PROGRAMME REGULATION

The Regulation of MBA (CBCSS) of Department of Management Studies, Kannur University.

1. Title of the Programme

This Degree shall be called **MASTER OF BUSINESS ADMINISTRATION (MBA)**.

2. Duration of the Programme

The duration of MBA Programme shall be a minimum of two years consisting of four semesters.

3. Admission Eligibility

A pass in any bachelor's degree examination (10+2+3 pattern) of Kannur University or any other Indian or Foreign University duly recognized by the Kannur University as equivalent thereto. Candidates to be eligible to apply for admission to the programme are required to have scored not less than 50 % marks in aggregate or letter grade B under the grading system in the qualifying examination. However, candidates belonging to the other backward communities are eligible for a concession of 5 percent marks (or equivalent grade) in the qualifying examination. Those belonging to scheduled caste/ scheduled tribes having secured a pass (or equivalent grade) in the degree examination are eligible to apply for admission to the programme.

4. Admission Procedure

Admission to MBA Degree programme of the Department is based on the score obtained in CMAT/CAT/KMAT, Group Discussion, and Personal Interview in the ratio 80:10:10. Based on the performance on the Entrance Test, Group Discussion and Interview, the RankList for MBA admission will be prepared. While preparing the rank list, if there is same index marks for more than one candidate, he/she will be ranked on the basis of marks obtained in the entrance exam. Even after this, if there is a tie; they will be ranked on the basis of date of birth that is the elder person is to be ranked higher.

Reservation rules approved by Kannur University from time to time shall be followed strictly in the admission to the Programme.

5. MBA Programme Focus

5.1 Graduate Attributes (GAs):

At the end of the MBA programme the learner shall exhibit:

1. Proficiency in Communication, Collaboration, Teamwork and Leadership
2. Research Aptitude, Scholarship & Enquiry
3. Proficiency in ICT, Digital Literacy and Life-Long Learning Orientation
4. Entrepreneurship & Intrapreneurship Orientation
5. Professionalism, Ethical, Values Oriented & Socially Responsible behaviour

5.2 Programme Objectives (POs):

The MBA course of the department is designed with the following objectives

1. Develop and improve the awareness and knowledge about functioning of local and global business environment and society.
2. Competencies in quantitative and qualitative techniques.
3. Developing responsiveness to contextual social issues problems and exploring solutions, understanding business ethics and resolving ethical dilemmas.
4. Usage of various forms of business communication, supported by effective use of appropriate technology, logical reasoning, articulation of ideas.
5. Understanding leadership roles at various levels of the organization and leading teams.

6. Programme Structure

6.1 Duration: The MBA Programme shall be completed within a period of minimum of four and maximum of eight consecutive semesters. If a student does not pass a course within the regular schedule, he/she shall re-appear for the course examination along with the subsequent batch. Each semester shall consist of 15 instructional weeks of five days each of six hours per day. Every semester will be adjusted to have at least 90 working days including end semester examinations.

6.2 Credits: One credit of the course is defined as one hour lecture per week for 15 weeks in a Semester. The total minimum credits required to complete MBA programme is 106. The details of number of courses (core and elective), total credits in different semesters are as follows.

Semester	Total Credits
I	28
II	28
III	27
IV	23
Total	106

6.3. Scheme of the Programme:

Courses: The MBA Programme shall include three types of Courses, namely, Core Courses, Elective Courses and Ability Enhancement Courses. The Department shall offer the Core Courses and appropriate Elective and Ability Enhancement Courses for the programme as decided by the Department Council.

- (a) *Core Courses:* The Core Courses are compulsory for all students and cannot be substituted by any other course, these courses will be offered by the department.
- (b) *Elective Courses:* Elective course is an optional course to be selected by a student out of such courses offered by the department or any other department like Multi Disciplinary Courses (MDC) or Inter Disciplinary Course (IDC) or MOOC approved by the Department Council.
- (c) *Ability Enhancement Courses:* Ability Enhancement (AE) Courses may be of two kinds: Ability Enhancement Compulsory Courses (AECC) and Skill Enhancement Courses (SEC). AEC are the courses based upon the content that leads to Knowledge enhancement. SEC are value-based and/or skill-based and are aimed at providing hands-on-training, competencies, skills, etc

All courses offered for the next semester will be announced within 10 days of the end of the previous semester, depending upon the availability of faculty and the demand for the courses. The student within a maximum of 10 working days after the commencement of the classes can change the elective course with the consent of Head of the Department.

MOOC Courses: The Department Council shall publish the list of approved MOOC courses from SWAYAM or similar platforms for each semester. Students will be permitted to opt any of these courses for Elective. Such students will have to intimate and obtain permission from the Head of the Department within stipulated time at the beginning of the semester regarding the MOOC course which has to be considered towards the Elective Course. The certificate and mark-list with marks/ grade obtained in the MOOC course should be submitted to the department before the commencement of University examinations so that credit transfer and inclusion in semester mark-list can be done smoothly by the university.

Semester I: The first semester shall have 7 full courses each of 4 credits.

Semester II: The second semester shall have 6 full courses each of 4 credits and two AEC/ SEC/ MDC courses each of 2 credits.

Semester III: The third semester will have 4 courses of 4 credits each, 3 elective courses of 3 credits each and an Organization/Industry centered study having 2 credits. Out of the 4 courses of 4 credit one is a multi-disciplinary course of 4 credits. The student can select the MDC from the list of courses approved by the Department Council at the beginning of the semester. These courses shall be from other departments or approved MOOC like SWAYAM. The Department Council will decide on the list of such courses to be offered during the semester and the students have to get approval from the Department Council at the beginning of the semester. The students shall select three electives from the list of electives

offered by the Department Council at the beginning of the semester.

During the third semester every student should submit and will be evaluated for an Organizational Study (OS) of one-month duration in a nationally or internationally reputed organization. The objective of OS is to provide an exposure to the students to the real life business situations. This study is not intended to be a problem centered study, but a study expected to understand all the activities performed by the organization. The organizations selected for this purpose should have more than one functional department like production/operations, marketing, finance, human resources, information systems etc. For this study, the student should have a mentor from the organization for guidance. This study will be treated as course carrying 2 credits. The students should prepare a brief organizational study report about the organization and submit it on or before the date fixed by the department council.

Semester IV: Fourth semester will have 2 core courses having 4 credits each and 3 elective courses having 3 credits each. The students shall select three elective courses from the list of elective courses offered by the Department Council at the beginning of the semester. In addition, the students are required to do their Project Work, which will be problem centered based on a management/business related domain. The Project work shall be carried out under the supervision of a faculty in the department for a period not less than 45 days. The report of problem centered project work is to be submitted on or before the date fixed by the Department Council. This Project work will be treated as core course carrying six credits.

Overall a student should earn minimum of 8 credits from the courses offered by other departments or approved MOOC.

In addition to the courses specified as part of the programme above, all students should complete a Value-Added Course (VAD) or MOOC of at least 2 credits to complete the requirements of getting the degree. Credits earned from these Value Added Course or MOOC will be over and above the minimum credits required for the completion of the programme. Value Added Courses will be offered by the departments and the student can opt for them and the MOOC selected by the students should be relevant to the discipline and approved by the Department in which the student is enrolled. The student should submit the pass certificate of the Values Added Course/ MOOC before completing the fourth semester examination to the Controller of Examination through the Head of the Department. The marks/grades secured for Value Added Courses/ MOOC will not be considered for the computation of CGPA. However, the name of such courses, the credits earned, and the marks grades secured will be shown in the consolidated grade card.

6.4. Specialization: During the MBA Programme, each student shall opt for three

elective courses in third semester and three elective courses in the fourth semester from the list of electives offered during the semester. The list of elective courses shall be decided by the Department Council at the beginning of the respective semester depending upon the availability of faculty and the demand for the courses.

7. Attendance: The minimum attendance required for the Course shall be 60% of the total number of classes conducted for that semester. Those who secure the minimum attendance in a semester alone will be allowed to register for the End Semester Examination. Condonation of attendance to a maximum of 10 days in a Semester subject to a maximum of two spells within the programme will be granted by the Vice-Chancellor. Benefit of Condonation of attendance will be granted to the students on health grounds, for participating in University Union activities, meetings of the University Bodies and participation in extra-curricular activities on production of genuine supporting documents with the recommendation of the Head of the Department concerned. A student who is not eligible for Condonation shall repeat the Course along with the subsequent batch.

8. Evaluation:

Evaluation of a student shall be conducted through Continuous Assessment (CA) and an End Semester Examination (ESE). Evaluation for all theory courses will be conducted both externally and internally. The performance of a student in each course is evaluated in terms of percentage of marks with a provision for conversion to grade points. For all theory, the internal evaluation and external evaluation will be in the ratio 40:60 (40 marks for CA and 60 marks for ESE for a course with 100 marks).

Continuous Assessment (CA) shall be based on a predetermined transparent system involving periodic written tests, assignments, seminars and any component decided by the teacher depending on the course. The percentage of marks assigned to various components for internal evaluation may be as follows:

Sl.No.	Component	Internal marks
1.	Two test papers	16
2.	Seminars/Presentation of case study/ Minor Projects/ any other relevant method	16
3.	Assignments/Book review/G.D	8
	Total	40

In the case of Organization Study to be conducted during third semester, the evaluation will be conducted by external examiners. The ESE will consist of double evaluation of report (50%) and Viva Voce (50%) to be conducted by two external examiners.

In the case of Project Work to be conducted in fourth semester, the evaluation will consist of both CA(40%) by the faculty guide and ESE(60%). The ESE for this Project Work will be evaluated by two external examiners and will consist double evaluation of report (50%) and Viva Voce (50%).

MBA - DETAILED SYLLABUS (2023 Admission)

SEMESTER I

MBMBA01DSC01: PRINCIPLES AND PRACTICES OF MANAGEMENT

Credits: 4

Course Objectives:

This course enables the students to develop the essential knowledge of the fundamental management concepts, tools and techniques that aid in problem solving and decision making. It helps to develop the managerial skills required to create a productive work environment.

Course Learning Outcomes:

1. Describe the management principles and identify the key competencies needed to be an effective manager.
2. Explain how the managerial tasks of planning, organizing, staffing, directing and controlling can be executed in a variety of circumstances.
3. Illustrate the importance of planning and prepare a course of action for achieving the objectives.
4. Develop an ability to focus on organizational structure and on the allocation of human resources.
5. Appraise the sources of influence to inspire the actions of other organizational members and evaluate the best control methods.

Course Contents:

Module I

Introduction to Management: Management Concepts - Management versus Administration - Functions of management - Management Roles - Management Skills - Levels of Management - Management as an Art, Science and Profession - Evolution of Management - Classical Approach - Behavioral Approach - Quantitative Approach - Contemporary Approach.

Module II

Planning: Nature and Principles of Planning - Types of Plans - Planning Process - Concept of Planning Premises - Management by Objectives - Decision making - Types of decisions and decision making conditions - Decision making Process - Techniques of Decision making.

Module III

Organizing and Staffing: Nature and Principles of Organizing - Organization Structure - Factors affecting Organization Structure - Types of Organization Structure - Formal and Informal Organization - Span of Control - Delegation - Elements of Delegation - Centralization and Decentralization - Departmentation - Meaning of Staffing - Importance of the staffing function - Manpower Planning - Job Analysis - Recruitment - Sources of recruitment - Selection - Placement and Orientation - Training and Development - Performance appraisal - Promotion and Transfer.

Module IV

Directing and Controlling: Nature and elements of Directing - Importance of Motivation - Theories of Motivation - Early theories of Motivation - Maslow's Hierarchy of Needs Theory - McGregor's Theory X and Theory Y - Herzberg's Two-Factor Theory - Contemporary Theories of Motivation - Goal-Setting Theory - Reinforcement Theory - Equity Theory - Leadership Qualities and Styles - Purpose of Communication - Methods of Communication - Barriers to Communication - Nature of Control - Control Process - Control Techniques.

Suggested Readings:

1. Drucker, P. F. The Essential Drucker: The Best of Sixty Years of Peter Drucker's Essential Writings on Management. New York: Harper Business.
2. DuBrin, A.J. Management Essentials. New Delhi: Cengage Learning India Private Limited.
3. Griffin, R.W. Management Principles and Practices. New Delhi: Cengage Learning India Private Limited.
4. Koontz, H., & Weihrich, H. Essentials of Management: An International, Innovation and Leadership Perspective. New Delhi: McGraw-Hill Education (India) Private Limited.
5. Robbins, S.P., & Coulter, M. Management. New York: Pearson Education.

MBMBA01DSC02: MANAGERIAL ECONOMICS

Credits: 4

Course Objectives:

The objective of this course is to familiarize the students with the concepts and techniques used in Micro-Economic Theory and to develop managerial capabilities for effective decision making in a variety of different business situations and market conditions. Managerial Economics provides the student with the basic tools to fundamentally deal with achieving a set of goals in a situation where resources are limited and choices must involve trade-offs, taking into account the external environment.

Course Learning Outcomes:

1. Strengthening the foundations of the analytical approach to Managerial decision-making
2. Familiarize with the demand side of market and decisions related to it
3. Learn the production problems and analyze how managers make input purchase decisions
4. Explore the various market structure and how supply is determined in each structure.
5. Analyze the business cycle and familiarizing indicators of economic activity.

Course Contents:

Module I

Introducing Management Students to Microeconomic – Decision making and Fundamental Concepts affecting Business Decisions – The incremental concepts - Marginalism - Equi-marginal Concept – The time perspective - discounting principle – opportunity cost principle.

Module II

Utility analysis and the demand curve – Equilibrium of the consumer – Indifference curve analysis – Price effect – income effect and substitution effect – Elasticity of Demand-Demand forecasting – The production function – Production with one variable input –Law of variable proportions – Production with two variable inputs – Iso cost lines - Cost concepts and Break Even Analysis.

Module III

Market Structure – Perfect and Imperfect competition - Monopoly – Duopoly – Monopolistic Competition – Oligopoly Models - Bertrand duopoly, Cournot duopoly, Stackelberg model - Introduction to Game Theory- Pricing Methods.

Module IV

National Income – Concepts – Gross Domestic Product – Gross National Product – Net National Product – Measurement of National Income – Business Cycles and Contra cyclical Policies.

Suggested Readings:

1. Allen, W. B., Doherty N. A., Weigelt, K & Mansfield E, Managerial Economics: Theory, Applications and Cases , W. W. Norton & Company.
2. Bernheim, B. D., Winston, M., & Sen, A. Microeconomics. McGraw Hill Education.
3. D.M. Mithanil, Money and Banking– International Trade and Public Finance,HimalayaPublishing House, Mumbai.
4. Joseph E. Stiglitz& Carl E Walsh Economics , W. W. Norton & Company
5. Geetika,GhoshP.,& Roy Chowdhury, P, Managerial Economics, McGraw Hill Education.
6. Hirschey, M, Managerial Economics: An Integrative Approach, Cengage Learning.
7. Koutsoyiannis, A, Modern Micro economics , Palgrave, McMillan.
8. Mark, H, Fundamentals of Managerial Economics , Cengage Learning.
9. Paul, K., Philip, K. Y., Steve, E., Dickinson, C., & Banerjee S, Managerial Economics , Pearson.

MBMBA01DSC03: ACCOUNTING FOR MANAGERS

Credit: 4

Course Objectives:

The Objective of the course is to develop an insight in to the postulates, principles and tools of financial accounting from the managerial perspective. The course also aims to develop a strategic and policy perspective with respect to the principles of accounting and utilization of accounting information for general purpose decision making in an organization. The emphasis is on core ideas and techniques with reinforced understanding using practical examples.

Course Learning Outcomes:

1. Explore how accounting decisions affect real company practices.
2. Learn the concepts of Depreciation, and the accounting practices employed by Indian Companies.
3. Strengthening the foundations of the analytical approach to Managerial decision-making.
4. Practice financial statement analysis and evaluation of company performance.

Course Contents:**Module I**

Accounting – Branches of accounting – Financial Accounting–Importance and Functions – Book Keeping–Systems of Book Keeping - Double Entry Book Keeping - Journal–Ledger – Cash Book – Bank Reconciliation Statement - Trial Balance - Generally Accepted Accounting Principles (GAAP) - Accounting concepts and conventions.

Module II

Capital and Revenue – Depreciation– Methods of charging depreciation– Final Accounts- Trading and Profit and Loss Account- Balance sheet.

Module III

Management Accounting- Meaning - Definition – Nature – Objectives – Scope – Importance - Distinction between financial, cost and management accounting - systems - Financial statement analysis – tools – comparative financial statements – common size financial statements – trend analysis – Ratio Analysis– Du Pont analysis.

Module IV

Funds Flow Analysis – Schedule of Changes in Working Capital – Funds Flow Statement- Cash Flow Analysis – Cash Flow Statement – Responsibility Accounting–International Accounting Standards–IFRS.

Suggested Readings:

1. Shukla, M.C :Advanced Accountancy, S. Chand & Co , New Delhi.
2. Jain, S.P and Narang K.L :Advanced Accountancy, Kalyani Publishers, Lucknow.
3. PandeyI.M :Financial Management, Vikas Publishing House, New Delhi.
4. Maheswari,S.N :Financial Management, Sultan Chand &Sons, New Delhi.
5. Gupta, R.L &Gupta, V.K: Principles and Practice of Accountancy, Sultan Chand & Sons, New Delhi.
6. Iyenkar, S.P: Cost accounting, Sultan Chand & Sons, New Delhi.
7. Anthony, R.N., Hawkins, F.D & Merchant, K.A, Accounting: Text and Cases Tata McGraw Hill.
8. Needles B.E., Powers, M &Crosson S.V, Principles of Financial Accounting South-Western College/West.
9. Hilton, R.W & Platt, D.E, Managerial Accounting, Tata McGraw Hill.

MBMBA01DSC04: DATA ANALYSIS FOR DECISION MAKING

Credit: 4

Course Objectives:

Organizations today handle huge amount of data. Hence Data collection, presentation and analysis are becoming very crucial for important decision making. Managers should possess the skills to extract useful information from data and apply them in the business and industrial scenario. This introductory course will develop participants with such skills.

Course Learning Outcomes:

1. Understand different sources of data
2. Ability to summarize and present data.
3. Understand the scope of Sampling and Inferential statistics.
4. Identify areas for application of Statistical Techniques in Business and industry.
5. Understand how to use the appropriate tools during data analysis.
6. Ability to forecast using regression tools.

Course Contents:

Module I

Data analysis and its importance for managers, role of Statistics in Data Analysis –Data collection, Quality of data, Charts and Diagrams, Descriptive Statistics., Measures of Central Tendency and Dispersion.

Probability, Basic Concepts, Theorems: Addition, Multiplication, Conditional Probability, Baye's Theorem, Business Applications. Random Variable, Probability distributions. Binomial, Poisson, Uniform, Normal and Exponential distributions.

Module II

Statistical Inference: Population, Sample, Sampling Distribution. Hypothesis Testing, Type I and Type II Errors, t-test, z-test, Analysis of Variance (One-way & Two –way).

Module III

Chi-square test, Sign test, Mann-Whitney U-test, Wilcoxon signed-rank test, Kruskal Wallis test, Kolmogorov-Smirnov test. (Applications)

Module IV

Correlation Analysis: Understanding and applications of Simple, Partial and Multiple Correlation. Introduction to Regression: Linear regression, fitting of the linear model, using Regression for prediction. Application.

Suggested Readings:

1. Aczel, AmirD., Sounderpandian,J.,& Saravanan P.(2012). Complete Business Statistics (7thed.). India: McGraw Hill Education India Private Limited.

5. Beri,G. C., Business Statistics, Tata Mc.Graw Hill Education, New Delhi.

6. Vora, N.D., Quantitative Techniques in Management, Tata Mc.Graw Hill Education, New Delhi.

MBMBA01DSC05: BUSINESS ENVIRONMENT

Credit: 4

Course Objectives:

This course seeks to sensitize the students to the various micro and macro environmental factors within which they will operate as managers. The course also helps in sensitising the students about ecology, its different aspects and how it plays an important role in business.

Course Learning Outcomes:

1. It provides the students to acquaint an understanding of economic rules of government in the Indian context.
2. It provides the interface between economic growth, poverty and inequality
3. It helps to understand the success and failure of private and public partnership in the Indian context.
4. It also helps to assess the forces for and against globalization.

Course Content:

Module I

Business Environment- Concept- significance-environmental factors- relationship between business and environment – Inclusive growth - rural development implications of economic environment to business

Economic Environment- Goods and Services Tax (GST) concepts and features – Customs duty- Patterns of Indian economy- characteristics of Mixed economy – Sectors of economy and their relative importance - Post liberalization

Module II

Social and Cultural Environment - Indian social structure- caste and family systems religions customs-culture- transitions – demographic changes- savings and consumption habits- Business implications- Technological Environment - R & D in India- implications to business – National Knowledge Commission – Concept of BPO, KPO and LPO

Module III

Political Environment – Industrial policy - Five year planning – NITI AAYOG - Liberalization- Privatization and Globalization – Industrial sickness – Environment Impact Assessment Report (EIA) – National Green Tribunal (NGT).

Module IV

Investment Environment - Capital market institutions - SEBI & its functions – Foreign investment in India – portfolio investments - NBFC's institutional structure and Finance- Insurance- Types of Insurance - Role and Functions of IRDA – Functions of FICCI and CII.

Suggested Readings:

1. Business Environment, Shaik Saleem, Pearson Education.

2. Business Environment, Vivek Mittal, Excel Books.
3. Indian Economy, R. Datt & KPM. Sundaram S. Chand & Sons.
4. Cherunilam Francis, Business Environment -Text and Cases, New Delhi: Himalaya Publishing House Pvt Ltd.
5. Justin Paul, Business Environment -Text and Cases, Tata McGraw Hill Education, NewDelhi.

MBMBA01DSC06: MANAGERIAL COMMUNICATION

Credit: 4

Course Objectives:

The aim of the course is to develop skills and competencies in participants to be able to communicate effectively through written, oral and social medium. This course will make students conversant with the basic forms, formats and techniques of business writing so that they would be thoroughly prepared to communicate effectively in all contexts. Sensitivity towards cross-cultural communication will be developed with familiarity with global business etiquette and protocols.

Course Learning Outcomes:

1. Explore the role of communication in the organizational and Global Context
2. Learn the basics of effective written and verbal communication
3. Analyzing cross cultural communication and familiarize its usage in International Business.
4. Building a perspective on career communication tools.

Course Content:

Module I

Principles of Business Communication- Types of Business Communication-Methods and media of Communication- Process of Business Communication- Basics of Communication (7Cs) - Corporate Communication- Barriers to poor Organizational Communication - Listening Skills - Legal issues in Communication.

Module II

Written communication- Structures and methods of written communication-Letter for different kinds of situations- Enquiries - Customers' complaints - Collection letters - Sales promotion letters - E-mail etiquettes - Memoranda -Directives and instructions - Notices - Reports - Memo -Agenda - Proposals - Business plans - Minutes - Professional papers - Agreement documents -Press releases - Improving personal writing skills - Report writing - Structure of reports - Long &short reports - Formal & Informal reports - Technical Reports - Norms for including Exhibits &Appendices.

Module III

Verbal and nonverbal Communication in business - Public Speaking Skills - Business presentations - Role of audio visual aids and computers in oral presentations - Interviewing- Mentoring and Appraisals - Art of negotiation - Mannerisms - Body language - Interpersonal Communication Communicating in teams - Communication skills during a conflict.

Module IV

Types of Organizational Communication- Communication for interpersonal influences - Effective Leadership Communication - Cross Culture - Theoretical Framework of Cross - Cultural Communication - Communication across cultures through different mediums - Business Etiquettes across cultures - Career management and communication - Resume writing and cover letters - Group Discussions and Interviews - Conducting meetings – Procedure – Preparing agenda - minutes and resolutions Communication during Exit Interviews - Ethics and Communication.

Suggested Readings:

1. Bovee, C., & Thill, J.V., & Raina, R.L, Business Communication Today, Pearson
2. Lehman, C. M., Dufrene D. D., & Sinha, M. BCOM : The South Asian Perspective on Business Communication, New Delhi: Cengage Learning.
3. Murphy, H. A., Hildebrandt, H.W., & Thomas, J.P, Effective Business , Boston: McGraw-Hill Companies.
4. Mukerjee, H. S, Business Communication, New-Delhi: Oxford University Press
5. Philip S Atkinson, Helen Reynolds, Business Writing and Procedures, American Book Company
6. Post Emily, The Etiquette Advantage in Business, New York: Collins.
7. Rhoda and Aspi, Principle and Practice of Business Communication, Sheth Publisher Pvt Ltd.
8. Sandra, M. O, Handbook of Corporate Communication and Strategic Public Relations: Pure and Applied. Routledge.

MBMBA01DSC07: BUSINESS ETHICS AND CORPORATE GOVERNANCE

Credit: 4

Course Objectives:

The course seeks to bridge the gap between the ethical behavior of the individual and the ethical challenges posed by organized business activity in the global marketplace. The course introduces the concept and importance of business ethics, corporate governance and aims to sensitize participants towards consequences of their decisions involving ethics. The course does not provide solutions to critical dilemmas, but encourages critical ethical thinking and decision-making that is aligned with law of the land, sustainability and morality.

Course Learning Outcomes:

1. The course seeks to develop an understanding of philosophical frameworks that shape sense of morality while doing business in a cross-cultural global business environment.
2. It sensitizes participants towards negative outcomes of unethical practices at the level of organization, community, environment and self.
3. Facilitates the development of critical thinking to solve ethical dilemmas in work life.
4. Learning to build an ethical work culture in an organization through an ethical policy, its implementation.

Course Content:

Module I

Business ethics - Meaning – Definition –Scope – Objectives- Ground Rules – Classification- The Utilitarian view – The separatist view – The integration view - Myths –Ethics Vs Morality- Ethical considerations in business and the costs of being unethical– Arguments against business ethics- Business Ethics: Cross-Country Perspectives - Corporate social responsibility

Module II

Ethical Dilemma – Ethical Decision Making – Philosophical frameworks for ethical decisions: Western Teleological, Deontological and Modern theories- Ethical Reasoning – Ethical issues – Ethics Management Programs – Benefits of Managing Ethics in Work Place – Organisation Ethics Development System (OEDS) – Code of ethics – Guidelines for developing Comprehensive Ethics program –Value based leadership.

Module III

Ethical Values – Characteristics – Types - Importance - Basic principles of management as per ancient Indian wisdom and insight – work life in Indian philosophy – Indian ethos for the work life – Indian values for the work place – Respect for elders – Respect for hierarchy and status – Rights and duties – Quality of work life in Indian philosophy - Work Ethics – Work Culture – Ethical Theories – Ethical Values- Professional Ethics- Environmental Ethics – Challenges of Cyber Age - Intellectual Property rights - Discrimination related to gender - caste and class - Sexual harassment at work place.

Module IV

CORPORATE GOVERNANCE: Meaning – Mechanism - Principles - Code of Corporate Governance – Audit Committee – Role of Independent Directors – Protection of Stakeholders – Corporate Social Responsibility – Changing Roles of Corporate Boards with changing times – Whistle blowing concept and implementation of ethical policy in the organization - Issues in Corporate Governance - Emerging Trends - Cases in Business ethics and Corporate Governance.

Suggested Readings:

1. Bhatia, S.K., Business Ethics and Corporate Governance, Deep & Deep Publication.
2. B.N Ghosh, Business Ethics and Corporate Governance, Mc Graw Hill.
3. Daniel Albuquerque, Business Ethics, Oxford Univ. Press
4. Laura P. Hartman, Perspectives in Business Ethics, Tata Mc Graw Hill.
5. Chakraborty, S.K., Management by Values, Oxford Univ. Press
6. C., Fernando, Business Ethics and Corporate Governance. New Delhi: Pearson.
7. Sanjay Mohapatra , Case Studies in Business Ethics and Corporate Governance. New Delhi: Pearson.
8. Griseri, P., &Seppala N, Business Ethics and Corporate Social Responsibility. South-Western Cengage Learning. 1
9. Sims., R.R, Ethics and Corporate Social Responsibility, Why Giants Fall. Greenwood Publishing.

SEMESTER II

MBMBA02DSC08: OPERATIONS RESEARCH

Credit: 4

Course Objectives:

Managers are to be trained to use various Optimization tools for solving realistic but complex problems in business and industry. They should be able to formulate the scenario and use appropriate tools for finding the optimal solutions.

Course Learning Outcomes:

1. Understand different types of models.
2. Develop the ability to formulate as models
3. Learn various Operations Research tools
4. Develop the skills to use appropriate tools for real life problems.
5. Analyze and compare different decision making tools.
6. Implement the O.R tools in real life scenario.

Course Contents:

Module I

Introduction to Operations Research: Objectives and Business Applications of Operations Research, Models in O.R.: Introduction, Linear Programming Problem(LPP) Formulation, Graphical Method, Simplex Method, Duality, Basic Concepts of Sensitivity Analysis.

Module II

Transportation Models: North-west Corner Method (NWC), Least Cost Method (LCM), Vogels Approximation Method, Assignment Model, Hungarian Method, Minimisation of cost.

Module III

Network Models: Critical Path Method (CPM), Program Evaluation Review Technique (PERT), Crashing, Resource Smoothing, Resource Leveling.

Module IV

Queuing Theory: M/M/1 Queue (System with Single Server), M/M/2 (System with Two Servers), Monte-Carlo Simulation, Applications in Queuing Models.

Decision Theory: Decision Making under Risk and uncertainty, Game Theory, Decision Tree, OR, Application of Software for solution.

Suggested Readings:

1. Taha, H.A., Operations Research, (2017)- An Introduction, Pearson Education, India.
2. Sharma, J.K., Operations Research (2017)-Theory and Applications, Macmillan.
3. Hiller, F. S. and Lieberman, (2017) Introduction to Operations Research, Tata Mc.GrawHill.
4. Kanti Swarup, Gupta, P. K., Mamohan, (2015) Operations Research- Principles and Practice, (10th Ed.), Sulthan Chand & Sons, New Delhi.
5. Mital, K.V. and Mohan C., Optimization Methods in OR System Analysis, New Age (P) Ltd., (3rd Ed.),

MBMBA02DSC09: ORGANIZATIONAL BEHAVIOUR

Course Objectives:

This course aims to help students appreciate the why and how of individual as well as group behaviour which are important for them to adapt to the changing corporate environment. It helps to develop the interpersonal abilities in the students so as to apply their understanding in the dynamics of the workplace.

Course Learning Outcomes:

1. Identify the challenges and opportunities managers have to consider while applying Organizational behaviour concepts.
2. Describe how personality, attitudes, emotions and perception contribute to Organizational behaviour.
3. Explain how managers use the theories of motivation to enhance the performance of the employees.
4. Develop an understanding of the groups as well as the teams in organizations.
5. Analyze the techniques for managing resistance to change and evaluate the Organizational Development Interventions required for its smooth functioning.

Course Contents:**Module I**

Organizational Behaviour and the Individual: Introduction - Emerging challenges and opportunities for Organizational Behaviour - Contributing disciplines to the Organizational behaviour field - Organizational Behaviour Model - Basic individual differences (biographical characteristics and ability) - Attitudes - Components - Types of Attitudes - Sources of Emotions and Moods - Personality - The Myers-Briggs Type Indicator - The Big Five Personality Model - Importance of Values - Terminal versus Instrumental Values.

Module II

Individual Behaviour: Perception - Importance of Perception - Factors influencing Perception - Attribution theory - Shortcuts in Judging Others - Perception and Decision making - Influences on Decision making - Elements of Motivation - Theories of motivation - Maslow's Hierarchy of Needs Theory - McGregor's Theory X and Theory Y - Herzberg's Two-Factor Theory - Goal-Setting Theory - Reinforcement Theory - Equity Theory.

Module III

Groups in Organizations: Nature of Groups - Types - Concept of role, status, norms, size, cohesiveness and diversity - Stages of Group Development - Groupthink - Groupshift or Group Polarization - Group Decision Making Techniques - Groups versus Teams - Communication Process - Types - Barriers - Trait, Behavioural and Contingency Approaches to Leadership - Power - Bases of power - Politics - Techniques of Political Plays.

Module IV

Organizational System: Organizational Change - Forces of change - Kurt Lewin Model - Levels of change - Knowledge change - Attitudinal change - The Group level change - The Group as a target of change - Organization wide change - Types of Change - Steps in managing change - Resistance to change - Managing resistance to change - Organizational Development - Objectives - Interventions - Transactional Analysis - Sensitivity training - Process Consultations - Third party Interventions - Team building - Individual Counselling.

Suggested Readings:

1. Champoux, J.E. Organizational Behaviour- Essential Tenets for a New Millennium. Cincinnati OH: South Western College Publishing.
2. Luthans, F. Organizational Behaviour: An Evidence-Based Approach. New Delhi: McGraw-Hill Education (India) Private Limited.
3. Nelson, D L, Quick, J.C., & Khandelwal. P. ORGB: A South Asian Perspective. New Delhi: Cengage Learning India Private Limited.
4. Pareek, U., & Khanna, S. Understanding Organizational Behaviour. New Delhi: Oxford University Press.
5. Robbins, S. P., Judge, T.A., & Vohra, N. Organizational Behaviour. New Delhi: Pearson Education.

MBMBA02DSC10: HUMAN RESOURCE MANAGEMENT

Credit: 4

Course Objectives:

The course is designed to familiarize students on the strategies, policies and systems for managing people professionally in the context of the rapidly evolving aspirations of individuals and changing business scenario. It covers the basic concepts, techniques, and practices of human resource management that promotes employee motivation and performance in order to achieve the organizational objectives.

Course Learning Outcomes:

1. Recognize the foundations of managing human resources in the organizations in terms of functions, roles, strategies, policies and procedures.
2. Explain how the tasks of Human Resources Planning, Job Analysis, Recruitment and Selection can be executed in the organization.
3. Analyze the tools and techniques for the training, development and performance appraisal of the employees.
4. Evaluate the various components of a compensation package, how to structure them, and how to develop a company's compensation policy.
5. Outline the various aspects of Industrial Relations in terms of its Functions, Objectives and Disputes.

Course Contents:**Module I**

Introduction to Human Resource Management (HRM): Concept of HRM - Evolution of HRM - Objectives - Functions - Scope - Significance - Roles - Competencies - Structure of the HRM Department - General and Specific HR Strategies - Formulating HR Policies - HR Procedures - HRIS Functions - HRM Trends and Opportunities - Challenges of HRM - Careers in HRM.

Module II

Human Resource Planning (HRP): Purpose and Process of HRP - Retention of Human Resources - Job Analysis Purpose and Methods - Recruiting Goals - Sources of Recruitment - Selection Process - Tests - Interviews - Placement - Purpose of New Employee Orientation - Promotion - Demotion - Transfer.

Module III

Training, Development and Compensation: Concept - Determining Training Needs - Methods of Training - Approaches to Management Development - Training Evaluation - Talent Management - Career Planning - Individual Centred and Organization Centred - Performance Appraisal Process - Methods of Performance Appraisal - Objectives and Types of Compensation - Development of a basic pay system - Pay structures - Incentives - Individual Incentive - Group/Team Incentive - Organizational Incentive.

Module IV

Industrial Relations: Concept of Industrial Relations - Function – Objectives - Linkage between Human Resource Management and Industrial Relations - Industrial Disputes - Causes - Economic - Managerial - Political - Prevention of Industrial Disputes - Statutory measures - Non Statutory Measures - Settlement of Industrial Disputes - Conciliation - Adjudication - Arbitration - Mediation - Recent Trends in Industrial Relations - Future of Industrial Relations in India.

Suggested Readings:

1. Armstrong, M., & Taylor, S. Armstrong's Handbook of Human Resource Management Practice. London: Kogan Page.
2. Aswathappa, K. Human Resource Management: Text and Cases. New Delhi: McGraw-Hill Education (India) Private Limited.
3. Bohlander, G.W., & Snell, S.A. Principles of Human Resource Management. New Delhi: Cengage Learning India Private Limited.
4. DeCenzo, D.A., Robbins, S.P., & Verhulst, S.L. Fundamentals of Human Resource Management. New Jersey: John Wiley & Sons.
5. Sharma, R.C. Industrial Relations and Labour Legislation. New Delhi: PHI Learning Private Limited.

MBMBA02DSC11: MARKETING MANAGEMENT

Credit: 4

Course Objectives:

Objective of this course is to facilitate understanding of the conceptual framework, tools and techniques relevant to marketing management. The course introduces the students to the concepts, strategies and contemporary issues involved in the marketing of products and services. It may help the student to develop the skill for solving the strategic marketing problems faced by marketing managers.

Course Learning Outcomes:

1. Familiarize the nature and scope of marketing
2. Develop an understanding of various marketing philosophies
3. Explore the marketing mix and marketing environment
4. Learn segmentation, targeting and positioning

Course Contents:**Module I**

Introduction to Marketing - Meaning and Scope of Marketing - Marketing Philosophies and corporate orientation towards marketplace - Marketing Management Process An Overview - Concept of Marketing Mix - Understanding Marketing Environment - Understanding the impact of Macro and Micro environment on Marketing - Marketing information system and Fundamentals of Marketing Research - Customer Value - Holistic Marketing - Global Marketing.

Module II

Consumer markets and business markets- Consumer Buying Behavior - Organizational Buying Behaviour - Demand Forecasting - Market Segmentation, Targeting and Positioning- Niche & Local Marketing - Effective segmentation criteria - Positioning and differentiation strategies, Concept of positioning – Value Proposition & USP - Market oriented strategic planning - formulation of marketing strategy and key drivers of marketing strategy - Preparation of a marketing plan - Competitor analysis - Marketing Warfare Strategies.

Module III

Product and Pricing Decisions - Product Concept - Planning and Development - Types of Products - Product Levels - Major Product Decisions - Product Life Cycle - New Product Development and consumer adoption process – Branding - Packaging and labeling decisions - Pricing Decisions - Determinants of Price - Pricing Process - Policies and Strategies. Promotion decisions - Integrated Communication process - Role of Promotion in Marketing - Promotional tools - Advertising - personal selling - publicity and sales promotion.

Module IV

Designing Distribution Channels - Managing Conflicts and Controls in Channels – Introduction to Inventory management – Warehousing - Transportation and insurance - Building customer satisfaction - Value and retention - Emerging trends and issues in marketing – Societal marketing - Digital marketing - Green Marketing - Introduction to Marketing analytics - Customer Relationship Management - Rural marketing – Social media marketing – Search engine optimization - Other emerging trends.

Suggested Readings:

1. Philip Kotler, Kevin Lane Keller, Abraham Koshy, Mithileswar Jha, “Marketing Management – A South Asian Perspective”, Pearson Education India Limited, New Delhi,
2. KS Chandrasekar, “Marketing management-Text and Cases”, Tata McGraw Hill.
3. Etzel, M., Walker, B., Stanton, W. and Pandit, Marketing Management, Tata McGraw Hill, New Delhi
4. Ramaswamy, V.S and Namakumari, S Marketing Management: Global Perspective Indian Context, Macmillan Publishers India Ltd., New Delhi
5. Saxena, Rajan, Marketing Management, Fourth Edition, Tata McGraw Hill Education Pvt. Ltd. New Delhi.
6. Louis E. Boone and David L. Kurtz Principles of Marketing, Cengage Learning.
7. Pride, William, M., and O.C. Ferrell Marketing Planning, Implementation and Control, Cengage Learning, New Delhi.
8. Etzel Walker : Fundamentals of Marketing Stanton, Tata-McGraw Hill, New Delhi
9. McCarthy E.J : Basic Marketing: A managerial approach, Irwin, New York.

Credit: 4

Course Objectives:

The objective of this course is to acquaint the students with the basic analytical techniques and methods of financial management of business firms. It considers the main financial decision facing a company, approaches as to how these decisions are made and introduces analytical tools that can assist in financial decision-making.

Course Learning Outcomes:

1. Comprehend the role of financial manager, objectives of financial management and sources of finance.
2. Identify the problem and formulate the best alternative investments decisions.
3. Apply the quantitative financial tools in make strategic investment and financing decisions, calculating and interpreting the cost of capital for companies.
4. How do managers decide how much to reinvest and how much to return to owners as dividends?
5. Analysis of working capital management of the company

Course Content:

Module I

Concept of finance- Scope and objectives of finance, Functions of Financial Management, Role of Finance Manager, Finance decisions, Agency conflict and agency cost, Time Value of Money concept & problems.

Investment Decisions - Capital Budgeting Decisions, Techniques - Payback period, NPV, IRR, Profitability Index, Estimation of Cash Flows, NPV v/s IRR, Risk analysis in Capital Budgeting - Sensitivity Analysis, Certainty Equivalent Approach, Problems

Module II

Financing Decisions - Capital Structure, Theories - Net Income Approach, Net Operating Income Approach, Traditional Approach, Modigliani Miller Model, Determining the optimal Capital Structure. EBIT-EPS Analysis - Concept of Leverage, Types of Leverage: Operating Leverage, Financial Leverage, Combined Leverage. Capital Budgeting under constraints (Capital Rationing), Financial Distress, Problems.

Cost of Capital - Meaning and Concept, Calculation of WACC, The CAPM Approach, Adjusting Cost of Capital for Risk, Problems

Module III

Dividend Decisions- Factors determining Dividend Policy, Theories of Dividend- Gordon Model, Walter Model, MM Hypothesis, Forms of Dividend- Cash Dividend, Bonus Shares, Stock Split, Stock Repurchase, Dividend Policies in practice, Problems

Module IV

Working Capital Management - Overview; Working Capital needs and Estimation; Cash Management; Inventory Management; Receivables Management; Current Assets Financing; Problems.

Suggested Readings:

1. I.M.Pandey, Financial Management, 11th edition, Vikas Publishing, India.

2. Prasanna Chandra, Financial Management : Theory and Practice, 8th edition, McGraw Hill, India
3. Eugene F. Bridgham, Micheal C. Ehrhardt, "Financial Management: Theory and Practise" South Western Cengage Learning.
4. M Y Khan, P K Jain, "Fianacial Management" Tata McGraw Hill Publishing Company Limited, New Delhi.
5. Lawrence J. Gitman, Roger Juchau, Jack Flanagan, "Principles of Managerial Finance" Pearson Australia (6th Edition).
6. James C. Van Horne, John Martin Wachowicz, "Fundamentals of Financial Management" Prentice Hall.

MBMBA02DSC13: PRODUCTION AND OPERATIONS MANAGEMENT

Credit: 4

Course Objectives:

This course is designed to help the students understand the role of operations in improving the efficiency of an organization including both manufacturing and service one and also help them appreciate the linkage of operations with corporate strategy and other functional domains including marketing and finance. It would help them understand the business problems relating to operations and equip them with the application of appropriate tools and techniques for addressing the same.

Course Learning Outcomes:

1. Assess the role of operations in both manufacturing and service organizations and the significance of operations strategy in the overall business.
2. Explore the importance of facilities location decision in the whole supply chain in globalized operations and learn the tools relating to facilities location.
3. Learn different types of production processes and facility layout suitable for manufacturing different categories of products and how different processes could be analyzed with the help of process flow charts.
4. Develop a thorough understanding of a range of inventory models available as also the suitability of a particular inventory model in a particular context.

Course Content:

Module I

Production as an organization function –Importance of Production Function –Scope of Production and Operations Management – Types of Production Systems – Strategic Operation Management – Operations Strategies - Elements of Operations Strategy - 5 P^s of Operations - Emerging trends in Operations Management

Module II

Plant location & Layout : Nature-Location Theories – Steps in Location – Location Models – Plant Layout – Factors influencing layout – Principles of layout – Layout Tools and Techniques – Materials Handling – Material Handling Principles – Types – Selection and Design of Handling System.

Module III

Materials Management – Vendor rating – Inventory Models – EOQ – Reorder point – EOQ with Discounts - MRP-I,MRP-II – Selective Inventory Control(SIC) – Just In Time(JIT) – Basics of Kanban - VMI and ERP - Work Study - Work Measurement.

Module IV

Role of production planning & control in Operations Management – Factors determining production planning – Aggregate Planning – Master Production Schedule – Scheduling – Loading - Routing – Product Planning for Various Production Systems – Line Balancing and sequencing – EBQ – Capacity Planning – Quality Management System – Statistical Quality Control (SQC) – Total Quality Management(TQM) - Six sigma - Lean operations and Toyota Production System - SCM Basic Concepts – TPM - overview of FMS and Robotics.

Suggested Readings

1. Starr. Martin K., Production Management -Systems and Synthesis
2. Senthil M, New Production Operations Management
3. Pannerselvam, Production and Operations Management
4. Elwood, S. Buffa &Rakesh K. Sarin, Modern Production/Operations Management
5. Norman Gaither, Production and Operations Management
6. Kanishka Bedi, Production and Operations Management
7. Joseph G. Monks, Operations Management
8. W. Grant Ireson & EngeneL. Grant, Handbook of Industrial Engineering and Management.
9. Everette Adam Jr., Ronald Ebert, Production and Operations Management

SEMESTER III

MBMBA03DSC14: MANAGEMENT INFORMATION SYSTEM

Credit: 4

Course Objectives:

This course has been designed to develop a macro-level perspective of the Information Technology and its potential to help organizations creates sustainable competitive advantage in respective industries. This should also help the participants appreciate the significance of IT investment decisions made by organizations.

Course Learning Outcomes:

1. Developing a macro level understanding among the students with regard to the exploitation of information technology by organizations.
2. Discuss various types of Computer Based Information Systems and their relevance for organizations.
3. Develop an understanding of role of IT for competitive advantage.
4. Discuss the importance of system development and system lifecycle.
5. Understand the role of IT Architecture in making IT investments.

Course Contents:**Module I**

Emerging Technology Issues and Data Processing in Organizations; Introduction to Information Systems; Shift in information system thinking. Decision Making and MIS. Cost and Value of Information.

Module II

Computer Based Information Systems: Office Automation Systems; Transaction Processing Systems; Management Information Systems; Decision Support Systems; Group Decision Support Systems; Executive Information Systems. Artificial Intelligence Based Systems such as Expert Systems. End User Computing.

Module III

Development of MIS: Systems analysis and design- systems analysis for new requirement- systems development models- prototype approach–classical SDLC approach-structured system design- system development process-tools and techniques of system design-data flow diagram-data structure-system implementation success and failure-quality control of information system-introduction to emerging technologies.

Module IV

Structured Systems Analysis; System Development; System Development Life Cycle. Discussion on ERP, CRM and SCM

Legal Issues and National Information Infrastructure. IT Leadership & IS Strategic Planning; IS Strategy and Effects of IT on Competition. Re-engineering Work Processes for IT application. Cases on strategic use of IT indifferent industries.

Suggested Readings:

MBMBA03DSC15: BUSINESS LAW

Credit: 4

Course Objectives:

The objective of this course is to provide students with increased knowledge concerning important legal issues in business, so that they, as managers are able to take decisions which are in accordance with the law of the land. The course aims to bring jurisprudence to the forefront by engaging students in thoughtful and critical analysis about the law. This course resolves to provide the students with an understanding about the basic nature of law, how it works, how it is used to settle disputes and how it affects business decision making. Greater knowledge of legal issues in business will enable the students to be an active partner in legal aspects of decision making. The students will be better equipped to avoid the legal issues before they occur and control and manage legal problems which do emerge more effectively.

Course Learning Outcomes:

1. Recognize legal issue in various business settings and transactions.
2. Enhance critical thinking and problem solving regarding legal issues by reviewing factual situations and applying sound legal reasoning to reach a conclusion.
3. Acquire knowledge of basic legal terminology.
4. Familiarize various law of the land and explore recent changes and amendments in business law.

Course Content:

Module I

The IndustrialContractAct,1872 - Nature and Classification of contracts - Essential elements of a valid contract – Offer and Acceptance – Consideration – Capacity of Parties - Provisions relating to free consent - Void agreements - Provisions Relating to Performance and Discharge of Contracts –Types of Contracts - Quasi contracts - Breach of Contract and its remedies.

Module II

Sale of goodsAct,1930 - Contract of sale of goods-Meaning - Essentials of a contract for sale - Formalities of a Contract of sale - Provisions relating to Conditions and Warranties - Doctrine of Caveat Emptor - Provisions Relating to Transfer of Property or Ownership - Provisions Relating to performance of contract of sale - Rights of unpaid Seller - Rules as to delivery of Goods.

Module III

The Negotiable Instruments Act, 1881 - Negotiable Instruments - Meaning – characteristics - types - parties- holder and holder in due course-Negotiation and types of endorsements - Dishonor of negotiable instruments- Noting and protest - Liability of Parties on negotiable instrument –Liabilities of a banker - Indian PartnershipAct,1932 – Important features- Formation of partnership firms - Kinds of partners -Rights and liabilities of partners - Dissolution of partnership.

Module IV

The Companies Act,2013 - Company definition - Meaning - Features and types of Companies. Incorporation of a Company - Memorandum of Association - Articles of Association and Prospectus – Share Capital - Management and Meetings - Directors - Managers and their remuneration – Secretary - Prevention of oppression and mismanagement - Winding up of companies - Industrial Disputes Act,1947 - Factories Act,1948 - The Trade Union Act,1926 -

The Minimum Wages Act, 1948 - Workmen's Compensation Act, 1923 - The Co-operative Societies Act, 1912 - The Multi-State Co-operative Societies Act, 1984 - The Foreign Exchange Management Act, 1999 - The MRTP Act, 1969 - The Information Technology Act, 2000.

Suggested Readings

9. Tulsian, P.C., & Tulsian, B., Business Law. Tata McGraw Hill.

MBMBA03DSC16: RESEARCH METHODOLOGY

Credit: 4

Course Objectives:

This course gives a comprehensive introduction to the subject of business research methods. The objective of this course is to develop the research skills of the students in investigating the business problems with a view to arrive at objective findings, interpretation of data and conclusions of their investigation in the form of systematic reports. Further, acquainting students with all modern and universally applied research concepts, tools and techniques and encouraging them to apply their acquired theoretical knowledge to real-life situations are paramount course objectives.

Course Learning Outcome:

1. Learn to define research problems and formulate research hypothesis
2. Explore research design
3. Prepare questionnaire and collect data
4. Learn to present data and analyze the data and to present a research report.

Course Content:

Module I

Research: Definition – Meaning and research as the application of scientific method – Importance of research in managerial decision making – The Research Process and types of Research – Defining the Research Problem – Problem Formulation and Statement of Research Problem - Formulation of Research Hypotheses - Ethics in Business Research.

Module II

Research Design - Exploratory – Descriptive - Diagnostic/Conclusive and Experimental Researches – Details and applications – Operational and administrative structure for research - The sources and collection of data – primary and secondary data sources – Sampling Designs - Probability and Non-probability Sampling Designs - sampling procedures - Types of

sampling plans - Sample size determination - Common sources of error in sampling and data collection.

Module III

Methods & Techniques of Data Collection – Observational and other survey methods - personal interviewing - Telephone interviewing and self - Administered surveys – Development and designing of tools of data collection – Measurement scales – Measurement of attitudes - Validity and Reliability of the tools of data collection - Questionnaire design.

Module IV

Fieldwork in research and data processing – Classification and Tabulation – Analysis and interpretation of Data – Testing of Hypothesis – Parametric and Non-parametric tests – Introduction to Univariate [T-tests Z-Tests] / Bivariate [Correlation-Regression-Chi Square - ANOVA] / Multivariate Data analysis [Factor Analysis - Cluster Analysis - Multiple Regression - Discriminate Analysis - Conjoint Analysis] – Use of Statistical Software Packages - Reporting of Research-Types of Reports-Substance of Reports-Format of Report - Presentation of Reports - Oral Presentation - Research Follow-up.

Suggested Readings:

1. Wilson, Jonathan, Essentials of Business Research, Sage
2. Alan Bryman & Emma Bell, Business Research Methods, Oxford University Press
3. Kothari, C.R., Research Methodology-Methods & Techniques
4. O.R. Krishnaswami & M. Ranganatham, Methodology of Research in Social Sciences, Himalaya Publishing
5. Bennet Roger, Management Research
6. Claire & Morton, Research Methods in Social Relations
7. Neil J. Salkind, Exploring Research
8. Taro Yamane, Statistics-An Introductory Analysis
9. Levin Richard I-Statistics of Management

SEMESTER IV

MBMBA04DSC18: STRATEGIC MANAGEMENT

Credit: 4

Course Objectives:

The course is designed to cover fundamental issues with regard to corporate and business strategy, and the implementation and process aspects of strategic management.

Course Learning Outcomes:

1. Understand the relationship between strategic analysis and strategic implementation
2. Comprehend the distinction between firms and markets
3. Apply strategy principles to understand the benefits and costs of diversification
4. Understand the international dimensions of strategic management
5. Study the major contemporary trends in strategic management

Course Content:**Module I**

Corporate Strategic Planning - Mission - Vision of the firm - Development, maintenance and the role of leader - Hierarchical levels of planning - Strategic planning process. Strategic management Practice in India. Competitive advantage of Nations and its implication on Indian Business.

Environment Analysis & Internal Analysis of Firm: General environment scanning, competitive & environment analysis - to identify opportunities & threat - Assessing internal environment through functional approach and value chain - identifying critical success factors - to identify the strength & weakness - SWOT audit - core competence - Stockholders' expectations, Scenario-planning - industry analysis.

Module II

Strategy Formulation: Generic strategies - Grand strategies - Strategies of leading Indian companies - The role of diversification - limits - means and forms. Strategic management for small organizations, non-profit organizations and large multi-product and multiple market organizations.

Module III

Tools of Strategy: Planning and evaluation : Competitive cost dynamics - experience curve - BCG approach - cash flow implication -IA-BS matrix - A.D.Littles Life-cycle approach to strategic planning - Business portfolio balancing - Assessment of economic contribution of strategy - Strategic funds programming.

Module IV

Strategy Implementation & Control : Various approaches to implementation of strategy - Matching organisation structure with strategy - 7S model - Strategic control process - Du Pont's control model and other Quantitative and Qualitative tools - Balanced score card - M.Porter's approach for Globalisation - Future of Strategic Management.

8. Kaplan, J. M, Patterns of Entrepreneurship, John Wiley & Sons.
9. Kuratko, D.F., & Rao, T.V, Entrepreneurship: A South-Asian Perspective. Cengage Learning.

SKILL ENHANCEMENT COURSES

MBMBA02SEC01: FUNDAMENTALS OF HUMAN RESOURCE MANAGEMENT

Credit: 2

Course Objectives:

The course aims to help students develop insights and understanding on the strategies and policies for managing people professionally. It encompasses the fundamental principles, methods and practices of human resource management aimed at fostering employee motivation and performance to attain organizational objectives.

Course Learning Outcomes:

1. Identify how human resources are managed within organizations by delineating the functions, roles, strategies, policies and procedures pertinent to the human resources of an organization.
2. Analyze the execution of Human Resource Planning, Job Analysis, Recruitment and Selection tasks within the organization.
3. Categorize the various methods used for employee training, development and performance appraisal of the employees.
4. Evaluate the diverse components of a compensation package including their structuring and the development of an organization's compensation policy.

Course Contents:

Module I

Introduction to Human Resource Management (HRM): Human Factor and their Importance - Concept of HRM - Changing Role of HRM - Managing human resources in the emerging scenario - Evolution of HRM - Objectives - Functions - Scope - Challenges - Structure of the HRM Department - HR Strategies - HR Policies - HR Procedures - HRIS Functions - HRM Trends and Opportunities.

Module II

Human Resource Planning (HRP): Need of HRP - Steps in HRP - Linking Organizational strategy to HRP - Job Analysis - Multifaceted Nature of Job Analysis - Methods - Recruiting - Constraints - Sources of Recruitment - Selection Process - Tests - Interviews - Placement - Orientation - Promotion - Demotion - Transfer.

Module III

Training, Development, Performance Appraisal and Compensation: Concept - Training Needs Analysis - Methods of Training - Training Evaluation - Approaches to Management Development - Performance Appraisal Process - Methods of Performance Appraisal - Objectives and Types of Compensation - Development of a basic pay system - Pay structures - Incentives - Types.

Evaluation of the Course:

Evaluation of the students in this course shall be conducted through Continuous Assessment (CA) by the teacher engaging this course. The Continuous Assessment shall be based on a predetermined transparent system involving periodic written tests, assignments, seminars and any other assessment mode decided by the teacher engaging the course.

Suggested Readings:

1. Aswathappa, K. Human Resource Management: Text and Cases. New Delhi: McGraw-Hill Education (India) Private Limited.
2. Bohlander, G.W., & Snell, S.A. Principles of Human Resource Management. New Delhi: Cengage Learning India Private Limited.
3. DeCenzo, D.A., Robbins, S.P., & Verhulst, S.L. Fundamentals of Human Resource Management. New Jersey: John Wiley & Sons.

MBMBA02SEC02: FUNDAMENTALS OF MARKETING MANAGEMENT

Credit: 2

Course Objectives:

Objective of this course is to introduce the basic conceptual framework, tools and techniques relevant to marketing management. The course is designed for the students from other disciplines to familiarize the concepts, strategies and contemporary issues involved in the marketing of products and services. It may help the student to develop a liking towards marketing as a career option.

Course Learning Outcomes:

1. Familiarize the nature and scope of marketing
2. Familiarize the various marketing philosophies & Learn segmentation, targeting and positioning
3. Explore the marketing mix and marketing environment
4. Familiarize with Concept of brands and its various aspects
5. Analyze the product development and various decisions associated with new products.

Course Contents:**Module I:**

Introduction to Marketing - Meaning and Scope of Marketing - Marketing Philosophies- Corporate orientation towards Market Place - Core concepts of marketing – Needs, Wants and Demands –Target Markets, Positioning and Segmentation - Effective segmentation criteria - Positioning and differentiation strategies, Concept of positioning – Value Proposition & USP Value and Satisfaction - Holistic Marketing - Global Marketing – Technology and Marketing – Societal Marketing.

Module II:

Collecting information and forecasting demand – Components of modern marketing information system – The marketing intelligence system – Process of marketing research - Consumer markets and business markets- Consumer Buying Behavior - Organizational Buying Behaviour – factors influencing customer buying behavior – Brand – Branding decisions – Brand equity – Brand loyalty – Brand positioning – Brand reinforcement – Brand revitalization.

Module III:

Product and Pricing Decisions - Product Concept - Planning and Development - Types of Products - Product Levels - Major Product Decisions - Product Life Cycle - New Product Development and consumer adoption process - Pricing Decisions - Determinants of Price - Pricing Process - Policies and Strategies - Promotion decisions - Integrated Communication process - Role of Promotion in Marketing - Promotional tools - Advertising - personal selling - publicity and sales promotion- Digital marketing - Green Marketing - Introduction to Marketing analytics - Customer Relationship Management - Rural marketing – Social media marketing

Evaluation of the Course:

Evaluation of the students in this course shall be conducted through Continuous Assessment (CA) by the teacher engaging this course. 8. MichelChevalier,Gerald Mazzalovo, and Luxury Brand Management: A World of Privilege
9. TroyJ.Strader Digital Product Management, Technology and Practice: Interdisciplinary Perspectives.

MBMKT03DSE04: MARKETING RESEARCH

Credit: 3

Course Objectives:

Upon completion of this course, a student will be able to write a management decision problem and a marketing research problem, Plan, conduct, and interpret a small survey, applying a wide range of survey, scale, and questionnaire techniques and apply basic statistical analysis on the data, and summarize the results in clear language and submit a report.

Course Learning Outcomes:

1. Learn the essence of decision making in the context of marketing
2. Strengthening and extension of the foundation laid in marketing research
3. Understanding multivariate techniques that can be used in practising marketing
4. Learning to apply tools like discriminant analysis, conjoint analysis and cluster analysis

Course Contents:

Module I

Definition – Need – Relevance and Scope of Marketing Research – Types of Market Research – Marketing Research process – Decision making in marketing and the role of MR to provide relevant information – Different phases in the development of MR – Contemporary trends in Marketing Research.

Module II

Research Problem Identification, - Translation of Marketing Problem to Statement of research problem – Review of Literature – Identification of Research gap – Formulating Research Objectives - Identification of Variables - and Hypothesis Formulation.

Module III

Research Design and its classification – Heuristics for Best Research Design Measurement Scales – Concept of scales and property of scales – reliability and validity – Design of questionnaires and Schedules – Specific type of measurement instruments – Attitude scales – measures of emotion – perceptual scales – Qualitative research methods - FGDs – Depth interviews - Content analysis - Projective techniques - Observation and Physiological measures.

Module IV

Sampling – Field work planning and control – Data analysis – Use of software – Data screening and purification – Frequency tables – Cross tabulation – Measures of central tendency and variation – Tests of hypothesis – Uni and multivariate tests Z test – T test – Chi Square test - ANOVA – Analysis of Experimental designs - Non parametric tests – Correlation and regression – Cluster analysis – Factor analysis - Multi-dimensional scaling – Conjoint analysis – Multiple Discriminant analysis - Analysis to Marketing Insights - Report writing.

Suggested Readings:

1. G.C.Beri, Market Research, Pearson Education, New Delhi.
2. Naresh K. Malhotra, Marketing Research: An Applied Orientation, Pearson Education.
3. Cooper & Schindler, Marketing Research, Concept & Cases. Tata McGraw Hill, India

MBHRM03DSE02: TRAINING AND DEVELOPMENT

Credit: 3

Course Objectives:

This course provides an in-depth understanding of the training and development process as well as helps to focus on managing the training sub-system more effectively in an organization. It helps to develop the skills necessary for designing and developing tools for managing the training function.

Course Learning Outcomes:

1. Describe the strategic training and development process.
2. Identify the roles and competencies of the training professionals.

3. Explain the functions of organization analysis, person analysis and task analysis in the training needs assessment process.
4. Select the appropriate evaluation design based on the characteristics of the company as well as the importance and purpose of the training.
5. Evaluate the future trends that are likely to influence training departments and trainers.

Course Contents:

Module I

Introduction to Training and Development: Training, Development and Learning - Features of a Learning Organization - Strategic Training and Development Process - Organizational Factors influencing Training - Models of organizing Training Department - Faculty Model - Customer Model - Matrix Model - The Corporate University Model - Outsourcing Training - Roles and Competencies of Training Professionals.

Module II

Training Needs Assessment and Design: Importance - Scope - Methods of Training Need Assessment - Training Needs Assessment process - Organizational Analysis - Person Analysis - Task Analysis - Designing effective Training Programs - Training Site - Choosing Trainers - Curriculum, Course and Lesson Design.

Module III

Training Methods and Evaluation: Lecture - Audiovisual techniques - On the Job (OJT) training - Self directed Learning - Apprenticeship - Simulations - Case studies - Business Games - Role plays - Adventure Learning - Team Learning - Action Learning - Choosing a Training Method - Reasons for evaluating training, - Evaluation process - Training outcomes - Types of Evaluation designs - Factors that influence the type of Evaluation designs.

Module IV

Management Development and the Future of Training and Development: Need - Development Planning Systems - Approaches to development - Special Topics in Employee Development - Succession Planning - Onboarding - Future Trends - Training for Sustainability - Increased Use of New Technologies, Just-in-time Learning and Performance Support - Increased Emphasis on Speed in design, Content, Multiple delivery methods, Capturing and Sharing Intellectual Capital.

Suggested Readings:

1. Agochiya, D. Every Trainer's Handbook. New Delhi: Sage Publications Limited.
2. Biech, E. ASTD Handbook: The Definitive Reference for Training and Development. Alexandria, VA: ASTD Press.
3. Bray, T. The Training Design Manual: The Complete Practical Guide to Creating Effective and Successful Training Programmes. New Delhi: Kogan Page.
4. Lynton, R., & Pareek, U. Training for Development. New Delhi: Sage Publications Limited.
5. Noe, R. A. Employee Training & Development. New York: McGraw-Hill Education Private Limited.

Course Objectives:

This course helps the students to develop insights and understanding of effective management and development of talent in teams and organizations. It aims to help students identify best practices and approaches for talent management which will result in creating and managing talent in the organizations.

Course Learning Outcomes:

1. Describe talent management and the process of linking talent management to organizational strategy and other HR practices.
2. Summarize talent management practices by using factors of specific environment of the organization.
3. Design the process for identifying high potential talent.
4. Develop a pipeline of talent to serve the present and future needs of the organization.
5. Evaluate the role of leadership related to talent management.

Course Contents:**Module I**

Introduction to Talent Management: Objectives - Role of Talent Management in building sustainable competitive advantage - Key Processes of Talent Management - Human Resources Planning – Recruitment - Selection - Performance monitoring - Retention - Talent versus Knowledge people - Sources of Talent - Consequences of Failure in Managing Talent - Tools for Managing Talent.

Module II

Talent Acquisition: Job Analysis - Methods of collecting information, developing questionnaires, interviews - Developing job description and job specification - Developing HR planning process - Strategic Trends in Talent Acquisition - Talent Acquisition management solutions - Preparing Recruitment plan - E-recruitment (using various job portals) - Searching and downloading applicant profile by using job portals - Selecting of the Recruitment source - Preparing Recruitment Budget - Employer Branding - Formulating a recruitment strategy (specifically for Managerial/Executive jobs) - Selection process - Use of Assessment Centres - Selection errors and minimizing selection errors - Choosing the types of Interviews.

Module III

Elements of Talent Management: Concept - The Resourcing strategy - Attraction and Retention policies and programs - Managing Voluntary Turnover - Dealing with Job Withdrawal - Talent Audit - Role Development - Talent Relationship Management - Performance Management - Defining the Elements of Total Rewards - Integrated Rewards Philosophy - Designing Integrated Rewards - Sustainable Talent Management and Reward Model.

Module IV

Talent Management Essentials: Learning and development - Career Management - Talent Management Strategy - Building the Talent pipeline - Employee Engagement - Employee Engagement strategies - Strategic Compensation plan for Talent Engagement - Talent Management to drive culture of excellence - Leadership Development.

Suggested Readings:

1. Boudreau, J.W. Retooling HR: Using Proven Business Tools to Make Better Decisions about Talent. Boston, MA: Harvard Business School Press.
2. Cappelli, P. Talent on Demand: Managing people in an Age of Uncertainty. Boston, MA: Harvard Business School Press.

5. Phillips, J., & Edwards, L. Managing Talent Retention: an ROI approach. San Francisco: Pfeiffer.

MBHRM03DSE04: LEADERSHIP FOR MANAGERIAL PERFORMANCE

Credit: 3

Course Objectives:

This course is designed to orient the students towards the art and science of influence and leadership in organizations. It aims to diagnose the negative forces, anticipate moves and handle resistance to the initiatives that a leader would want to take.

Course Learning Outcomes:

1. Describe the art and science of leadership and compose new insights about the most suited leadership style.
2. Illustrate on how to develop younger leaders and their leadership skills and behaviours.
3. Analyze the theories of Leadership in order to develop perspectives on how to adapt and lead in organizations.
4. Evaluate the Glass Ceiling effect on the women employees.
5. Summarize the perspectives on Ethical Leadership.

Course Contents:

Module I

Introduction to Leadership: Various views of Leadership - Conceptualizing Leadership - Trait versus Process Leadership - Assigned versus Emergent Leadership - Leadership and Power - Leadership and Coercion - Leadership and Management.

Module II

Various approaches to Leadership: Trait approach - Five Factor Personality Model and Leadership - Emotional Intelligence - Skills Approach - Style Approach - The Ohio State Studies - The University of Michigan Studies - Blake and Mouton's Managerial Grid - Paternalism/Materialism/Opportunism - Situational Approach - Psycho Dynamic Approach.

Module III

Various Theories of Leadership: Contingency Theory - Path Goal Theory - Leader-Member Exchange Theory - Leadership Styles - Transactional leadership - Transformational leadership - Servant leadership - Authentic leadership - Women and Leadership - Gender - Leadership Styles and Leadership Effectiveness - The Glass Ceiling Effect - Women Leaders.

Module IV

Culture and Leadership: Leadership Behaviour and Dimensions of Culture - Universally Desirable and Undesirable Leadership Attributes - Leadership Ethics - Principles of Ethical Leadership - Heifetz's perspective on Ethical Leadership - Burn's perspective on Ethical Leadership.

Suggested Readings:

1. Burns, J.M. Leadership. New York: Harper and Row.
2. Cabane, O. F. The Charisma Myth: How Anyone Can Master the Art and Science of Personal Magnetism. New York: Penguin.
3. Northouse, P. G. Leadership: Theory and Practice. Thousand Oaks, CA: Sage Publications Limited.
4. Rost, J.C. Leadership for the Twenty-First Century. New York: Praeger.
5. Schein, E. H. Organizational Culture and Leadership. New Jersey: John Wiley & Sons.

MBHRM04DSE05: MANAGING GROUP PROCESSES

Credit: 3

Course Objectives:

The objective of this course is to provide an understanding regarding the various aspects of the group processes and help the students to gain knowledge and competence for working with groups.

Course Learning Outcomes:

1. Recognize the characteristics and properties of work groups as a medium of learning, developing and change.
2. Explain the stages of group development.
3. Classify the group decision making techniques.
4. Analyze how to create effective teams.
5. Evaluate issues in groups related to power, influence, leadership, process losses as well as process gains, decisions and resolving conflicts.

Course Contents:

Module I

Groups in Organizations: Characteristics of Groups - Types of Groups - Group Properties - Roles in Groups - Role perception - Role Expectations - Role Conflict - Zimbardo's Prison Experiment - Group Norms - Conformity - Deviant Workplace Behaviour - Status - Sources of Status - Status and Norms - Status and Group Interaction - Group Size - Social Loafing - Group Cohesiveness - Relationship between Group Cohesiveness, Performance Norms and Productivity - Group Diversity.

Module II

Group Development and Decision Making: Stages of Group Development - The Five-Stage Model - The Punctuated Equilibrium Model - Groups versus the Individual - Groupthink -

Groupshift or Group Polarization - Group Decision Making Techniques - Interacting groups - Brainstorming - Nominal Group Technique - Electronic Meetings - Evaluating Group Effectiveness - Intergroup Relations.

Module III

Work Teams: Concept of Teams - Distinguishing Team from Groups - Types of Teams- Problem solving Teams - Self Managed Teams - Cross functional Teams - Virtual Teams - Creating Effective Teams through the Team Effectiveness Model - Contextual Influences - Composition of Teams - Process Variables - Turning Individuals into Team Players - Selecting - Training - Rewarding - Managing Global Teams - Building Team skills - Understanding Organizational Social Networks.

Module IV

Issues in Groups: Power Processes - Sources of Group Influence - Leader Effectiveness - Group Process Losses - Group Process Gains - Functional Perspectives regarding groups and decisions - Roots of Conflicts - Resolving Conflicts.

Suggested Readings:

1. Brown, R. Group Processes: Dynamics within and between groups. New Jersey: John Wiley & Sons.
2. Corey, M. S., & Corey, G. Groups: Process and Practice. Belmont, CA: Brooks/Cole Cengage Learning.
3. Forsyth, D.R. Group Dynamics. Belmont, CA: Wadsworth Cengage Learning.
4. Levi, D. Group Dynamics and Teams. Los Angeles: Sage Publications Limited.
5. Sahu, R.K. Group Dynamics and Team Building. New Delhi: Excel Books.

MBHRM04DSE06: INDUSTRIAL RELATIONS

Credit: 3

Course Objectives:

The purpose of this course is to develop an understanding about the background, issues and challenges related to industrial relations in the Indian context. The course attempts to prepare the students for the ground realities of industrial strife, institutionalized mechanisms to settle disputes and instill harmony.

Course Learning Outcomes:

1. State the nature and importance of Industrial Relations in India with an emphasis on the actors in this field.
2. Explain the roles, functions and problems of Trade Unions.
3. Analyze the modes of pressurizing the management during an industrial dispute.
4. Summarize the issues related to Collective Bargaining, Workers Participation in Management, Grievance handling, Discipline and Employee Engagement in the industrial relations context.

5. Evaluate the legislative procedure and statutory machineries for the settlement of industrial disputes.

Course Contents:

Module I

Introduction to Industrial Relations (IR): Concept of Industrial Relations - Objectives - Scope - Importance of Industrial Relations - Actors in the Industrial Relations System - Factors determining good Industrial Relations - Approaches towards the study of Industrial Relations - Psychological Approach - Sociological Approach, - Socio Ethical Approach - Gandhian Approach - Industrial Relations Approach - Human Relations Approach.

Module II

Trade Union and Industrial Disputes: Characteristics of Trade Unions - Functions - Types - Problems of trade unions - Need for Recognition of Trade Union - Role of ILO in the recognition of Trade Unions - Significance of the Trade Unions Act, 1926 - Industrial Dispute - Causes - Economic - Managerial - Political - Consequences - Strikes - Lockouts - Types of Strikes - Prohibition of Strikes - Lay-off - Retrenchment.

Module III

Prevention of Industrial Disputes: Statutory Measures - Non Statutory Measures - Collective Bargaining - Levels - Process - Workers Participation in Management - Types - Levels - Grievance - Causes - Procedure - Discipline - Causes of Indiscipline - Disciplinary Process - Employee Engagement - Concept - Importance.

Module IV

Settlement of Industrial Disputes and Future of IR: Conciliation - Conciliation Officer - Board of Conciliation - Court of Inquiry - Adjudication - Labour Court - Industrial Tribunal - National Tribunal - Arbitration - Future of Industrial Relations in India.

Suggested Readings:

1. Mamoria, C.B., Mamoria, S. & Gankar, S.V. Dynamics of Industrial Relations. New Delhi: Himalaya Publishing House.

3. Sen, R. Industrial Relations in India: Text and Cases. Mumbai: Laxmi Publications (P) Limited.
4. Sharma, R.C. Industrial Relations and Labour Legislation. New Delhi: PHI Learning Private Limited.
5. Tripathi, P.C. Personnel Management and Industrial Relations. New Delhi: Sultan Chand & Sons Publications.

MBHRM04DSE07: HR METRICS AND ANALYTICS

Credit: 3

Course Objectives:

The objective of this course is to provide a comprehensive understanding of various metrics of human resource activities and processes in organizations and research. It will help the students to familiarize with the tools to analyze, interpret, and generate reports for better human resource management decisions.

Course Learning Outcomes:

1. Identify various measures of human resource management processes and outcomes in an organization and the importance of using data-based reasoning to support HR decisions.
2. Apply skills in quantitative as well as qualitative data analysis in order to make more effective, evidence-based decisions on managing human resources.
3. Select research and analytical tools for measuring, analyzing, and developing HR decision support scenarios.
4. Evaluate results from HR analytics and communicate (implement) actionable insights.
5. Summarize the synergy between HR decisions as well as outcomes and organizational performance.

Course Contents:

Module I

HR Metrics: Measuring HR functions and Processes - Concepts, Approaches and Objectives - Tools for compiling HR Data and HR metrics - Balance Score Card - Employee Surveys - Employment Test Scores.

Module II

HR Functional / process related metrics: Workforce planning metrics - HR Deployment metrics - Recruitment metrics - Selection metrics - Performance metrics - Training / Learning metrics - Compensation and Benefits metrics - Employee Relations metrics.

Module III

Qualitative and Quantitative HR outcome metrics: Attrition - Absenteeism - Job satisfaction - Employee Engagement - Perceptions - Attitude - HRD climate - Safety - Wellness and Employee Health - Social, Demographic and Occupational metrics - Diversity - Methods of data capture and benchmarking - Aligning HR Metrics and Organizational Performance.

Module IV

Analytics: Meaning and scope of analytics in HR - Typical sources of data - Overview of data format - Data analysis techniques in HR analytics - Predictive Analytics - Basic methods and techniques - Scenario planning - Integration with strategic decisions - HR Dash Boards - HR Analytics and HR Decisions - Data Integrity and Security Issues.

Suggested Readings:

1. Bassi, L., Carpenter, R., & McMurrer, D. HR Analytics Handbook. New York: McBassi & Company.
2. Fitz-Enz, J., & Mattox II, J. R. Predictive Analytics for Human Resources. New Jersey: John Wiley & Sons.
3. Marr, B. Data-Driven HR: How to Use Analytics and Metrics to Drive Performance. London: Kogan Page.
4. Soundararajan, R., & Singh, K. Winning on HR Analytics: Leveraging Data for Competitive Advantage. New Delhi: Sage Publications Limited.

MBFIN03DSE02: FINANCIAL SERVICES

Credits: 3

Course Objectives:

The objective of the course is to understand role of Financial Services in business organizations and to give an insight into the strategic, regulatory, operating and managerial issues concerning select financial services. In addition, the course will examine the present status and developments that are taking place in the financial services sector and developing an integrated knowledge of the functional areas of financial services industry in the real-world situation.

Course Learning Outcomes:

1. Understanding the financial system, markets and the risk management systems.
2. Comprehend the role of merchant bankers in corporate advisory services, Understanding different kinds of issues, functions and management of depository in India, stock exchange and stock trading in India.
3. Role and importance of domestic and international credit rating agencies, types of credit cards and debit cards, concept of term sheet.
4. Understand Mutual fund valuation, Development of insurance in India, review and challenges in private equity and hedge funds, Securitization process, structuring a securitization deal.

Course Content:

Module I

Overview of Financial services sector: Characteristics of financial services – role of financial sector in the economy – Institutional framework of Indian financial system- merchant banking – functions of merchant bankers – pre issue activities and post issue activities in issue management- SEBI guidelines on merchant bankers

Financial markets: Classification of financial markets – primary and secondary market – stock exchanges; Capital market - instruments- performance of Indian capital market; Money market - instruments and participants; Role of market regulators; Depositories – mechanism and functions

Module II

Financial Institutions: Commercial banks: functions – regulations - prudential norms for classification - management of NPA- capital adequacy- risk management in banks – recent developments; NBFCs: Classification - prudential norms for NBFCs - role in asset financing – Asset Reconstruction Companies- recent developments; Mutual funds: concept – functions – types of funds – constitution of mutual funds – SEBI regulation of AMC's – Evaluating mutual fund performance.

Module III

Financial Services: Factoring & Forfaiting: concept, mechanism, types, benefits and functions, recent developments; Bills Discounting: concept, mechanism, and functions; Asset securitisation: mechanism – participants - benefits – prospects and problems – recent developments; Leasing and Hire purchase: concept, types, merits and demerits, problems; Mergers and Acquisitions: concept, types, evaluation of major M&A recent events – recent developments.

Module IV

Credit rating: definition – features and advantages – credit rating symbols – credit rating process – rating methodology – equity grading; Venture capital: meaning – origin and growth of venture capital – stages of venture capital financing – venture capital industry in India; Private Equity: concept – recent developments; Payment and settlement system in India – National payment corporation – functions.

Suggested Readings:

1. Khan M.Y, "Financial Services", 8e, McGraw Hill Education, 2015.
2. Jeff Madura, "Financial Markets and Institutions", 12e, Cengage Learning, 2016.
3. Sasidharan K, Alex. K Mathews, "Financial Services and System", McGraw Hill Education, 2008.
4. Bhole L.M, Jitendra Mahakund, "Financial Institution and Markets", 5e, McGraw Hill Education, 2009
5. Vij, M., & Dhawan, S. (2018). Merchant Banking and Financial Services (2nd ed.). India: McGraw Hill Education (India) Private Limited.

MBFIN03DSE03: CORPORATE TAXATION

Credit: 3

Course Objectives:

The aim of this course is to familiarize the student with latest provisions of the Indian Corporate tax laws and implications for various aspects of corporate planning. The knowledge acquired may find a useful application in taking different financial/managerial decisions after taking into consideration the impact of corporate tax laws.

Course Learning Outcomes:

1. Develop the foundations of the analytical approach to Indian tax laws
2. Understanding preparation of return of income.
3. Understanding corporate tax planning in diverse managerial situations

4. Understanding computation of taxable income and tax liability of companies and the implications of tax benefits and incentives for corporate decisions in various situations

Course Content:**Module I**

Income Tax Law: Basic concepts relating to income, gross total income, total income, maximum marginal rate of tax, residential status, scope of total income on the basis of residential status Computation of income under different heads Salaries Profits and gains of business or profession Capital gains Total income and tax computation - and set-off and carry forward of losses Deductions from gross total income. Tax deduction at source, e-TDS return/return of TDS and assessment.

Module II

Corporate Tax Planning: Meaning of tax planning and management, tax evasion and tax avoidance; Nature, scope and justification of corporate tax planning and management. Computation of taxable income and tax liability of companies: Concept and application of Minimum Alternate Tax; Carry forward and set off of losses in the case of certain companies; Tax on distributed profits of domestic companies and on income distributed to unitholders.

Module III

Implications of Tax benefits and incentives for corporate decisions in respect of setting up a new business, location of business and nature of business. Tax planning with reference to financial management decisions; Capital structure decisions; Dividend Policy; Bonus Share; Investments and Capital Gains. Tax planning with reference to specific management decisions - Make or buy; own or lease; repair or replace Tax planning with reference to employees' remuneration; Tax planning with reference to the distribution of assets at the time of liquidation. Tax Planning in respect of amalgamation or demerger of companies; Slump sale; conversion of a firm into a company.

Module IV

International Taxation; Foreign collaborations and incidence of taxation on domestic companies; provisions for relief in respect of double taxation; important Double Taxation Avoidance Agreements with different countries like USA, UK, Mauritius, Singapore, etc. The problems of international double taxation – The assignment rules: source versus residence – methods to alleviate international tax duplication: Tax credit relief; Double tax treaties: OECD Models; International tax avoidance and evasion; transfer pricing; Tax havens – Anti-avoidance measures.

Suggested Readings:

1. Ahuja, G., & Gupta, R. Simplified Approach to Corporate Tax Planning and Management. Delhi: Bharat Law House.
2. Mehrotra, H. C. & Goyal, S. P. Direct Taxes including Planning & Management. Agra: Sahitya Bhawan.
3. Kanga, P., & Vyas, D. The Law and practice of income tax. Lexis Nexis.
4. Pagare, D. Direct tax planning and management. New Delhi: Sultan Chand & Sons.
5. Singhanian, V. K. Direct taxes: Law and practice. New Delhi: Taxmann.
6. Singhanian, V. K., & Singhanian, M. Direct taxes planning and management. Delhi: Taxmann Publications.

MBFIN03DSE04: FINANCIAL DERIVATIVES

Credit: 3

Course Objectives:

To impart an understanding of the characteristics of the different financial derivatives, familiarise with the different pricing models of financial derivatives and to develop skills in application of derivatives for risk management.

Course Learning Outcomes:

1. Familiarize with the characteristics of the relevant financial derivative instruments
2. Be able to describe and explain the fundamental features of a range of key financial derivative instruments
3. Acquire knowledge of how forward contracts, futures contracts, swaps and options work, how they are used and how they are priced
4. Ability to decide which securities to use for hedging and/or speculative purposes
5. Be able to exercise basic quantitative and mathematical skills in pricing derivative instruments
6. Demonstrate an understanding of the uses of financial engineering and risk management approaches and techniques used by modern organizations.

Course Content:

Module I

Derivatives: An Introduction: Definition – Basic Derivative instruments – Forwards, Futures, Options and swaps, – Financial and commodity derivatives – structure of derivative Markets in India - strufactors contributing to the growth of derivatives- Participants in the futures and options market – Social economic benefits of futures and options – Requirements of a successful derivatives market (Theory).

Forward and Future: Meaning, features and types of futures/forwards, – Mechanics of Future Trading– Characteristics – Marking-to-market process - Trading Process & Price Quotations – Hedging and Speculation with stock, index and commodity futures/ forwards – Basic principles of Pricing Forwards/ futures –Techniques of Arbitrage in Stock Index –Pricing of Index Futures Contracts (Theory and Problems).

Module II

Option Contracts: Meaning, features and types of option contracts – Mechanics of buying and selling option contracts-contract specifications of stock, index and commodity options - Option Pricing – Factors affecting Option Pricing – Principles of Call and Put Option Pricing – Valuation of option contracts using Black Scholes model and Binomial model-Put-call parity theory-Option Greeks-Option Trading strategies-Interest rate options-Exotic options – Options hedging strategies - estimating volatilities

Module III

Financial Swaps: Meaning, features and advantages of financial swaps-Types of financial swaps (Interest rate swap, currency swap, equity swap and commodity swap)-Mechanics of

swaps transactions –Triangular swap - valuation and application of swaps. Credit Derivatives- Total Return Swap (TRS)- Credit Default Swap (CDS) (Theory and Problems).

Module IV

Commodity Derivative Market: Meaning of commodity derivatives-Commodity derivative exchanges (with commodities traded) in India-Trading and settlement system of commodity derivatives-SEBI Guidelines for commodity market-commodities traded. Asset Backed Securities (ABS)-Collateralised Debt Obligation (CDO).

Suggested Readings:

1. John .C. Hull, Options, Futures, and Other derivatives, Pearson Education India.
2. Robert A. Strong, Derivates, Cengage learning.
3. Prakash Yaragol, Financial Derivatives-Text and Cases, Vikas Publishing House Pvt. Ltd.
4. S.L. Gupta, Financial Derivates, Prentice Hall of India.
5. D.C. Patwani and AnshalBhangava, Options and futures, Jai co
6. N.D. Vora and Baghri, Options and Future, Tata McGraw Hill.

MBFIN03DSE05: BEHAVIOURAL FINANCE

Credit: 3

Course Objective:

The purpose of this course is to introduce the student to the new field of behavioural finance. The behavioural finance challenges the traditionally held notion that individuals behave in rational, predictable and an unbiased manner. Reliant upon cognitive psychology decision theory, the primary objective of the course is to make the students understand how behavioural bias affects the classical financial theory.

Course Learning Outcomes:

1. Understand and differentiate between different theories of behavioural finance.
2. Examine the concepts of bounded rationality.
3. Discuss various anomalies in the market giving rise to behavioural bias.
4. Understand the concept of market efficiency and will be able to relate it with the concept of behavioural finance.
5. Describe the challenges to the efficient market hypothesis.

Course Content:

Module I

Introduction to Behavioral Finance: Concept, Nature, Scope, Objectives, Difference between Standard Finance and Behavioral Finance, Traditional View of Financial Markets, Anomalies of Financial Markets, Limitation of Efficient Market Hypothesis, Behavioral Financial Market Strategies, Behavioral Indicators, Psychology: Social, Behavioral, Physiological , Applied , Educational , Cognitive Psychology, Boom & Bust Cycles, Prospect Theory, Loss aversion theory,

Behavioral Biases theories : Heuristics, Overconfidence Bias, Representativeness , Anchoring and Adjustment bias, cognitive dissonance bias availability bias, self-attribution bias, illusion of control bias conservation bias, endowment bias, optimism bias, confirmation bias, Impact

of bias on investors, External factors defining investors behavior, Fear and Greed in Financial Market, Finance & Emotions, Investors & types, Characteristics of extremely successful investor, Bubbles and systematic investors sentiments

Module II

Risk Aversion and expected marginal utility, Risk aversion- Rabin and Thaler, expected utility theories, Rationality in investment decisions: Concept, Limitation, assumptions for rational decision making model, Rational decision making process, Dependency of Rationality on Time Horizon, Herbert Simon and Bounded Rationality, Arbitrage: Limits, Types, cost involved in arbitrage process, The model of limited Attention,

Module III

Factors influencing stock & stock market, External factors and investors behavior, Classification of external factors influencing investors behavior, factors influencing on investors behavior.

Neurofinance – Neural process and decision making –Contribution of Neurofinance in Behavioural finance – Frauds and the Psychology behind it.

Module IV

Corporate Behavioral Finance: Introduction, Corporate decision making: Heuristic approach, prospect theory, market variables, herding effect, behavior of investors and inefficiency of market, Empirical data on presence and absence of dividend, Ex-Dividend day behavior, timing of corporate news announcement, Behavioral life cycle, CEO overconfidence and Biases, Approaches and dealing with biases – Debiasing, strategies, uses and Approaches of Behavioural Finance in corporate decision-making.

Suggested Readings:

1. Ackert L and R Daves, Behavioural finance: Psychology decision making and Markets, South western, Centage learning, Mason, Ohio.
2. Bisen, Pandey: Learning Behavioural Finance, Excel Books.
3. Montier, James: Behavioural Finance, John Wiley & Sons, New York.
4. Sheifer A, Inefficient Markets: An Introduction to behavioural finance, Oxford University press, Oxford.
5. Sulphrey, M. M.: Introduction to Behavioural Finance, PHI Learning P. Ltd., New Delhi.

MBFIN04DSE06: INTERNATIONAL FINANCIAL MANAGEMENT

Credit: 3

Course Objectives:

This course would help the students to appraise international financial environment and foreign exchange market, introduce them to various types of foreign exchange risk and derivatives and equip the students in management of MNCs

Course Learning Outcomes:

1. Enumerate the key terms associated with International Finance.

2. Summarize the various the concepts related to regulators, financial markets, Financial Instruments, tax structures at international level.
3. Illustrate the role of international monetary systems & intermediaries in global financial market.
4. Analyzing and understanding the various parameters of global financial market and interpret best possible international investment opportunities.
5. Formulate the investment plan or business plan by adapting international finance environment.

Course Content:

Module I

Introduction International Financial Management: An overview, Importance, nature and scope, Globalization of the World Economy, Goals of International Finance, Structure and participants of the global financial system, Functioning of the global financial system in the globalization process, The Emerging Challenges in International Finance

Module II

International Financial Environment: Evolution of International Monetary System, Gold Standard System, Bretton Woods System, Current Exchange Rate Arrangements, Issues involved in overseas funding choices, International Financial Institutions: International Monetary Fund, World Bank. International credit rating agencies, Balance of Payment: Component, Collection reporting, surplus & deficits. Factors affecting International Trade flows

Module III

Foreign Exchange Market Function and Structure of the Forex markets, major participants, types of transactions and settlements dates, Foreign exchange quotations. Process of arbitrage, speculation in the forward market - Currency Futures and Options Markets, Overview of the other markets – Euro currency market, Euro credit market, Euro bond market, International Stock market.

Module IV

Exchange Rates & Parity Conditions Exchange Rates: Measuring exchange rate movements, Factors influencing exchange rates. Managing Foreign exchange Risk. International arbitrage and interest rate parity – Purchasing Power Parity –Fisher Effect – International Fisher Effect. Investment Decisions: Capital budgeting, Approaches to Project Evaluation, Risk in Cross-border Investment Decisions, Incorporate Risk in Investment Decisions. Financing Decisions of MNC's: Introduction, the cost of capital, capital structure, Methods of raising capital. Working Capital Management: Cash management, management of receivables, Inventory management, financing current assets.

Suggested Readings:

1. Alan C. Shapiro: Multinational Financial Management, John Wiley, 2012
2. Sharan.V: International Financial Management
3. P.G. Apte: International Financial Management.
4. S. Eun Choel and Risnick Bruce: International Financial Management.
3. Maurice D. Levi, "International Finance", Routledge.

MBFIN04DSE07: ADVANCED FINANCIAL MANAGEMENT

Credit: 3

4

Course Objective:

To acquire knowledge of the legal, procedural and practical aspects of Corporate Restructuring.

Course Learning Outcomes:

1. Explain the theoretical concepts related to raising and use of funds and value of firm
2. Calculate values for making capital structure, investment, liquidity and dividend decisions in the financial management of a firm
3. Analyse the options for making the right financial decisions of a firm
4. Assess the role of financial planning, risk analysis in investments, liquidity and credit management policy of the firm on shareholder value

Course Content:

Module I

Corporate Valuation: Enterprise Valuation Models: Discounted Cash Flow Method; Relative Valuation Approach, Enterprise Valuation Multiples. Valuation of Securities: Equity Valuation: Equity Discounted Cash Flow Model; Dividend Discount Model. Valuation of Bonds and Warrants; Valuation of Options using Black-Scholes Option Pricing Model. Numerical Problems: Dividend Discount Model, Equity Discounted Cash Flow Model, Valuation of Options using Black-Scholes Option Pricing Model.

Module II

Merger and Amalgamation -Introduction -Legal, Procedural, Economic, Accounting, Taxation - and Financial Aspects of Mergers and Amalgamations including Stamp Duty and Allied Matters -Interest of Small Investors-Merger Aspects under Competition Law - Jurisdiction of Courts; Filing of Various Forms-Amalgamation of Banking Companies and Government Companies-Cross Border Acquisition and Merger.

Module III

Corporate Demerger and Reverse Merger-Concept of Demerger; Modes of Demerger - by Agreement, under Scheme of Arrangement-Demerger and Voluntary Winding Up-Legal and Procedural Aspects; Tax Aspects and Reliefs-Reverse Mergers – Procedural Aspects and Tax Implications.

Module IV

Takeover-Meaning and Concept-Types of Takeovers; Legal Aspects – SEBI Takeover Regulations-Disclosure and Open Offer Requirements -Bail Out Takeovers and Takeover of Sick Units-Takeover Defences-Cross Border Takeovers- Funding of Merger and Takeover.

Module V

Funding through various Types of Financial Instruments including Equity and Preference Shares, Debentures, Securities with Differential Rights, Swaps, Stock Options; ECBs, Funding through Financial Institutions and Banks-Rehabilitation Finance -Management Buyouts/Leveraged Buyouts - Financial Restructuring -Reduction of Capital- Reorganization

of Share Capital- Buy-Back of Shares – Concept and Necessity-Procedure for Buy-Back of Shares by Listed and Unlisted Companies - Post Merger Reorganization -Factors involved in Post-Merger Reorganization- Integration of Businesses and Operations.

Suggested Readings:

1. Ray, Mergers and Acquisitions Strategy, Valuation and Integration, PHI, New Delhi.
2. L.M. Sharma, Amalgamation, Mergers, Takeovers, Acquisitions – Principles, Practices & Regulatory Framework; Company Law Journal, New Delhi.
3. J.C. Verma, Corporate Mergers, Amalgamations & Takeovers; Bharat Publishing House, New Delhi.
4. N.L. Bhatia & Jagruti Sampat, Takeover Games & SEBI Takeover Regulations; Taxmann Allied Services Pvt. Ltd., New Delhi.
5. Sridharan & Pandian, Guide to Takeovers & Mergers; Wadhwa and Company Law Publisher, Nagpur.
6. S. Shiva Ramu, Corporate Growth through Mergers and Acquisitions; Response Books, New Delhi.

MBFIN04DSE08: MANAGEMENT ACCOUNTING

Credit: 3

Course Objectives:

The course aims at making the students aware of the concepts, principles and also the practices of Management Accounting as an aid to management and hence, the level of knowledge expected is wider than deeper.

Course Learning Outcomes:

1. Develop the foundations of the analytical approach to Managerial decision-making
2. Understanding cost behavior and how managers make a variety of decisions
3. Understanding the relevance of budgeting and computing variances to undertake performance evaluation
4. Differentiating Activity Based Cost Management vs. Traditional Cost Management

Course Content:

Module I

Introduction to Management Accounting: Nature, scope and significance of Management Accounting – synonyms - Limitations of Financial Accounting - need for and nature & scope of Cost Accounting - superiority of cost accounting over financial accounting – important terms and concepts in Cost Accounting - classification of Cost and elements of cost – presentation of cost data – cost sheet.

Module II

Material cost control: Purchase control, stores control and issue control - purchasing procedures – E. O. Q. - pricing of material issues – ABC analysis

Labour cost control: Features of Labour – labour turnover - time keeping and time booking – accounting treatment of idle time and over time – remuneration and incentives – premium bonus schemes – solving problems on Halsey and Rowan plans.

Overheads control: Collection, classification, allocation, apportionment and absorption of overheads - solving of simple problems.

Methods of costing: Important methods of costing – suitability conditions; Contract Costing: Nature and suitability – preparation of contract accounts – work-in-progress; Process costing: Nature and suitability – preparation of process accounts with abnormal losses and abnormal gains.

Module III

Types of costing: An overview of important types of costing. a) Marginal Costing – nature, scope, assumptions, advantages and limitations – applications of marginal costing - Cost Volume Profit analysis - Marginal Costing vs. Absorption Costing. b) Standard costing – establishment of standards – analysis of cost variances – cost control through variance analysis.

Module IV

Budget and Budgetary Control – Meaning of budget and budgeting – functions and types of budgets – preparation of cash budget, production budget and sales budget; Comparison among Financial Accounting, Cost Accounting and Management Accounting.

Suggested Readings:

1. Bhattacharya S. K. and Dearden J., Accounting for Management: Text and Cases, Vikas Publishing House Private Limited, New Delhi.
2. Hingorani N. L. and Ramanathan A. R., Management Accounting, Sultan Chand, New Delhi.
3. Bhar B. K, Cost Accounting – Methods and Problems, Academic Publishers, Kolkata.
4. Horngren, T. C., Datar, S. M., Rajan, M. V. Cost Accounting: A Managerial Emphasis. Pearson
5. Khan, M. Y., & Jain, P. K. (2017). Management Accounting, McGraw Hill.
6. Pandey, I. M. Management Accounting. New Delhi.

MBFIN04DSE09: MANAGEMENT CONTROL SYSTEMS

Credits: 3

Course Objectives:

The course is designed to allow the student to gain knowledge, insights and analytical skills related to how the finance managers go about designing, implementing and using planning and control systems to implement corporate strategies.

Course Learning Outcomes:

1. Understanding the conceptual framework of management control
2. Apply the techniques of management control process and identify the variation in managerial control system
3. Analyse Strategic Cost Control.
4. Analyse the inter-firm strategies and behaviour

Course Content:

Module I

Conceptual framework of management control: Nature of Management Control Systems, Understanding Strategies, Behaviour in Organizations, Responsibility Centers, Revenue and Expense Centers, Profit Centers, Responsibility Accounting, Inter-divisional Transfer Pricing, Measurement of Divisional Performance including Performance Evaluation - Qualitative and Quantitative, Investment Centre and Measuring and Controlling Assets Employed. Practical Problems.

Module II

Techniques of management control process: Strategic Planning, steps in Management control process Budget Preparation, Planning and Procedures, Budgetary Control, Analysis of Variance, Performance Budgeting, Accounting Aspects of Control including Internal Audit and Control and Value for Money, Analysis and Reporting, Variance Reporting. Practical Problems.

Module III

Analyzing Financial Performance Reports, Performance Measurement, Management Compensation, Behavioural aspects of management control such as motivation and morale, Goal Congruency, Participative and Responsive Management.

Variation in managerial control system: Controls for Differentiated Strategies, Service Organizations, Multinational Organizations and Management Control of Projects.

Module IV

Strategic Cost Control: Pricing decision including pricing strategies, Pareto Analysis, Just-in-time Approach, Material Requirement Planning, Enterprise Resource Planning, Total Quality Management, Balance Score Card, Bench Marking, Theory of Constraint, Uniform Costing and Inter firm comparison, Profitability analysis - Product wise / segment wise / customer wise.

Suggested Readings:

1. Allen, B.R., Brownlee, E.R., Haskins, M.E. & Lynch, L.J. (2004). Cases in management accounting and control system (4th ed.). Pearson.
2. Anthony, R. N., & Govindrajana, V. (2007). Management control systems (12th ed.). New Delhi: Tata McGraw-Hill.
3. Cooper, R., & Kaplan, R. S. (1991). The Design of cost management systems (1st ed.).
4. Kaplan, R. S., & Norton, D. P. (2008). Execution premium: Linking strategy to operations for competitive advantage. USA: Harvard Business School Press.
5. Shank, J. K. (2005). Cases in cost management: A strategic emphasis (3rd ed.). USA: Cengage Learning.
6. Shank, J. K., & Govindarajan, V. (2008). Strategic cost management: The new tool for competitive advantage. New York: Free Press.

MBFIN04DSE10: FINANCIAL MODELLING

Credit: 3

Course Objectives:

The general objective is to develop spreadsheet and management skills for creating computer based models for analyzing a variety of decision problems facing today's financial managers and professionals.

Course Learning Outcomes:

1. Understand the basic features and functions in Excel for financial calculations.
2. Understand the concepts of corporate finance and investments.
3. Build models in different areas of finance including corporate analysis, valuation and investments.
4. Know how risk can be built into the model to enhance decision making process.

Course Content:

Module I

Introduction to modelling, introduction to excel, understanding advanced features of excel, excel as a tool for modelling.

Corporate Financial Statements Analysis - profit and loss account, balance sheet & cash flow statement, financial ratios, preparing common size statements, cash budgeting. Modelling and analysis of financial statements using spreadsheet model.

Module II

Time Value of Money - present value, future value, loan amortization, sinking funds.

Cost of Capital – sources and their cost, WACC, CAPM,

Capital Budgeting - basic concepts – capital budgeting techniques, risk in capital budgeting.

Sensitivity Analysis, Scenario Analysis and Monte Carlo Simulation.

Application of spreadsheet models in time value of money, cost of capital and capital budgeting.

Module III

Valuation of common stocks, bonds and firms. Free cash flow to firm model, discounted cash flow model, dividend discount model, earnings growth model.

Risk Analysis – risk and types, measure of risk - variance, standard deviation, covariance, correlation and beta. Value-at-Risk.

Application of spread sheet in estimation, evaluation and modelling return and risk of securities and firm.

Module IV

Modern Portfolio Theory - risk & return of portfolio, efficient portfolios, portfolio optimization, Variance-Covariance Matrix, CAPM model, creating dynamic portfolios, portfolio insurance, fixed income portfolio, portfolio evaluation.

Derivatives – binomial option pricing models, black and scholes model, greeks, real options valuation,

Application of spreadsheets in determining efficient portfolio, creating dynamic portfolios, portfolio insurance and fixed income portfolio management. Usage of spreadsheet in derivatives - black and schools model, greeks, real options valuation and building a mega model

Suggested Readings:

1. Financial Analysis and Modeling using Excel and VBA, Chandan Sengupta
2. Financial Modeling , Simon Benninga
3. Corporate Financial Analysis with Microsoft Excel, Francis J. Clauss

4. Mastering Financial Modelling in Microsoft Excel, Alastair Day

Group IV: OPERATIONS MANAGEMENT – Elective Papers

MBOPM03DSE01: TOTAL QUALITY MANAGEMENT

Credit: 3

Course Objective:

The key objective of this course is to acquaint the students with the conceptualization of Total Quality (TQ) from design assurance to processes' assurance to service assurance. TQM is to be linked with business excellence through management frameworks and award criteria. An additional objective is to give focus on Quality Management Systems (QMS) like ISO-9001.

Course Learning Outcomes:

1. Appreciate the nature, need and scope of total quality management and its relationship with operational and then business excellence.
2. Appreciate the quality of design, off-line control, losses and costs of quality.
3. Develop knowledge and skills about quality improvement tools.

4. Learn about Quality Management systems and its implementation procedures.

Course Contents:

Module I

Total Quality Management – Definition – Quality Management in retrospect – Differential advantage – Evolution of quality approaches – Quality planning – Quality costs – Quality Philosophy of Deming – Joseph Juran – Philip Crosby – Genich Taguchi – Building blocks of TQM – TQM and business excellence frameworks e.g. MBNQA – EFQM – TBEM etc – The four Ps and three Cs of TQM.

Module II

Design for Quality-Design - Innovation and Improvement - The Design Process - Quality Function Deployment (QFD) – The House of Quality - Specifications and Standards - Design in the Service Sector - Failure Mode Effect and Criticality Analysis (FMECA) - The links between good Design and Managing the Business- TQM and JIT.

Module III

Performance Measurement Framework - Performance measurement and improvement cycle - Cost of Quality - The Process model for Quality Costing, A performance measurement Framework - The implementation of performance measurement systems - Benchmarking - The purpose and Practice of Benchmarking - Kaizen – Value Stream Mapping

Module IV

Quality Standards :BIS – AGMARK - ISO9001:2015- ISO14000 – ISO Certification process – Quality awards: Maccolm Baldrige Award - Deming's Prize –DMAIC and DFSS – Quality Circles - 5SProgram - Poka-Yoke - Process Redesign/Engineering - BPR - Statistical Quality Control – Product Control- Process Control- Six Sigma - Continuous Improvement - Taguchi Methods for Process Improvement- The DRIVE Framework for continuous improvement- Implementing TQM.

Suggested Readings:

1. PN. Mukherjee, Total Quality Management, PHI learning PVT Ltd.
2. B.Janakiramanand, R.K.Gopal, Total Quality Management, Text and cases. PHI learning PVT Ltd.
3. S.K. Mandal Total Quality Management, Vikas Publish House PVT Ltd. James. R. Evans. Total Quality Mangement, India Edition, Cengage learning.
4. Kanishka Bedi, Quality Management, Oxford University Press, New Delhi.
5. J M Juran & Frank K Gryana, Quality Planning and Analysis, Tata McGraw Hill, Mumbai.
6. Dennis Locketal.Ed., Hand book of Quality Management, Jaico Publishing House, Mumbai.
7. Subburaj Ramaswamy, Total Quality Management, Tata McGraw Hill, New Delhi.
8. AmitavaMithra, Quality Control and Improvement, Pearson Education, New Delhi.
9. Joel E Ross, Total Quality Management

Course Objectives:

Course aims to provide students with the basic concepts related to the interactions between the operations management system parameters and their impact on production and inventory control systems design. It also provide students with information on the design and management of operations and production planning/control systems including capacity planning, materials requirements planning, inventory models, scheduling and sequencing, and line balancing for various aspects of the manufacturing and service industry.

Course Learning Outcome:

1. Develop theoretical view of production planning in manufacturing.
2. Evaluate capacity planning and its applicability in products and services.
3. Application of planning in service industry.
4. Learn quality management systems and its scope.

Course Contents:**Module I**

Objectives and benefits of Production planning and Control – Functions of production control – Applications of production planning techniques – Operations research applied to production planning - Types of production-Job- Batch and continuous production – Optimized production technology – Group technology – Computer aided process planning – simulation technique.

Module II

Product planning-Extending the original product information-Value analysis-Problems in lack of product planning-Process planning and routing-Pre requisite information needed for process planning-Steps in process planning-Quantity determination in batch production - Machine capacity – Capacity planning - Balancing-Analysis of process capabilities in a multi product system.

Module III

Forecasting demand for services – Managing capacity and demand for services – Managing waiting lines – Capacity planning and queuing models - Developing relationships with suppliers, including the use of supply portfolios.

Module IV

Aggregate planning - scheduling: Gantt charts and sequencing – Project management with PERT/CPM - Just-in-Time – Advanced inventory models - Determination of Economic order quantity and economic lot size – Material Requirements Planning(MRP) – Manufacturing Resources Planning (MRPII) - Enterprise Resource Planning - Introduction to computer integrated production planning systems – Total Quality Management – TQM – TPM - ISO9001andISO14000qualitysystems – Statistical Process Control (SPC).

Suggested Readings:

1. S.K.Mukhupadhyay, Production Planning and Control–Text and Cases, Prentice Hall India Pvt. Ltd, New Delhi
2. William Bolton, Production Planning and Control, Longman Scientific & Technical, New York
3. Stephen N.Chapman, The Fundamentals of Production Planning and Control, Big Hearted Books, New York
4. Stevenson, J. William : Operations Management, McGraw-Hill Irwin

5. Plossl, G.W. : Production and Inventory Control; Principles and Techniques, Englewood Cliffs, NJ, Prentice-Hall
6. Phillip F. Ostwald and Jairo Munoz : Manufacturing Processes and Systems; Wiley India
7. Jay Heizer and Barry Render : Operations Management ; Prentice Hall
8. Monks, Joseph G., : Operations Management; Theory and Problems, McGraw-Hill
9. Mikell P. Groover, : Fundamentals of Modern Manufacturing; Wiley India

MBOPM03DSE03: ADVANCED OPERATION RESEARCH

Credit: 3

Course objectives:

The objective of the course is to familiarize learner with advanced operations research techniques and its application in Managerial decision making. It aims to open up various mathematical tools for informed decision making in marketing, finance and operations domain. The course focuses on optimization and improved logical skills.

Course Learning Outcome:

1. Learn complex linear programming and its solutions.
2. Explore single variable and multivariable unconstrained optimization.
3. Assimilate Integer programming and dynamic programming.
4. Practice network models and fuzzy logic.

Course Contents:

Module I

Review of Basic Operations Research techniques – Simplex Directions and Matrix method of solving Linear Programming Problems (LPP) – Bounded Variables Techniques in Solving LPP – Revised Simplex Method – Interior Point Methods of solving LPP (Karmarkar's Method) - Chance Constrained Linear Programming

Module II

Non linear programming problems of general nature – One variable unconstrained optimization Multi variable unconstrained optimization – Karush Kuhn Tucker (KKT) conditions for constrained optimization and its Applications in Management – Separable programming and its Applications in Management – Quadratic Programming – Convex programming – Geometric programming – Fractional programming and its Application in Management.

Module III

Markov chains – Formulation – Kolmogorov Equation – Steady state conditions – Markov chain modeling through Graphs – Communication networks – Weighted diagraphs – Empirical Queuing models – Network Models - Terminologies, shortest path model – Minimum spanning tree problem – Maximal flow problem – Minimum cost flow problem – Replacement and maintenance Analysis – Types of Replacement problem and decisions–Determination and

problems of Economic life of an Asset – Fuzzy Logic and Systems – Fuzzy Multi Criteria Decision Making - Multi-objective Fuzzy Linear Programming.

Module IV

Integer Programming – Branch and Bound Technique and its applications to Binary Integer Programming and Mixed Integer Programming – Branchand Cut Approach to solve Binary Integer Programming(BIP) – Applications of BIP in the Areas of Investment Analysis – Site selection – Designing a production and Distribution network – Dynamic Programming(DP) – Applications in capital budgeting – Reliability Improvements - Stage-coach – Cargo loading – single machine scheduling – Solving LPP using Dynamic programming Technique – Stochastic Processes – Introduction – Martingales – Random Walk –Brownian Motion.

Suggested Readings:

1. Frederick S. Hillier and Gerald J.Lieberman. Introduction to Operations Research (Concepts and cases) Tata Mc-GrawHill Education Private Ltd.
2. Paneerselvam, Operation Research, PHI Learning Private Ltd, New Delhi.
3. Rathindra P.Sen. Operations Research (Algorithms and Applications), PHI Learning Private Ltd., New Delhi.
4. Harvey J. Greenberg, Frederic H. Murphy, Susan H. Shaw : Advanced Techniques in the Practice of Operations Research, North Holland
5. H.Bierman, C.P.Bonini, &W.H.Houseman : Quantitative Analysis for Business Decision, Richard D.Irwin Inc.

MBOPM03DSE04: MATERIALS AND PURCHASE MANAGEMENT

Credit: 3

Course Objectives:

This course aims at giving practical exposure to operations management students in various aspects of materials management and purchasing. The learners are encouraged to explore the need, purchase, management and cost of materials. Exposure to computerized material management is encouraged. The decisions on cost, storage, handling and retrieval of materials are given emphasis.

Course Learning Outcome:

1. Explore the importance of materials and its impact on organizations.
2. Decision making related to purchasing and its various aspects.
3. Learn about the coding and material inventory systems.
4. Exposure to storage mechanisms in organization.

Course Contents:

Module I

Importance of materials management – Materials management at micro-macro levels – Integrated Materials Management – Profit Centre Concept – Forecasting methods – Factors affecting forecasts – Materials planning - Material Information System - The materials cycle and flow control system - Materials Budget.

Module II

Purchasing principle, procedure and practices - Fundamental objective of purchasing - 5Rs of Purchasing and Related issues - Centralized and localized purchasing - Global Purchases - Government Buying - purchasing policies - Methods of purchasing - Make or buy decision - Vendor Rating - AHP for vendor rating - Source Vendor-Vendee relations - Vendor development - Negotiations in Purchasing.

Module III

Codification - Merits and demerits of codification - Computerization and Information Systems - Standardization and Variety Reduction - Value Analysis: ABC, VED, XYZ and other methods of Selective Analysis - EOQ Model - Stores and Stores organization - Layout of stores - Functions of stores keeping - Stores records and procedure - Stock Verification - Practical Problems in Management of Dead Stocks - Surplus and Scraps - Evaluation of Stores Performance.

Module IV

Materials handling systems - Basic principles - Types - Equipment - Movement and storage cost - Evaluation of value - Value analysis and engineering - Organisation for value analysis - Kanban system - JIT - Material Requirement Planning (MRP) - Understanding the Impact of MRP - ERP.

Suggested Readings:

1. A.K.Datta, Materials Management procedures Text and cases. PHI Learning India.
2. H. Kaushal, Materials Management case study and solutions. Macmillan India Ltd.
3. N.K.Nair, Purchasing and materials management, Vikas Publishing House PVT Ltd.
4. Dr.Pawan Arora, Material Management An Integrated approach, Global India Publications Pvt Ltd, New Delhi.
5. Monczka, Purchasing-Trent and Handfield- Cengage learning, India Edition.
6. J.R.Tony Arnold, Stephen Chapman, Introduction to Materials Management, Pearson Education.
7. Baily, Procurement-Principles and Management, Pearson
8. Gopalakrishnan, Purchasing and Materials Management. McGraw-Hill.

MBOPM04DSE05: SERVICE OPERATIONS MANAGEMENT

Credit: 3

Course objectives:

The objective of this course is to acquaint the participants with decision making in planning, design, delivery, quality, maintenance and scheduling of service operations on a global basis. Course also aims to impart concepts and tools necessary to effectively design and manage a service operation & learn the best practices of World-Class Service.

Course Learning Outcomes:

1. Appreciate complex nature of services and their classification.

2. Appraise the factors related to location and capacity planning for services.
3. Analyze various service design and delivery systems.
4. Learn to measure quality of service.

Course Contents:

Module I

Introduction to service operations: Role of services in an economy- Nature of services and the differences with products- Service strategy and positioning - Matrix of Service Characteristics- Taxonomy of services - Challenges in Operations Management of Services

Module II

New service development - Aggregate Capacity Planning for Services – Technology and its impact on services – Design and development of services and service delivery systems.

Module III

Operations Standards & Work measurement - locating facilities - designing their layout - Subjective and objective factors – Layouts in services – Supporting facility.

Module IV

Managing service operations – Capacity planning and waiting line management(queueing) - Managing capacity and demand – Automation - Determinants of Quality in Services – Measurement - Control and improvement of Quality of Services - Concept of a Total Quality Service - Dynamics of Service Delivery System.

Suggested Readings:

1. Metter, King Metters, Pullman, Walton, Service Operations Management, Cengage Learning India Pvt. Ltd., New Delhi.
2. Bassett, Glenn; Operations Management for Service Industries, Quorum Books, Westport, Connecticut.
3. Colley, John L. Jr: Case Studies in Service Operations, Wadsworth Publishing Company, California.
4. Collier, David A; Service Management: Operating Decisions, Prentice Hall, Englewood Cliffs, New Jersey.
5. Hope, Christine Ann; Muhlemann, Alan P: Service Operations Management: Strategy, Design and Delivery, Prentice Hall, Englewood Cliffs, New Jersey.
6. Lovelock, Christopher H: Managing Services: Marketing, Operations and Human Resources, Prentice Hall, Englewood Cliffs, New Jersey.
7. Schmenner, Roger W: Service Operations Management, Prentice Hall, Englewood Cliffs, New Jersey.
8. Voss, Christopher A.; Armistead, Colin G.; Johnston, Robert; Morris, Barbara: Operations Management in Service Industries and the Public Sector, John Wiley & Sons.

MBOPM04DSE06: TECHNOLOGY AND INNOVATION MANAGEMENT

Credit: 3

Course Objectives:

This course aims to enable students to appreciate the role of technology and innovation in both corporate and public sector. It also aims to equip students with an understanding of the concerns in the management of technological. The course would emphasize on strategic aspects of decision making involved in technology choices, investment options, level of technology absorption and the derived competitive advantages, particularly in the Indian context. It shall focus on developing innovative organization culture and suitable incubation climate

Course Learning Outcomes:

1. Learn about management of technology and recent trends.
2. Explore the diversity of types of innovation, innovators and innovation environment.
3. Appreciate the strategic perspective of the role of technology and the major tools that are used increasingly to assist innovation management in Indian Context
4. Explore the learning organizations with regards to innovation management.

Course Contents:**Module I**

Technology - Definition and Characteristics - Management of Technology - Two contemporary perspectives in Management - Key concepts - Environment and Technological Environment - Actors in the Technological Environment - Changes in the Technological Environment - Major current developments in the Technological Environment.

Module II

Innovation - Introduction - Understanding innovation - Levels and types of innovation - Key drivers of innovation - Sources of innovation - The relationship between innovation and research and technology development - Understanding creativity as a building block to innovation - Innovation Management - Framework for the management of innovation - Public sector services innovation.

Module III

Diffusion – Concept of Diffusion - Dynamics of Diffusion - A model of Innovation Adoption - Factors that Drive the Process of Diffusion - Influence of Environmental Trends on Diffusion. Open Innovation - New technology transfer- Channels – Modes - Levels and various concerns involved Strategic aspects of technology - Critical issues/factors in choice of technology and Processes - Indian context - Technology Portfolio.

Module IV

Mapping Technology Environment - Mechanism for Data Collection - Analytic tools - Managing Environmental Analysis in Organizations - Technology Strategy: Definition - The key Principles Underlying Technology Strategy - Technology Strategy Types -Frameworks for formulating Technology Strategy - Organizational Mechanism for Innovation - Principles & Process of organizing - Characteristics of continuously innovative organizations - Role of Leadership – management of intellectual property rights.

Suggested Readings:

1. RaviJain,HarryC.Triandis,CynthiaW.Weick,ManagingResearch,DevelopmentandInnovation: Managing the Unmanageable, Wiley,
2. Khalil, T. A. Technology management: Key to competitiveness and wealth creation. New Delhi: Tata Mc-Graw Hill.
3. O’Sullivan, D., & Dooley, Applying Innovation. New Delhi: Sage.

4. Trott, P. Innovation Management and New Product Development. Pearson
5. Kahn, K. B. New product planning. New Delhi: Response Books.
6. Kahn, K. B. The PDMA Handbook of new product development. Wiley
7. Schilling, M. A. Strategic Management of Technological Innovation. McGraw-Hill Irwin
8. Christensen, C. M. The Innovator's Dilemma. Collins Business.
9. Chesbrough, H. W Open Innovation, Boston, MA, USA: Harvard Business School Press.

MBOPM04DSE07: WORLD CLASS MANUFACTURING

Credit: 3

Course Objectives:

The course is designed to help students develop an insight into the advanced operations and manufacturing practices prevalent across the globe. The students will also develop an understanding about the applicability of the world class manufacturing (WCM) concepts and practices across both manufacturing and service organizations. The course would equip them with the concepts, tools, techniques and benchmarks of WCM practices which would enable them to apply the same in their organizations in order to excel in overall operational performance.

Course Learning Outcomes:

1. Appreciate the concept and need of world class manufacturing.
2. Recognize the need to implement agility and flexibility in manufacturing system in current context.
3. Conceptually analyze the implementation of TQM, JIT and Theory of Constraints.
4. Grasp the philosophy and principles of Japanese manufacturing especially Toyota Production System (TPS).

Course Contents:

Module I

Manufacturing technology – Developments in world-class manufacturing – Information age competition – Strategic decisions in Manufacturing Management – Choice of technology – Capacity – Layout – Automation in material handling systems - Agile Manufacturing: Distinction between flexibility and agility - Flexible Manufacturing System (FMS); Concepts and components - Modern product and process design concepts and considerations, Assembly lines and batch manufacturing - Group technology (GT)- Rapid prototyping - Concurrent engineering.

Module II

Aggregate planning and Master Production Scheduling – Materials Requirement Planning(MRP) – Manufacturing Resources Planning (MRP–II) – Implementation problems – Indian experience – Scheduling process – Job shop scheduling – Batch production scheduling – Flow production line balancing - Technological innovation in manufacturing – Computer integrated manufacturing – Optimized production technology – Simulation of manufacturing systems – Integration of design & manufacturing

Module III

Total Quality Management (TQM) - Roadmap to Implementation of TQM in manufacturing - Six Sigma approach - Just-in-Time (JIT) and Lean Operations - Kanban - Theory of constraints (ToC) - Japanese manufacturing techniques particularly Toyota Production System - Japanese vs American manufacturing focus - Critical elements of JIT - Operational Framework for concurrent implementation of TQM and JIT - Total Productive Maintenance (TPM) - Concepts and Evolution - Metrics of TPM - Overall Equipment Effectiveness (OEE) - Roadmap to TPM implementation in modern manufacturing – Total system effectiveness

Module IV

Computer Integrated Manufacturing System (CIMS) - A framework for computer integrated enterprise issues involved in CIMS - Enterprise Resource Planning (ERP) - Need and Evaluation of ERP for Operations Management - Benchmarks for excellence in operational performance with global examples - Significance of implementation of concurrent operations management initiatives - Metrics of operational excellence in global context.

Suggested Readings:

1. R. Panneerselvam, Production and operations managements. PHI learning India Ltd.
2. William J.Stevenson, Operations Management. Special Indian Edition, Tata McGraw Hill.
3. B.S. Sahayand others, World Class Manufacturing Macmillan India Ltd, Chennai.
4. JamesR.Evans, DavidA, Operations Management. Collier, India Edition Cengage learning, Chennai.
5. Dornier, P.P., Ernst, R., Fender, M., & Kouvelis, P, Global Operations and Logistics; Text and Cases. John Wiley& Sons.
6. Hall, R. Attaining Manufacturing Excellence. Dow-Jones Irwin.
7. Goldratt, E.M., Cox, J. The Goal. Chennai: Productivity Press.
8. Evans, J.R., & Collier, D.A, Operations Management: An Integrated Goods and Services Approach, Cengage Learning.
9. Shingo, S, A Study of Toyota Production System from Industrial Engineering Viewpoint. Tokyo: Japanese Management Association.

MBOPM04DSE08: SUPPLY CHAIN MANAGEMENT

Credit: 3

Course objectives:

This course is designed to help the students understand the role of supply chain (SC) in improving the efficiency of a network of organizations across the entire value chain right from sourcing of inputs to the retailing of final products with a view to delivering improved value to the customers. The course would attempt to cover the important dimensions of SCM including SC strategy, SC inventory models, Transportation in a SC, Distribution strategy of a SC, SC coordination, Outsourcing strategy, Postponement strategy, Big data in supply chain, Buyer-supplier relationships, Reverse logistics, Sustainable supply chain management etc.

Course Learning Outcomes:

1. Develop an understanding of the role of supply chain in an organization and the significance of supply chain strategy in overall business.

2. Analyze the suitability of different types of inventory models under different situations in the context of a supply chain.
3. Learn different modes of transportation, their applicability under different contexts and the trade-offs in transportation design.
4. Assimilate the importance of reverse logistics in both manufacturing and e-commerce firms.

Course Contents:

Module I

Supply chain Management - Introduction – Integrated Logistics Management–Concept – Evolution and Development - Difference–Role – Scope – Functions and Importance – Types of Supply Chains and examples – Strategic, Tactical and Operational Decisions in Supply Chain – SCM Process View: Cycle View, Push – Pull View – Supply Chain Coordination and integration - Obstacles – Supply Chain Drivers.

Module II

SCM Strategies – Strategic Fit- Collaborative Planning Forecasting Replenishment(CPFR) – Advanced Planning and Scheduling(APS) – Inventory concepts in SCM – Product availability – Reduction of safety stock - Postponement,- Strategic Sourcing in SCM: Role of sourcing in a supply chain - Framework for Make/Buy decisions – Vendor identification-selection-evaluation–development - Transportation in SCM: Modes - Costs and their performance characteristics - Trade-offs in transportation design

Module III

Supply chain coordination: Bullwhip effect - Causes and consequences - Impact of centralized information on Bullwhip effect - Mitigating strategies - Information sharing and incentives - Supply Chain Performance Measurement – Lean Supply Chain Management – Supply Chain Operations Reference (SCOR) modeling – Benchmarking –Green Supply Chain Management - International SCM – Global Sourcing.

Module IV

SCM network Design and Facilities Development: Locations – Costs – Role of IT in Supply Chain Management – Impact of internet and E-Business – Radio Frequency Identification (RFID) in SCM – ERP - SCM Software - Big data analytics in SCM: Significance of big data in supply chain - Relevant tools – Logistics Management – Logistics Vs SCM - Manufacturing Logistics – Outbound Logistics – Third Party Logistics – Fourth Party Logistics – Reverse Logistics in manufacturing organizations and ecommerce firms - Warehousing – Packaging – Unitizing.

Suggested Readings:

1. Martin Christopher, Logistics and Supply Chain Management.
2. Sunil Chopra and Peter Meindal , Supply Chain Management.
3. Ballou, Ronald H., Business Logistics/Supply Chain Management, Pearson Prentice Hall.
4. Rahul V Altekhar, Supply Chain Management, concept and cases, PHI Learning Pvt. Ltd.
5. N. Chandrasekharan, Supply Chain Management: Process, System and Practice, Oxford Higher Education/Oxford University Press.
6. Jeremy F Shapiro, Modeling TheSupply Chain, Thomson Duxbury.
7. Donald J Bowersox etal,Supply Chain Logistics Management, Mcgraw Hill Education(India) Pvt.Ltd., NewDelhi.
8. R.P.Mohanty & S.G.Deshmukh, Essentials Of SupplyChain Management, Jaico Publishing House.

9. Sinha, S.K., Logistics and Supply Chain Management, Shree Publications, NewDelhi.
