisite: NIL Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Discuss various components in web technology and WWW | U |
| 2 | Use HTML Forms and CSS Styling in designing documents. | U,A |
| 3 | Develop interactive Webpages using Javascript | U, A, C |
| 4 | Design a web document with server-side scripting using PHP | U, A, C |
| 5 | Identify the basics of AJAX | U |

| 5 | Teacher Specific Module | |
|---|--|----|
| | Directions | |
| | Sample Lab List | 15 |
| | Create a webpage with HTML describing your department. Use paragraph and list tags. Apply various colours to suitably distinguish key words. Also apply font styling like italics, underline and two other fonts to words you find appropriate. Also use header tags. Insert appropriate images. | |
| | 2. Design a webpage showing the mark list of student. | |

| 3. Design a website for your college .Include frames, links, and lists. | |
|---|--|
| 4. Design a Registration form. | |
| 5. Write a javascript code using functions to perform arithmetic operations two numbers | |
| 6. Write a javascript code to sort and reverse array elements | |
| 7. Javascript code to find the factorial of a number using recursion. | |
| 8. Javascript code to show the working of math object (Use at least 3 math functions). | |
| 9. Javascript code to display the current date and time | |
| 10. Javascript code to illustrate Dialog boxes | |
| | |

Course Description:

This course attempts to develop skills in the area of database administration. After learning this course students would be able to design, edit, manage and maintain databases, and administer them professionally.

Course Prerequisite: Nil

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|---|---------------------|
| 1 | Execute SQL queries related to Transaction Processing & Locking using concept of Concurrency control. | U /A |
| 2 | Demonstrate use of Database Object. | U |
| 3 | Identify database implementation life cycle and information system. | U |
| 4 | Use various administrative techniques in database management. | А |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

Course Description:

This course deals with the basic techniques of Compiler Construction and tools that can used to perform Syntax-directed translation of a high-level programming language into an executable code. This will provide deeper insights into the more advanced semantics aspects of programming languages, code generation, machine independent optimizations, dynamic memory allocation, types and their inferences.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Identify different phases and passes of the compiler | U |
| 2 | Examine the parser and its types | A |
| 3 | Implement the compiler using syntax-directed translation method and get knowledge about the synthesized and inherited attributes. | A |

Course Description:

This course introduces basic methods for the design and analysis of efficient algorithms emphasizing methods useful in practice. Different algorithms for a given computational task are presented and their relative merits evaluated based on performance measures. The following important computational problems will be discussed: sorting, searching, elements of dynamic programming and greedy algorithms.

Course Prerequisite: NIL Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |

Course Description:

This course provides an introduction to deep learning, a subset of machine learning that uses neural networks to model complex patterns in data. Students will learn the foundational concepts of deep learning, including neural networks, activation functions ,and optimization algorithms.

Course Prerequisite: knowledge in Basic Statistics & Mathematics **Course Outcomes:**

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Identify the basic concepts and principles of deep learning. | U |
| 2 | Compare different types of neural networks and their architectures. | A |
| 3 | Examine common activation functions and optimization algorithms used in deep learning. | A |
| 4 | Solve problems in building and training deep learning models. | A/An |

Course Description:

This course provides an introduction to the principles and techniques of digital image processing. It covers the basics of digital images, including their representation and types, as well as fundamental steps in image processing such as acquisition, enhancement, restoration, and compression. The course also explores digital image fundamentals, including visual perception, sampling, quantization, and pixel representation. Additionally, students will learn about basic mathematical tools used in image processing, such as matrix operations, arithmetic operations, logical operations, and geometric operations.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|---|---------------------|
| 1 | Distinguish between different types of images and image file formats. | U,A |

| 2 | Identify fundamental steps in digital image processing, including | U, A |
|---|---|------|
| | image acquisition, enhancement, restoration, and compression. | |
| | | |

| 3 | Discuss digital image fundamentals, including elements of visual perception, image sampling, quantization, and pixel representation. | U |
|---|---|---|
| 4 | Develop proficiency in basic mathematical tools used in image processing, such as matrix operations, arithmetic operations, logical operations, and geometric operations. | A |
| 5 | Use various image enhancement techniques, including spatial domain methods, spatial filtering, frequency domain methods, and noise reduction techniques. | A |

Course Description:

In the age of big data, data science (the knowledge of deriving meaningful outcomes from data) is an essential skill that should be equipped by software engineers. It can be used to predict useful information on new projects based on completed projects. This course provides a practitioner's approach to some of the key techniques and tools used in Big Data analytics. Knowledge of these methods will help the students to become active contributors to the field of Data Science and Big Data Analytics

Course Prerequisite: NIL

Course Outcomes:

Course Description:

The course data communication refers to the exchange of data between two or more networked or connected devices. The topics in this course include networking principles, Transmission Control Protocol/Internet Protocol, naming and addressing (Domain Name System), data encoding/decoding techniques, link layer protocols, routing protocols, transport layer services, congestion control, quality of service, network services, and Software Defined Networks.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|---|---------------------|
| 1 | Explain the basics of data communication, networking, internet and their importance | U |
| 2 | Identify the services and features of various protocol layers in data networks. | R/ U |

KU6DSCCSC307 SOFTWARE DESIGN AND IMPLEMENTATION

Student of B.Sc. Computer Science Programme shall have to work on a project of FOUR credits under the supervision of a faculty member as per the curriculum. The duration of the project is 6 month and submission of the dissertation at the end of sixth semester. Individual projects are recommended but, in an instance, where the number of supervising teachers is less, the project may be done as group. The maximum number of students in a group shall be limited to THREE.

PROJECT EVALUATION

Evaluation of the Project Work shall be done under Mark System at two stages: 1. Internal Assessment (supervising teachers will assess the project and award internal Marks) 2. External evaluation (external examiner appointed by the University) Marks secured for the project will be awarded to candidates, combining the internal and external Marks. Assessment of different components may be taken as below.

CONTINUOUS EVALUATION FOR PROJECT

| COMPONENT | WEIGHTAGE |
|---------------------------------|-----------|
| Punctuality | 20% |
| Relevance of topic System study | 20% |
| / Design of tables | |
| Project Report | 30% |
| Presentation & Viva-voce | 30% |
| Total | 100 |

END SEMESTER EVALUATION FOR PROJECT

| COMPONENT | WEIGHTAGE |
|--|-----------|
| Written Synopsis/Abstract | 12.5% |
| Content of the Project | 12.5% |
| Quality of project work/Use of software/ tools | 12.5% |
| Perfection of the work (Designs | 25% |
| of tables/ Input & Output forms) | |
| Live demo | 12.5% |
| Viva-voce | 25% |
| Total | 100% |

Course Description:

Linux system administration is a process of setting up, configuring, and managing a computer system in a Linux environment. System administration involves creating a user account, taking reports, performing backup, updating configuration files, documentation, and performing recovery actions.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Discuss basic Linux commands and the file system structure | U |
| 2 | Judge the Boot loaders and the configuration files | E |
| 3 | Demonstrate different system services and maintenance | U, A |
| 4 | Implement Shell Scripting | U, A |
| 5 | Demonstrate the steps for Linux installation and System Configuration | U, A |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

Mapping of Course Outcomes to PSOs

COURSE CONTENTS

| M O D U L E | U N I T | DESCRIPTION | HOURS | |
|----------------------------|--|---|-------|--|
| 1 | MO | DULE1: Introduction to Linux Operating system | | |
| | 1 | Linux OS: History, Features and benefits of Linux, basic concepts of multi user system ,open source, free Software concepts | 15 | |
| | 2 | Types of users in Linux, Types of files. BASICS :login, password, creating an account | | |
| | 3 Shell and commands, logout, changing password, files and directories, relative and absolute pathnames, directory tree, current working directory, referring home directory, creating new directories | | | |
| | 4 | Copying files, moving files, deleting files and directories, wild cards, hidden files, cat command | | |

| 2 | MO | DULE 2: Vi editor and shell commands | |
|---|----|--|----|
| | 1 | Vi editor: different modes-command mode, insert mode, last line mode, vi Editing commands – moving within a file, deleting, editing, Copy and Paste Commands, Saving and Closing the file | 15 |
| | 2 | redirecting input/output-filter, pipes. File permissions: user, group, ls command (long listing), changing file permission | |
| | 3 | Shell Scripting: Types of shell, Basic shell configuration for bourne and bash shell: /etc/profile, /etc/bashrc, ~/.bash_profile, ~/.bash_login, ~/.profile,~/.bashrc, ~/.bash_logout, ~/.bash_history | |
| | 4 | Bourne shell scripts, script execution, variables and parameters, Control structures - Shell if then else, Shell if then elif, Shell for loop, Shell while loop, Shell until loop, Shell case, Shell function. | |

| 3 | MO | DULE 3: Linux Boot process and services | 15 | |
|---|--|--|----|--|
| | 1 | LILO - boot process, /edc/lilo.conf file, GRUB - /etc/grub.conf file runlevels, rc files, startup scripts. | | |
| | 2 Mounting: mounting file systems, structure of /etc/fstab | | | |
| | 3 | Major services in Linux system - init, /etc/inittab file, login from terminal, syslog and its configuration file /etc/syslog.conf, periodic command execution: at and cron, crontab file | | |
| | 4 | GUI, X windows. Starting and stopping different services – service command | | |

| 4 | MO | DULE 4: System Maintenance and Linux Installation | |
|---|----|---|----|
| | 1 | System Maintenance: tmpwatch command, logrotate utility | 15 |
| | 2 | Backup and Restore: types of backup - full, differential, incremental, cp, tar commands | |
| | 3 | Linux Installation: Partitioning, MBR, SWAP | |
| | 4 | File system mount points, rpm utility - installation of packages. | |

| 5 | Teacher Specific Module | |
|---|---|----|
| | Directions | |
| | | 15 |
| | <i>Teacher can adopt proper methodologies and evaluation methods related to the topics.</i> | |

Course Description:

This course gives students an insight into the basics of cloud computing along with virtualization, cloud computing is one of the fastest growing domain from a while now. It will provide the students basic understanding about cloud and virtualization along with it how one can migrate over it.

Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Identify the basics of cloud computing | U |
| 2 | Discuss the main concepts and key technologies of cloud computing. | U/A |
| 3 | Examine the concept of virtualization in the cloud computing | U/A |
| 4 | Select the technologies for implementation and use of cloud | E |
| 5 | Relate the evolution of cloud from the existing technologies. | An |

Course Description:

This course introduces students to the principles and practices of data processing using Python, a powerful and widely-used programming language in data science and analytics. The course focuses on data acquisition, cleaning, transformation, and analysis using key Python libraries such as Pandas, NumPy, and Matplotlib, along with tools for handling various data formats including CSV, JSON, and Excel.

Course Prerequisite: Basic knowledge in Python programming

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|---|---------------------|
| 1 | Apply Python syntax and semantics to write well-structured and efficient programs. | А |
| 2 | Utilize functions with arguments to modularize code and improve reusability | U/E |
| 3 | Apply core data structures to organize and manipulate data in Python programs. | А |
| 4 | Apply techniques to read data from and write data to files using Python. | Α |
| 5 | Interact with the operating system using Python libraries to automate file management and system commands | U/E |

Course Description:

This course introduces students to the concepts, tools, and techniques used in the Big Data ecosystem, enabling them to handle, process, and analyze massive volumes of structured and unstructured data. It covers the architecture, frameworks, and platforms that power big data applications, with a focus on distributed computing, scalable storage, and real-time data processing.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|---|---------------------|
| 1 | Summarise map reduce concepts | U/E |
| 2 | Implement data processing in Hadoop and apply Hive to YARN administration | Α |
| 3 | Develop cluster management system using Apache Ambari | Α |
| 4 | Redesign HDFS, NoSQL and Apache Spark | Α |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

| 4 | - | - | 30 | 70 | 100 | 2hrs. |

Course Description:

This course provides an in-depth introduction to Soft Computing, a consortium of methodologies that aim to exploit the tolerance for imprecision, uncertainty, partial truth, and approximation to achieve robust and low-cost solutions. It focuses on techniques that mimic human reasoning and learning, such as Fuzzy Logic, Neural Networks, Genetic Algorithms, and Hybrid Systems.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|--|---------------------|
| 1 | Defines the basic concepts of soft computing | U/E |
| 2 | Discuss about neural networks and its various applications | U |
| 3 | Analyse the use of fuzzy logic in various contexts | An |
| 4 | Illustrate the use Genetic Algorithms | А |
| 5 | Illustrate the use of neural networks and hybrid systems | Α |

Course Description:

This course provides a comprehensive introduction to Natural Language Processing (NLP), the field of computer science and artificial intelligence concerned with enabling machines to understand, interpret, and generate human language. Students will explore both foundational concepts and modern techniques used in NLP, including text preprocessing, part-of-speech tagging, and language modelling.

Course Prerequisite: NIL

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|---|---------------------|
| 1 | Define the phases of traditional NLP as well as various NLP tasks | U/E |
| 2 | Apply Hidden Markov Models, and Naive Bayes models for various NLP tasks | А |
| 3 | Apply word embedding techniques and N-gram language models for Named Entity Recognition | An |
| 4 | Apply deep learning models like LSTM, GRU for sequence modeling, and CNN for coreference resolution | А |

Course Description:

The course familiarize students with the fundamentals of research ,to make appropriate grammatical and lexical choices while writing research articles and organize information effectively, and integrate theoretical research knowledge with practical skills that will help students to undertake research.

Course Prerequisite: Nil

Course Outcomes:

| CO No. | Expected Outcome | Learning Domains |
|--------|---|---------------------|
| 1 | Develop and write a complete research paper (including an abstract, citations, references etc.) | А |
| 2 | Understand how to find, evaluate, and use data for research | U |
| 3 | Analyse and evaluate research reviews to produce quality research papers. | A /E |

*Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

COURSE CONTENTS

Contents for Classroom Transaction:

| M O D U L E | U NI T | NI DESCRIPTION | | | | |
|----------------------------|--------------|--|----|--|--|--|
| | MOD | ULE TITLE: TYPES OF RESEARCH | | | | |
| | 1 | Role & purposes of Research Designs, Defining and differentiating research | | | | |
| 1 | 2 | Descriptive Research, Analytical Research, Applied Research | 12 | | | |
| | 3 | Fundamental Research, Quantitative Research, Qualitative Research | | | | |
| | 4 | Conceptual Research, and Empirical Research | | | | |
| | MOD | ULE TITLE: SOURCES OF INFORMATION | | | | |
| | 1 | Finding/Gathering information for research | | | | |
| 2 | 2 | Using information, Using research tools | 12 | | | |
| | 3 | Using Library and electronic databases | | | | |

| | MOL | DULE TITLE: WRITING RESEARCH LITERATURE REVIEW | |
|---|-----|--|----|
| | 1 | Need for a literature review, Strategies for writing literature review | |
| 3 | 2 | Reviewing skills, Literature search and evaluation | 12 |
| | 3 | Method of conducting a literature review, Organizing the literature review | |

| | : | DULE TITLE: CITING SOURCES/REFERENCES AND NTAINING ACADEMIC HONESTY | |
|---|---|--|----|
| 4 | 1 | Referencing and in-text citations, Styles of referencing, Paraphrasing and summarizing, Citing sources, Developing academic honesty | 10 |
| | 2 | Ethical issues in collecting data - Ethics, stakeholders in research, ethical issues concerning participants, | 12 |
| | 3 | Seeking consent, providing incentives, confidentiality, bias | |
| | 4 | Incorrect reporting, issues with sponsoring organization | |

| 5 | Teacher Specific Module | |
|---|-------------------------|--|
| | | |

| Discussion on various research issues Analyse papers related with the discussed issues Practice to write survey papers and literature reviews | 12 |
|---|----|
| | |

Detailed Syllabus:

| Module | Unit | Content | Hrs |
|--------|------|------------------------------------|--------|
| I | | Introduction to Prompt Engineering | 15 hrs |

| 1 | Prompt Engineering- Definition, Importance of Prompt Engineering, Role of Prompt Engineers, Application domains- Education, Engineering, Entertainment |
|---|--|
| 2 | Principles of Prompt Engineering- Understanding User Prompts- Types of Prompts- Information Prompts, Confirmation Prompts, Suggestion Prompts, Social Influence Prompts. Factors influencing prompt effectiveness- clarity, timing, relevance, language and tone, personalization. |
| 3 | Foundation of Language Models- Definition, tasks- Text generation, Translation, Question Answering, Summarization, Natural Language Inference, other capabilities- chatbots, virtual assistants, Examples of Language Models- Gemini, BERT, GPT based Models, GPT-3, GPT4, LaMDA, PaLM, Parti. |
| 4 | Processing text in Language Models- Tokenization, Generation of text in Language Models- Beam Search |

| Π | | Crafting Prompts | | | |
|---|---|---|--|--|--|
| | 1 | Types of Prompts. Visual Prompts, Auditory Prompts, Tactile Prompts, Open ended Prompts, closed ended prompts, Instructional prompts, Contextual prompts. | | | |
| | 2 | Factors influencing Model responses- Context, Length, Structure, Complexity, Fine tuning. Conciseness and specificity in prompt design | | | |

| 3 | Query Formulation Techniques, importance of context in prompt formulation, Techniques for crafting clear and effective instructions, tailoring prompts to specific tasks or domains |
|---|--|
| 4 | Structuring Prompts for Unambiguous understanding- Clear Communication, Contextual Cues- images, code. Best practices to be followed for designing user prompts — designing effective prompt systems - understanding user perspective, clear and concise prompts, providing context, considering user input, feedback and validation, iterative design process. Strategies for iteratively improving prompts based on feedback and performance analysis, Feedback Mechanism-Quantitative analysis, qualitative analysis, iterative prompt design, A/B testing, |
| 5 | Approaches for adjusting prompt language, structure and complexity, Fine tuning, techniques used – Supervised learning, Reinforcement learning |

| | 6 | Prompt generation Tools- Prompt Studio, Prompt Bard, Prompt Insight, Prompt evaluation tools- Prompt Evaluator, Prompt Ranker, Prompt Tuning | | | |
|----|---|--|----|--|--|
| ш | | Prompt Engineering Strategies and Applications | 15 | | |
| | 1 | Pillars of Prompting- Providing Examples, Giving Direction, Formatting Responses, Evaluating Quality, Chaining AIs | | | |
| | 2 Debiasing techniques, Context Manipulation, Controlled Generation, Iterative Prompting | | | | |
| | 3 Prompt strategies for tasks – summarization, translation, Q & A, creative writing, other tasks | | | | |
| | 4 Role of Prompt Engineering in various applications- Search and Recommendation, Natural Language Processing, Creative AI, AT Safety. Examples of applications using prompt engineering- Google AI, Microsoft AI, Salesforce AI, Open AI | | | | |
| IV | | Prompt Engineering Technologies & Ethical issues | 15 | | |
| | 1 | Machine Learning Models for personalized prompts- Rule based Models, Collaborative filtering Models, Content based Models, Hybrid Models | | | |
| | 2 Emerging Technologies in Prompting- Natural Language Processing, Machine Learning, Augmented Reality, Virtual Reality, Sustainable Prompting Strategies- Energy efficient hardware, optimizing prompt frequency and timing | | | | |

| | 3 | Ethical considerations in Prompt Engineering- Privacy and Consent, Manipulative prompting practices, Ensuring Prompt conformity to Ethical standards | | | |
|---|--|--|--|--|--|
| | 4 Handling Constraints, Addressing Biases in prompts and response, Interpreting Model Output, tools used for auditing bias and fairness example- Google Text to Text Transfer Model, Metrics for assessing quality and effectiveness of prompts | | | | |
| V | Teacher specific Module | | | | |
| | 1 Advanced Techniques-Meta Prompting, Multimodal prompt engineering, prompt embedding, conditional generation. | | | | |
| | | | | | |

Lab Exercises

- Familiarization of any one Language Model /application /GPT
- Select a prompt generation tool or framework (e.g., GPT-3, Prompt Studio).
- Create effective prompts for generation of text, creative writing, content generation, resume writing., poetry, fiction, non fiction or any other genre
- Design prompts for different scenarios (e.g., recommendation prompts for an ecommerce website, feedback prompts for a survey).
- Evaluate the generated prompts based on clarity, relevance, and user engagement.
- Discuss strategies for improving prompt effectiveness and iterate on the design process
- Compare various prompt generation tools (e.g., GPT-3, OpenAI Codex, DialoGPT).
- Case Studies in Prompt Engineering- Successful prompting campaigns, Failures in Prompt Engineering
- Case Studies demonstrating effective prompt engineering strategies

| | | 3. Single-Layer Perceptron Implementation . Implement a single-layer | | | |
| | | perceptron in a | | | |
| | | programming language of choice (Python | | | |
| | | recommended). | | | |
| | | . Train the perceptron on a binary classification task using a simple dataset. | | | |
| | | . Visualize the decision boundary and | | | |
| | | analyze the perceptron's performance. 1. Multi-Layer Perceptron (MLP) | | | |
| | | Demonstration: | | | |
| | | . Develop a multi-layer perceptron (MLP) | | | |
| | | . Train the MLP on a | | | |
| | | dataset such as MNIST | | | |

| 1 | Applications of Artificial Neural Networks: Pattern Recognition, Medicine, Speech Production, Speech Recognition, Business. | | |
|---|--|--------|--|
| 2 | Deep Neural Networks (Basic Concepts only) | | |
| | for handwritten digit classification. . Experiment with different architectures, a tion functions, and optimization algorithms to optimize performance. 2. Implement Self organizing maps. 3. Implement applications using Neural Network. | activa | |
